SUPPLEMENTARY INFORMATION:

Background

DOE issued its Public Participation Policy (DOE P 1210.1) on July 29, 1994. The Policy was in the form of an internal directive that provided policy guidance for DOE officials. Under DOE's Directives System, all documents must be reviewed periodically for currency and appropriateness.

A Task Force of DOE headquarters program and field site managers actively involved in public participation activities was convened to review the policy. The Task Force proposed revisions to clarify and update the policy to reflect current practices and the lessons of six years' experience with public participation.

At about the same time, the Openness Advisory Panel of the Secretary of Energy Advisory Board undertook a review of DOE's relationships with the communities surrounding its laboratories and facilities to assess how DOE is perceived as a neighbor, what it is doing well, and what it could do better. The Panel's initial review focused on Lawrence Berkeley National Laboratory and Lawrence Livermore National Laboratory, both in California, and on the Fernald Plant, in Ohio. On November 17, 2000 the Openness Advisory Panel issued its report, titled Relations between DOE Facilities and their Host Communities: A Pilot Review, which presented Findings and Recommendations on improving community relations. As keys to success, the Openness Advisory Panel identified full, open, timely, two-way communication, the building of positive

personal relationships, and accountability on the part of DOE managers. The importance of these elements has been reaffirmed and strengthened in the proposed revisions.

Proposed Revised Policy

Under the proposed revised Public Participation and Community Relations Policy, public participation would be defined as open, ongoing two-way communication, both formal and informal, between DOE and its stakeholders concerning DOE's missions and activities. The Policy would recognize that effective public participation is at the core of good community relations, which are essential for DOE facilities to achieve their missions. Under this Policy, DOE would actively seek, consider, and incorporate or otherwise respond in a timely manner to the views of its stakeholders and affected communities in making its decisions. This Policy would function as a framework within which all DOE programs, including programs of the National Nuclear Security Administration, would operate.

The proposed Public Participation and Community Relations Policy is being released for public comment prior to DOE's decision to approve any of the recommended changes.

Issued in Washington D.C., January 16, 2001.

Linda Lingle,

Principal Deputy Assistant Secretary, Office of Congressional and Intergovernmental Affairs.
