Submission for OMB Review: **Comment Request**

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau. Title: Current Population Survey, October 2002 School Enrollment Supplement.

 \overline{Form} Number(s): None. Agency Approval Number: 0607-

Type of Request: Revision of a currently approved collection.

Burden: 4,275 hours.

Number of Respondents: 57,000. Avg Hours Per Response: 4 minutes and 30 seconds.

Needs and Uses: The Census Bureau requests OMB clearance for the

supplemental inquiry concerning school enrollment to be conducted in conjunction with October 2002 Current Population Survey (CPS) interviewing. Selected items which monitored changes in the types of vocational education have been removed since the supplement was last conducted in 2001 and new items have been added to investigate the fields of study for postsecondary degrees and the use of public

This data series has existed for 40 years and provides basic information on enrollment status of various segments of the population necessary as background for policy formation and implementation. The CPS October supplement is the only annual source of data on public/private elementary and secondary school enrollment and characteristics of private school students and their families, which are used for tracking historical trends and for policy planning and support. It is the only source of national data on the age distribution and family characteristics of college students and the only source of demographic data on preprimary school enrollment. As part of the federal government's efforts to collect data and provide timely information to local governments for policymaking decisions, this survey provides national trends in enrollment and progress in

Form Number(s): M311H, M311L, M311M, M311N, M336G, MQ313D, MQ313T, MA311D, MA315D, MA327E, MA333D, MA333F, MA333N, MA334P, MA334R and MA335L.

Agency Approval Number: 0607-

Type of Request: Revision of a Currently approved collection. Burden: 10,274 hours. Number of Respondents: 5,995.

Avg Hours Per Response: 1.7 hours. Needs and Uses: The Census Bureau conducts a series of monthly, quarterly, and annual surveys as part of the Current Industrial Reports (CIR) program. The CIR program focuses primarily on the quantity and value of shipments of particular products and occasionally with data on production and inventories; unfilled orders, receipts, stocks and consumption; and comparative data on domestic production, exports, and imports of the products they cover. Primary users of these data are Government agencies, business firms, trade associations, and private research and consulting organizations. The Federal Reserve Board uses CIR data in its monthly

index of industrial production as well as its annual revision to the index. The Bureau of Economic Analysis (BEA) and the Bureau of Labor Statistics (BLS) use the CIR data in the estimate of components of gross domestic product (GDP) and the estimate of output for productivity analysis, respectively. Many Government agencies, such as the International Trade Commission, Department of Agriculture, Food and Drug Administration, Department of Energy, Federal Aviation Administration, BEA, and International Trade Administration, use the data for industrial analysis, projections, and monitoring import penetration. Private business firms and organizations use the data for trend projections, market analysis, product planning, and other

the CIR surveys are divided into "waves." There are three waves that include the mandatory and voluntary surveys. Mandatory and voluntary surveys are divided into separate clearance requests, making six separate clearances. We are now combining the mandatory and voluntary surveys from each wave into one clearance request, reducing the total number of clearance requests from six to three. Therefore, we are incorporating the burden hours currently contained in 0607–0776 into this request and discontinuing that clearance.

Also in this request, we are changing the reporting status of the following voluntary annual surveys to mandatory since they provide detailed commodity data for the 2002 Economic Census. They are MA311D, "Confectionery", MA333N, "Fluid Power Products", and MA335L, "Electric Lighting Fixtures". We are moving the following surveys from another wave into this wave because of changes in survey content. They are M311H, "Animal & Vegetable Fats and Oil (Warehouse Stocks)" M311L, "Fats and Oils (Rendered)", M311M, "Animal & Vegetable Fats and Oil (Consumption and Stocks)", M311N, "Animal & Vegetable Fats and Oil (Production, Consumption, and Stocks)", and MA334R, "Computers and Office and Accounting Machines". Due to a lack of funding, we are discontinuing MA333J, "Selected Pollution Control Equipment" and MA333U, "Coin-Operated Vending Machines." More details concerning these changes are included in Question

Affected Public: Businesses or other for-profit.

Frequency: Monthly, quarterly, and annually.

Respondent's Obligation: Monthly and Quarterly collections are typically voluntary; Annual collections (including counterpart collections) are mandatory.

Foreign-Trade Zones Board

[Docket 29-2002]

Foreign-Trade Zone 20—Newport News, Application for Subzone, Canon Virginia, Inc. (Computer Printers and Related Products), Newport News, VA

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Virginia Port Authority, grantee of FTZ 20, requesting special-purpose subzone status for the computer printer and related products manufacturing plant of Canon Virginia, Inc. (Canon) in Newport News, Virginia. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on July 2, 2002.

Canon's Newport News plant is comprised of two sites in Newport News, Virginia: *Site 1* (165.60 acres currently, with 782,793 square feet with a possible expansion of 800,000 square feet) is located at 12000 Canon Blvd., Newport News; and *Site 2* (21.07 acres with 125,000 square feet) located at 120 Enterprise Drive, Newport News, Virginia.

The facility (1,400 employees) produces computer printers (HTSUS 8471, duty-free), and related products such as toner cartridges (HTSUS 8473, duty-free), toner drums (HTSUS 9009, duty-free), and toner (HTSUS 9009, duty-free and 3707, 6.5%). The company also remanufactures and refurbishes photocopying machines (HTSUS 9009, duty-free-3.7%) and bubble jet printers (HTSUS 8471, dutyfree) and may include other Canon products such as scanners, facsimile machines, calculators, medical equipment, regular and digital cameras, video camcorders and broadcasting equipment in the future.

Foreign-sourced materials will account for some 50–70 percent of finished product value, and include items from the following general categories: mineral oils, inorganic acids, iron oxides, titanium oxides, sulfates, salts of oxometallic acid, ethers, amine

function compounds, diazo compounds, organic derivatives of hydrazine, other organic compounds, synthetic organic coloring matter, paints, artificial waxes, prepared glues and adhesives, toners, prepared rubber accelerators, organic composite solvents, prepared binders, polymers of propylene/styrene/vinyl chloride/vinyl acetate, acrylic polymers, polyacetals, polyamides, amino-resins, silicones, self-adhesive plates of plastics, plastic lids, other articles of plastics, articles of unvulcanized and vulcanized rubber, belts, packing cases, uncoated paper, cartons, paper, printed booklets and leaflets, synthetic monofilaments, cleaning seals, glass spheres, stainless steel wire, fasteners, copper springs, articles of copper, tungsten, base fittings, metal office fasteners, fans, filtering apparatus, automatic data processing machines, molding boxes, valves, ball or roller bearings, shafts, gears, pulleys, electric motors, electrical transformers, electromagnets, batteries, electrical resistors, electrical apparatus for switching, electrical lamps, diodes, transistors, electronic integrated circuits, insulated wire and cable, insulated fittings, lenses, photocopying apparatus, counters, typewriter ribbons, ink pads, and testing and controlling instruments

Zone procedures would exempt Canon from Customs duty payments on foreign materials used in production for export. Some 15 percent of the plant's shipments are exported. On domestic sales, the company would be able to choose the duty rates that apply to the finished products (primarily duty-free and some at 3.7%) rather than the duty rates that would otherwise apply to the foreign-sourced materials noted above (duty-free to 9 percent, weighted average 5.6%). The application indicates that the savings from zone procedures will help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at one of the following addresses:
