BILLING CODE 6714–01–M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than May 28, 2002.

A. Federal Reserve Bank of Philadelphia (Michael E. Collins, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105–1521:

1. *Peter DaPaul*, Ambler, Pennsylvania; to gain control of the outstanding common stock of Madison Bancshares Group, Ltd., Blue Bell, Pennsylvania, pursuant to Section 225.41 of Regulation Y, and thereby indirectly acquire voting shares of Madison Bank, Blue Bell, Pennsylvania.

Board of Governors of the Federal Reserve System, May 6, 2002.

Robert deV. Frierson,

Deputy Secretary of the Board.

Office of the Secretary

Agency Information Collection Activities: Submission For OMB Review; Comment Request

The Department of Health and Human Services, Office of the Secretary publishes a list of information collections it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) and 5 CFR 1320.5. The following are those information collections recently submitted to OMB.

1. Survey of Research Integrity Measures Utilized in Biomedical Research Laboratories—New—The Office of Research Integrity (ORI) expanded its education program to promote research integrity and discourage research misconduct. The proposed survey will identify measures being utilized to prevent misconduct and promote integrity in research laboratories. The results will guide ORI in the development of training and other educational material promoting research integrity. *Respondents:* Business or other for-profit, non-profit institutions; *Number of Respondents:* 5,000; *Frequency of Response:* one time; *Average Burden per Response:* 15 minutes; *Burden:* 1,250 hours.

OMB Desk Officer: Allison Herron Eydt.

Copies of the information collection packages listed above can be obtained by calling the OS Reports Clearance Officer on (202) 690–6207. Written comments and recommendations for the proposed information collection should be sent directly to the OMB desk officer designated above at the following address. Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW., Washington, DC 20503.

Comments may also be sent to Cynthia Agens Bauer, OS Reports Clearance Officer, Room 503H, Humphrey Building, 200 Independence Avenue SW., Washington, DC, 20201. Written comments should be received within 30 days of this notice.

Dated: April 30, 2002.

Kerry Weems,

Acting Deputy Assistant Secretary, Budget.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 498–1210.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: Surveys of Past HIV Prevention Technology Transfer Efforts—New—National Center for HIV, STD and TB Prevention (NCHSTP), Centers for Disease Control and Prevention (CDC).

CDC proposes to study the effectiveness of providing a packaged intervention, training, and technical assistance to HIV prevention agencies to ensure the agencies' maintenance of the intervention and adherence to the essential components of the intervention's defined protocol. Results from the survey will be used by CDC to develop a national program for disseminating packaged interventions

that will increase the likelihood of continued use by agencies. This project supports CDC's Replicating Effective Programs (REP) project. The REP converts the intervention protocols from effective HIV prevention studies into packages (kits) containing manuals, videos, posters, penile models, and other materials needed by HIV prevention providers to implement the particular intervention on their own.

The surveys will be disseminated to staff members of 16 prevention agencies that implemented one of five unique, packaged interventions between 1997 and 2000 as part of CDC's ongoing REP project. One survey will be administered over the telephone to Agency Administrators from the 16 prevention agencies that implemented an intervention packaged by the REP project. Additional surveys will be administered in-person to one

Intervention Supervisor and two Intervention Facilitators at 15 prevention agencies that are continuing to implement the REP-packaged intervention.

The objectives of the surveys include, but are not limited to, (1) Identification of factors associated with maintenance and discontinuation of REP-packaged interventions; (2) determination of why and how agencies adapted the packaged interventions; (3) examination of the impact of elapsed time on maintenance of the intervention and adherence to defined intervention protocols; (4) identification of any differences between the type of agency (i.e., community-based organization, health department) on maintenance and adherence; (5) identification of any difference between the type of original researcher (i.e., academic, non-profit) on maintenance and adherence; and (6)

identification of perceived and actual benefits, as well as "instrumental" and "conceptual" utility, of REP-packaged interventions that can be used in marketing the intervention packages to other HIV prevention providers. Researchers administering the in-person surveys also will assess adherence to defined intervention protocols by observing facilitators delivering the intervention and by recording their observations on a checklist designed for the particular intervention being observed.

Survey questionnaire data will be collected once from each respondent (e.g., Agency Administrator, Intervention Supervisor, Intervention Facilitator). There are no costs to respondents for participation in the survey.

Respondents	Number of respondents	Number of responses/respondent	Avg. burden/response (in hours)	Total burden hours
Agency Administrators	16	1	108/60	29
Intervention Supervisors	15	1	90/60	23
Intervention Facilitators	30	1	105/60	53
Total	105

Dated: May 2, 2002.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

Proposed Project: Intimate Partner Violence (IPV) Measurement—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Intimate partner violence (IPV) is considered by many to be a serious problem that cuts across cultures, socioeconomic status and gender. The Centers for Disease Control and Prevention (CDC) considers IPV to be a "substantial public health problem for

Americans that has serious consequences and costs for individuals, families, communities and society." The past twenty years have witnessed an extraordinary growth in research on the prevalence, incidence, causes and effects of IPV. Various disciplines have contributed to the development of research on the subject including psychology, epidemiology, criminology and public health.

Still, there is a lack of reliable information on the extent and prevalence of IPV. Estimates vary widely regarding the magnitude of the problem. This variance is due in large part to the different contexts, instruments, and methods that are used to measure IPV. Thus, the CDC is engaged in work to improve the quality of data, and hence knowledge, about violence against women. Part of this process includes identifying the strengths and limitations of different scales used to measure IPV and to determine the appropriateness of each of the scales for use with individuals of different racial/ethnic backgrounds.

The purpose of this project is to administer and test the statistical properties of four scales, via telephone interviews, that measure both victimization from and perpetration of
