DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP01-66-000]

Egan Hub Partners, L.P.; Notice of Application

January 25, 2001.

Take notice that on January 16, 2001, Egan Hub Partners, L.P. (Egan Hub) 5400 Westheimer Court, Houston, Texas 77056-5310, filed, in Docket No. CP01-66-000, an application pursuant to Section 7(c) of the Natural Gas Act and

Part 157 of the Federal Energy Regulatory Commission's (Commission) regulations for a certificate of public convenience and necessity authorizing: (1) The installation of additional compression and appurtenant facilities, and (2) the expansion of storage capacity at Egan Hub's existing salt dome storage facility located in Acadia Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may be viewed at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance).

Specifically, Egan Hub proposes to increase the total maximum operating capacity of its existing two-cavern facility from the currently certificated 15.5 Bcf capacity to a proposed 21 Bcf capacity, and install an additional 18,365 hp of compression. Egan Hub states that the existing 1,500,000 Mcfd of deliverability from the storage field will be unchanged, but the aggregate maximum average injection rate will be increased from 600,000 Mcfd to approximately 800,000 Mcfd. Egan Hub requests continued authorization to charge market-based rates.

Egan Hub requests certificate authorization on or before June 1, 2001, in order to provide access to an increment of the new storage capacity during the 2001-2002 heating season. Egan Hub also requests that the certificate provide for a construction period ending October 31, 2005, to accommodate the four year construction period that will be required if cavern expansion is created through the "solution mining under gas" technique which allows both caverns to remain in service while capacity is increased.

Questions regarding the details of this proposed project should be directed to Mr. Steven E. Tillman, Director of Regulatory Affairs, P.O. Box 1642, Houston, Texas 77251-1642 or call (713) 627-5113 or FAX (713) 627-5947.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before February 15, 2001, file with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, D.C. 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents

filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project. This preliminary determination typically considers such issues as the need for the project and its economic effect on existing customers of the applicant, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the applicant may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this
