

from the Russian Federation. *See Notice of Preliminary Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products From the Russian Federation*, 67 FR 31241 (May 9, 2002) ("Preliminary Determination"). The final determination of this investigation is currently due no later than July 23, 2002. Pursuant to section 735(a)(2) of the Act, on May 30, 2002, the Ministry of Economic Development and Trade of the Russian Federation ("MEDT") requested that the Department postpone its final determination in the investigation until 135 days after the date of the publication of the preliminary determination in the Federal Register. In addition, on June 3, 2002, MEDT requested that the Department extend the application of the provisional measures prescribed under 19 C.F.R. 351.210(e)(2) to not more than six months.

#### Postponement of Final Determination and Extension of Provisional Measures

In accordance with 19 C.F.R. 351.210(b), because (1) our preliminary determination is affirmative, (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise, and (3) no compelling reasons for denial exist, we are granting MEDT's request and are fully extending the time for the final determination, until no later than September 23, 2002. Suspension of liquidation will be extended accordingly.

Dated: June 12, 2002

**Richard W. Moreland,**

*Acting Assistant Secretary for Import Administration.*

#### Notice of Amended Preliminary Determination of Sales at Less Than Fair Value; Certain Cold-Rolled Carbon Steel Flat Products From Turkey

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of Amended Preliminary Determination of Sales at Less Than Fair Value.

**EFFECTIVE DATE:** June 19, 2002.

**FOR FURTHER INFORMATION CONTACT:** Melissa Blackledge, or Robert James,

Antidumping and Countervailing Duty Enforcement Group III, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230, at (202) 482-3518, or (202) 482-0649, respectively.

#### SUPPLEMENTARY INFORMATION:

##### Applicable Statute and Regulations:

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Tariff Act) by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations refer to the regulations codified at 19 CFR part 351 (2001).

##### Amendment to the Preliminary Determination

On April 26, 2002, the Department determined that certain cold-rolled carbon steel flat products (cold-rolled steel) from Turkey are being, or are likely to be, sold in the United States at less than fair value (LTFV), as provided in section 735(a) of the Tariff Act. *See Notice of Preliminary Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products From Turkey*, 67 FR 31264 (May 9, 2002) (*Preliminary Determination*). On May 7, 2002, respondent Borcelik Celik Sanayii ve Ticaret A.S. (Borcelik) timely filed an allegation that the Department had made several ministerial errors in its preliminary determination. Borcelik requested that we correct the errors and publish a notice of amended preliminary determination in the **Federal Register**. See 19 CFR 351.224(e).

Borcelik's submission alleges the following errors:

- the Department inadvertently omitted programming language used to create a model data set for the home market sales file containing a single record for each CONNUM and month combination, thus obviating our intention to match sales by month;
- the Department inadvertently deducted billing adjustments 4 and 5 reported by affiliated reseller/service center Kerim Celik in the net price calculation when these adjustments should have been additions to revenue;
- for sales by Kerim Celik, total costs of producing the cold-rolled coil at Borcelik were unintentionally deducted by the Department rather than deducting the cost of further processing

performed by Kerim Celik, reported as TOTCOP, and scrap (SCRAP);

- the Department used inaccurate exchange rates;
- the Department incorrectly recalculated Borcelik's G&A expense ratio excluding miscellaneous adjustments to G&A expenses reported by respondent;
- the Department relied upon total cost of production, instead of total cost of manufacturing, in calculating the twenty percent difference-in-merchandise test; and
- the Department unintentionally used the Turkish lira prices to calculate normal value, instead of using the U.S. dollar prices negotiated for most home market sales.

*See Letter, Dickstein Shapiro Morin & Oshinsky LLP, May 7, 2002 passim.*

The Department's regulations define a ministerial error as one involving "addition, subtraction, or other arithmetic function, clerical error resulting from inaccurate copying, duplication or the like, and any other similar type of unintentional error which the Secretary considers ministerial." 19 CFR 351.224(f). A significant ministerial error is defined as an error, the correction of which, singly or in combination with other errors, would result in (1) a change of at least five absolute percentage points in, but not less than 25 percent of, the weighted-average dumping margin calculated in the original preliminary determination; or (2) a difference between a weighted-average dumping margin of zero or *de minimis* and a weighted-average dumping margin of greater than *de minimis* or vice versa. *See* 19 CFR 351.224(g).

After reviewing respondent's allegations we have determined, in accordance with 19 CFR 351.224(e), that the Preliminary Determination includes five ministerial errors, which together constitute significant ministerial errors. We agree that the following five allegations raised by Borcelik constitute significant ministerial errors: i) monthly model matching; ii) Kerim Celik's billing adjustments 4 and 5; iii) Kerim Celik's further processing costs; iv) improper exchange rates; and v) the calculation of differences in merchandise. *See Memorandum For Richard Weible; "Allegations of Ministerial Errors; Preliminary Determination in the Investigation of Certain Cold-Rolled Carbon Steel Flat Products from Turkey"* (Ministerial Errors Memorandum), dated June 12, 2002, a public version of which is on file in room B-099 of the main Commerce building, and the

*Preliminary Determination*, 67 FR at 31264.

The alleged ministerial errors with which we do not agree concern (1) the respondent's assertion that the Department inadvertently omitted miscellaneous adjustments from the revised G&A ratio and (2) the respondent's assertion that we unintentionally used the Turkish lira prices in calculating normal value. For a detailed description of all of these allegations and, where applicable, our resultant corrections, see the Ministerial Errors Memorandum. Therefore, in accordance with 19 CFR 351.224(e), we are amending the preliminary determination of the antidumping duty investigation of certain cold-rolled carbon steel flat products from Turkey to reflect the correction of significant ministerial errors made in the margin calculation regarding Borcelik. The revised weighted-average dumping margins are in the "Amended Preliminary Determination" section, below.

#### Scope Of The Investigation

For purposes of this investigation, the products covered are certain cold-rolled (cold-reduced) flat-rolled carbon-quality steel products. For a full description of the scope of this investigation, as well as a complete discussion of all scope exclusion requests submitted in the context of the on-going cold-rolled steel investigations, see the "Scope Appendix" attached to the *Notice of Preliminary Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products from Argentina*, 67 FR 31181 (May 9, 2002).

#### Amended Preliminary Determination

We are amending the preliminary determination of the antidumping duty investigation of certain cold-rolled carbon steel flat products from Turkey to reflect the correction of the above-cited ministerial errors. The revised preliminary weighted-average dumping margins are as follows:

Manufacturer/Exporter	Weighted-Average Margin
Borcelik Celik Sanayii ve Ticaret A.S. (Borcelik)	7.70 %
All Others .....	7.70 %

#### Suspension Of Liquidation

In accordance with section 735(c)(1)(B) of the Tariff Act, we are directing the United States Customs Service (Customs) to continue suspending liquidation on all imports of the subject merchandise from Turkey. Customs shall require a cash deposit or

the posting of a bond equal to the weighted-average amount by which normal value exceeds the export price as indicated in the chart above. These suspension-of-liquidation instructions will remain in effect until further notice.

#### ITC Notification

In accordance with section 735(d) of the Tariff Act, we have notified the International Trade Commission of our amended preliminary determination.

This determination is issued and published in accordance with section 733(f) and 777(i)(1) of the Tariff Act of 1930, as amended.

Dated: June 12, 2002

#### Notice of Amended Final Determination of Sales at Less Than Fair Value: Structural Steel Beams from the Russian Federation

**AGENCY:** Import Administration, International Trade Administration, U.S. Department of Commerce.

**ACTION:** Notice of Amended Final Determination of Sales at Less Than Fair Value.

**EFFECTIVE DATE:** June 19, 2002.

**SUMMARY:** We published in the Federal Register our final determination for the investigation of structural steel beams from the Russian Federation on May 20, 2002. We are amending our final determination to correct a ministerial error.

**FOR FURTHER INFORMATION CONTACT:** Hermes Pinilla or Richard Rimlinger, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-3477 or (202) 482-4477, respectively.

#### SUPPLEMENTARY INFORMATION:

##### The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("the Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations

to the Department of Commerce's ("Department's") regulations are references to 19 CFR Part 351 (April 2001).

#### Background

On May 13, 2002, the Department determined that structural steel beams from the Russian Federation are being, or are likely to be, sold in the United States at less than fair value (67 FR 35490; May 20, 2002).

We disclosed our calculations for the final determination to counsel for petitioners, the Committee for Fair Beam Imports, on May 17, 2002, and to counsel for Nizhny Tagil Iron and Steel Works (Tagil) on May 15, 2002.

On May 23, 2002, we received a submission, timely filed pursuant to 19 CFR 351.224(c)(2), from the petitioners alleging a ministerial error in the Department's final determination. In its submission, the petitioners requested that this error be corrected and an amended final determination be issued reflecting this change.

#### Scope of Investigation

The scope of this investigation covers doubly-symmetric shapes, whether hot- or cold-rolled, drawn, extruded, formed or finished, having at least one dimension of at least 80 mm (3.2 inches or more), whether of carbon or alloy (other than stainless) steel, and whether or not drilled, punched, notched, painted, coated, or clad. These structural steel beams include, but are not limited to, wide-flange beams ("W" shapes), bearing piles ("HP" shapes), standard beams ("S" or "I" shapes), and M-shapes. All the products that meet the physical and metallurgical descriptions provided above are within the scope of this investigation unless otherwise excluded. The following products are outside and/or specifically excluded from the scope of this investigation: (1) Structural steel beams greater than 400 pounds per linear foot, (2) structural steel beams that have a web or section height (also known as depth) over 40 inches, and (3) structural steel beams that have additional weldments, connectors, or attachments to I-sections, H-sections, or pilings; however, if the only additional weldment, connector or attachment on the beam is a shipping brace attached to maintain stability during transportation, the beam is not removed from the scope definition by reason of such additional weldment, connector, or attachment.

The merchandise subject to this investigation is currently classified in the *Harmonized Tariff Schedule of the United States* (HTSUS) at subheadings 7216.32.0000, 7216.33.0030,
