ENVIRONMENTAL PROTECTION AGENCY

[FRL-7160-7]

Notice of Final Decision To Grant Vickery Environmental, Incorporated a Modification of an Exemption From the Land Disposal Restrictions of the Hazardous and Solid Waste Amendments of 1984 Regarding Injection of Hazardous Wastes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final decision on a request to modify an exemption from the Hazardous and Solid Waste Amendments of the Resource Conservation and Recovery Act.

SUMMARY: Notice is hereby given by the Environmental Protection Agency (EPA or Agency) that a modification of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act (RCRA) has been granted to Vickery Environmental, Inc. (VEI) of Vickery, Ohio. This modification allows VEI to continue to inject three (3) RCRA-regulated hazardous wastes which will be banned from land disposal on May 20, 2002, as a result of regulations promulgated in the **Federal Register** (FR) on November 20, 2001 (66 FR 58258), into four Class I injection wells at the Vickery, Ohio, facility. As required by 40 CFR part 148, VEI has demonstrated, to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the injection zone utilized by VEI's waste disposal facility located near Vickery, Ohio, for as long as the newly-exempted wastes remain hazardous. This decision constitutes a final Agency action for which there is no administrative appeal.

DATES: This action is effective as of May 20, 2002.

FOR FURTHER INFORMATION CONTACT: Harlan Gerrish, Lead Petition Reviewer,

USEPA, Region 5, telephone (312) 886-2939. Copies of the petition and all pertinent information relating thereto are on file and are part of the Administrative Record. It is recommended that you contact the lead reviewer prior to reviewing the Administrative record.

SUPPLEMENTARY INFORMATION:

I. Background

Chemical Waste Management (CWM), the predecessor of VEI, submitted a petition for an exemption from the restrictions on land disposal of hazardous wastes on January 19, 1988. Revised documents were received on December 4, 1989, and several supplemental submittals were subsequently made. The exemption was granted on August 7, 1990. On September 12, 1994, CWM submitted a petition to modify the exemption to include wastes bearing 23 additional RCRA wastes codes. Region 5 reviewed documents supporting the request and granted the modification of the exemption on May 16, 1995. A notice of the modification appeared on June 5, 1995, at 60 FR 29592 *et seq.* On April 9, 1996, CWM submitted a petition to again modify the exemption to allow 91 additional RCRA waste codes. Region 5 reviewed documents supporting the request and granted the modification on the exemption on June 24, 1996. A notice of the modification appeared on July 15, 1996, at 61 FR 36880 *et seq.* Again on May 13, 1997, CWM submitted a request to add 11 waste codes to the list. Region 5 reviewed the evidence submitted by CWM and granted the request. Notice of the approval appeared on August 12, 1997 (63 FR 43109). On October 13, 1997, CWM notified the EPA that the name of the operator of the Vickery facility would become Waste Management of Ohio (WMO). This change was acknowledged by EPA through a letter added to the Administrative Record on November 10, 1997. On August 28, 1998, WMO requested that two additional wastes codes be approved for injection. Notice of the approval appeared on December 10, 1998 (63 FR 68284). In the same year, on November 5, 1998, WMO submitted a petition to exempt four additional waste codes. Approval of this petition appeared on February 10, 1999 (64 FR 6650). On January 24, 2000, Waste Management of Ohio informed EPA of a corporate reorganization and subsequent name change from Waste Management of Ohio to Vickery Environmental, Inc. This change was acknowledged by EPA through a letter added to the Administrative Record on

March 9, 2000. On March 20, 2001, VEI requested that two wastes, designated as K174 and K175, be added to the list of wastes exempted for injection at VEI. This request was approved on May 23, 2001, and notice of the request appeared in the **Federal Register** on April 25, 2001 (66 FR 28464–28466).

The rule promulgated on November 20, 2001, bans K176, K177, and K178 from injection after May 20, 2002, unless VEI's exemption is modified to

allow injection of those wastes. As K-coded wastes, the codes represent a number of chemicals, all of which have already been approved for injection at Vickery under other waste codes. After review of the material submitted, the EPA has determined, as required by 40 CFR 148.20(f), that there is a reasonable degree of certainty that the hazardous constituents contained in the wastes bearing the codes to be banned will behave hydraulically and chemically

like wastes for which VEI was granted its original exemption and will not migrate from the injection zone in hazardous concentrations within 10,000 years. The injection zone is the Mt. Simon Sandstone and the Rome, Conasauga, Kerbel, and Knox Formations. The confining zone is comprised of the Wells Creek and Black River Formations.

II. Conditions

General conditions of this exemption are found at 40 CFR part 148. The exemption granted to VEI on August 7,

1990, included a number of specific conditions. Conditions numbered (1), (2), (3), (4), and (9) remain in force. Construction of a monitoring well required under condition 5 has been

completed, and the required monitoring will continue through the life of the facility. Conditions numbered (6), (7), and (8) have been fully satisfied. The results of the work carried out under

these conditions confirms that the model used to simulate fluid movement within the injection zone for the next 10,000 years is valid and results of the simulation bound the region of the injection zone within which the waste will be contained.
