[Docket No. PA02-1-000]

#### Operational Audit of the California Independent System Operator; Notice of Filing and Request for Comments

January 25, 2002.

Take notice that on January 25, 2002, Vantage Consulting, Inc. filed a report entitled Operational Audit of the California Independent System Operator (Audit Report). The filing is in response to a Commission request for a proposal, dated October 9, 2001, to perform an operational audit of the California Independent System Operator Corporation (ISO). The Audit Report makes recommendations to the Commission with respect to prospective improvements in California markets, including what improvements could help the ISO in effectively performing

its increasing responsibilities. The Audit Report states that the list of recommendations contained in Section I.C. of the Audit Report is comprehensive and that it would be almost impossible to simultaneously implement all the recommendations over the same time frame. Copies of the Audit Report are available for public inspection at the Commission in the above-docketed proceeding. The Audit Report is also available on the Internet at [www.ferc.gov/electric/bulkpower.htm](http://www.ferc.gov/electric/bulkpower.htm).

We invite written comments on the Audit Report's list of specific recommendations set forth in Section I.C. Commenters are to state which of the recommendations, if any, they believe should be adopted and to prioritize those specific recommendations. Commenters also are to discuss an appropriate time frame for implementation of those recommendations that they believe should be adopted.

Comments are to be filed on two dates. The ISO is to file its comments on or before February 15, 2002. All other comments are to be filed on or before March 1, 2002. The latter may respond to the ISO's comments, in addition to commenting on the Audit Report as specified in the preceding paragraph.

Comments must contain an executive summary and must be no longer than 20 pages. To the extent possible, comments should be jointly filed by entities sharing similar views. Comments may be filed on paper or electronically via the Internet. Those filing electronically do not need to make a paper filing. For paper filings, the original and 14 copies of such comments should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington DC 20426 and should refer to Docket No. PA02-1-000.

Comments filed via the Internet must be prepared in WordPerfect, MS Word, Portable Document Format, or ASCII format. To file the document, access the Commission's Web site at [www.ferc.gov](http://www.ferc.gov) and click on "e-Filing," and then follow the instructions. First time users will have to establish a user name and password. The Commission will send an automatic acknowledgment to the sender's e-Mail address upon receipt of comments.

User assistance for electronic filing is available at 202-208-0258 or by e-Mail to [efiling@ferc.gov](mailto:efiling@ferc.gov). Comments should not be submitted to the e-Mail address. All comments will be placed in the Commission's public files and will be available for inspection in the Commission's Public Reference Room at 888 First Street, NE, Washington DC

20426, during regular business hours. Additionally, all comments may be viewed, printed, or downloaded remotely via the Internet through FERC's home page using the RIMS link. User assistance for RIMS is available at 202-208-2222, or by e-mail to [RimsMaster@ferc.gov](mailto:RimsMaster@ferc.gov).

If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

**IV. What Action is EPA Taking in this Notice?**

EPA is making available for public viewing the revised risk assessments, which include some new information not available at the time of the preliminary risk assessments, and related documents for the organochlorine pesticide, lindane. These documents have been developed as part of the pilot public participation process that EPA and USDA are now using for involving the public in the reassessment of pesticide tolerances under the Food Quality Protection Act (FQPA), and the reregistration of individual pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The pilot public participation process was developed as part of the EPA-USDA Tolerance Reassessment Advisory Committee (TRAC), which was established in April 1998, as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation process is to find a more effective way for the public to participate at critical junctures in the Agency's development of organophosphate and certain other non-organophosphate pesticide risk assessments and risk management decisions. EPA and USDA began implementing this pilot process in August 1998, to increase transparency and opportunities for stakeholder consultation. The documents being released to the public through this notice provide some new information on the human health effects of lindane, and information on the revisions that were made to the lindane preliminary risk assessments, which were released to the public August 29, 2001 (66 FR 45677) (FRL-6783-8), through a notice in the **Federal Register**.

In addition, this notice starts a 60-day public participation period during which the public is encouraged to submit comments on the new information not available previously during the earlier public comment period for the lindane preliminary risk assessment, and risk management proposals or other comments on risk management for lindane. The Agency is providing an opportunity, through this

notice, for interested parties to provide written comments on the new lindane health effects information as well as risk management proposals or ideas on lindane. Such comments and proposals could address ideas about how to manage dietary, occupational, or ecological risks on specific lindane use sites or crops across the United States or in a particular geographic region of the country. To address dietary risk, for example, commenters may choose to discuss the feasibility of lower application rates, increasing the time interval between application and harvest ("pre-harvest intervals"), modifications in use, or suggest alternative measures to reduce residues contributing to dietary exposure. For occupational risks, commenters may suggest personal protective equipment or technologies to reduce exposure to workers and pesticide handlers. For ecological risks, commenters may suggest ways to reduce environmental exposure, e.g., exposure to birds, fish, mammals, and other non-target organisms. All comments and proposals must be received by EPA on or before April 1, 2002 at the addresses given under Unit III.A. Comments and proposals will become part of the Agency record for the pesticide specified in this notice.

### Great Western Aviation, Inc. and Utah Jet Center, LLC

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice.

**SUMMARY:** In this document, the FCC consolidates the proceeding of Great Western Aviation and Utah Jet Center LLC., application for renewal of aeronautical advisory (unicom) station KQA7 in Logan, Utah. This consolidation allows both parties to have a comparative hearing. This gives the commission an opportunity to determine which applicant would

provide the public with better unicom service.

**ADDRESSES:** Please file notifications of availability with the Secretary, of the Federal Communications Commission, Room 1-C804, 445 Twelfth Street, SW., Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Roberto Mussendenn., Wireless Telecommunications Bureau, at (202) 418-1428.

The full text may also be downloaded at: www.fcc.gov. Alternative formats are available to persons with disabilities by contacting Martha Contee at (202) 418-0260 or TTY (202) 418-2555.

On November 24, 2000, Great Western Aviation, Inc. (Great Western) filed an application for renewal of aeronautical advisory (unicom) station KQA7 in Logan, Utah. Unicom stations provide information concerning flying conditions, weather, availability of ground services, and other information to promote the safe and expeditious operation of aircraft. On December 7, 2000, Utah Jet Center, LLC (Utah Jet Center) filed an application for a new unicom station at the same location. Both applicants propose to provide service at Logan-Cache Airport, where there is no control tower or FAA flight service station. Under § 87.215(b) of the Commission's rules, only one unicom station may be licensed at such airports. Accordingly, these applications are mutually exclusive and must therefore be designated for comparative hearing.
