Up to 5.0 acre-feet	\$37.00
5.0 to 5.5 acre-feet	7.40

Consultation and Coordination With Tribal Governments (Executive Order 13175)

The rate adjustment was developed in consultation between the irrigators, the BIA and the Tribal Irrigation Committee (Committee). The Committee was established by the Colorado River Indian Tribes (Tribes) and maintains a membership appointed by the Tribal Council. During the March 2001 Committee meeting, a budget subcommittee was appointed and tasked to specifically review the excess water rate and make recommendations to the Committee for proposed adjustments. The subcommittee developed a method and rate which would maintain an excess water rate consistent with the previously developed budget. The proposed rate was reviewed and approved by the Committee during their May 2001 meeting. On June 19, 2001, a meeting was held between the Tribes and the BIA. During the meeting the

Tribes were informed of the proposed rate adjustment and the impacts associated with this adjustment. The Tribes agreed to the proposed adjustment to the excess water rate and a verifying letter was sent to the Tribes on July 3, 2001.

Throughout the process of reviewing the excess water rate the BIA has relied upon input and consultation with the Tribes through their Irrigation Committee and Water Resource Program activity, to develop an equitable rate for farmers, maximize water conservation and maintain sufficient funds for operation and maintenance of the project.

This is a notice for a rate adjustment at a BIA owned and operated irrigation project. This rate adjustment had no significant adverse effects on energy supply, distribution, or use (including a shortfall in supply, price increases, and increase use of foreign supplies) when the proposed rate adjustment was implemented.

This rate adjustment was not a significant regulatory action and did not need to be reviewed by the Office of Management and Budget under Executive Order 12866.

Takings (Executive Order 12630)

The Department determined that this rate adjustment did not have significant "takings" implications. The rate adjustment did not deprive the public, state, or local governments of rights or property.

Federalism (Executive Order 13132)

The Department determined that this rate adjustment did not have significant Federalism effects because it pertained solely to Federal-tribal relations and did

not interfere with the roles, rights, and responsibilities of states.

SUPPLEMENTARY INFORMATION: The Cachuma Project is located along the Santa Ynez River in northern Santa Barbara County, California. It was constructed in the early 1950's by Reclamation under contract with Santa Barbara County Water Agency on behalf of local water purveyors, called the Cachuma Member Units. The project consists of Bradbury Dam, Cachuma Lake, and associated conveyance facilities. The lake is about 3,000 acres in size, surrounded by about 6,500 acres of Federal land. The project is the primary water supply for the communities of Santa Ynez, Santa Barbara, Goleta, Carpinteria, and Montecito. Reclamation executed a contract with Santa Barbara County (County) in 1953 to manage recreation at the lake. The County has developed a 375-acre recreation area on the south shore of the lake with picnicking, boating, hiking, and camping.

Reclamation is preparing an RMP for the Cachuma Project. The RMP will specifically address the County recreation area, including the entire lake and all Government land surrounding the lake.
