OMB Control Number: 0535-0002.

Expiration Date of Approval: 12/31/04.

Type of Request: Intent to revise a currently approved information collection.

Abstract: The National Agricultural Statistics Service is responsible for collecting and issuing State and national estimates of crop and livestock production, grain stocks, farm numbers, land values, on-farm pesticide usage, and pest crop management practices. The Field Crops Production program consists of probability field crops surveys and supplemental panel surveys which capture unique crop characteristics such as the concentration of crops in localized geographical areas. The Program is being revised to discontinue the November and December tobacco forecasts. NASS will no longer forecast tobacco acreage, yield, and production in the November and December Crop Production reports. All types of tobacco are affected in November, whereas only burley tobacco is affected in December. Final production estimates will continue to be published for all types of tobacco in the Annual Crop Production report, released on or about January 10 each year. Annual tobacco revisions will continue to be published in the May Crop Production report.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 14 minutes per response.

Respondents: Farms.

Estimated Number of Respondents: 536,000.

Estimated Total Annual Burden on Respondents: 150,000 hours.

These data will be collected under the authority of 7 U.S.C. 2204(a). OMB Number: 0535-0004.

Expiration Date of Approval: August 31, 2002.

Type of Request: Intent to seek approval to extend an information collection.

Abstract: The primary objective of the National Agricultural Statistics Service is to prepare and issue State and national estimates of crop and livestock

production, disposition, and prices. The Egg, Chicken, and Turkey Program obtains basic poultry statistics from voluntary cooperators throughout the Nation. Statistics are published on placement of pullet chicks for hatchery supply flocks; hatching reports for broiler-type, egg-type, and turkey eggs; number of layers on hand; total table egg production; and production and income estimates for eggs, chickens, and turkeys.

This information is used by producers, processors, feed dealers, and others in the marketing and supply channels as a basis for production and marketing decisions. Government agencies use these estimates to evaluate poultry product supplies. The information is an important consideration in government purchases for the school lunch program and in formulation of export-import policy. The Egg, Chicken, and Turkey Surveys have approval from OMB for a 3-year period. NASS intends to request that the surveys be approved for another 3 years.

These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents.

FOR FURTHER INFORMATION CONTACT:

Roberta D. Purcell, Assistant Administrator, Telecommunications Program, Rural Utilities Service, room 4056-S, Stop 1590, 1400 Independence Avenue, SW., Washington, DC 20250-1500, Telephone: (202) 720-9554.

SUPPLEMENTARY INFORMATION: The meeting will be conducted by representatives of the Department of Agriculture. The proceedings of the meeting will be transcribed and considered in implementing provisions of the Farm Security and Rural Investment Act of 2002 (Pub. consideration in the implementation and administration of its telecommunications broadband loan program. The Agency will retain a summary of the meeting.

RUS is particularly interested in receiving presentations on the following specific issues as they relate to rural broadband access:

1. *The demand for rural broadband access*—What is driving the demand? What is limiting demand? Who are the players and what are their roles—federal, state, and local governments, service providers, equipment manufacturers, private lenders, educational and health care organizations, public safety agencies, etc. What services are in demand, which are not?

2. *The deployment of broadband access*—Where is broadband access available today in rural America—schools, hospitals, law enforcement, businesses, residences? Is there an abundance of dark fiber and if, so, how can that best be used in serving rural America? What technologies are available—which are succeeding, what are their limitations, and at what cost?

3. *The rural landscape*—Who serves rural America? What inhibits rural investment?

4. *Universal service*—Who will protect/finance the carriers of last resort? Will broadband service be a supported service?

5. *Competition*—What role does competition play? Can a rural area support competing broadband providers? What impact will a competitor have on local exchange service?

6. *The benefits*—What are the success stories—to local residents and national interest?
