## DEFENSE SECURITY COOPERATION AGENCY

WASHINGTON, DC 20301-2800

22 JUL 2002

In reply refer to:  
I-02/009500

The Honorable J. Dennis Hastert  
Speaker of the House of  
Representatives  
Washington, D.C. 20515-6501

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act (AECA), as amended, we are forwarding herewith Transmittal No. 02-45 and under separate cover the classified offset certificate thereto. This Transmittal concerns the Department of the Army's proposed Letter(s) of Offer and Acceptance (LOA) to Australia for defense articles and services estimated to cost \$106 million. Soon after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Reporting of Offset Agreements in accordance with Section 36(b)(1)(C) of the Arms Export Control Act (AECA), as amended, requires a description of any offset agreement with respect to this proposed sale. Section 36(g) of the AECA, as amended, provides that reported information related to offset agreements be treated as confidential information in accordance with section 12(c) of the Export Administration Act of 1979 (50 U.S.C. App. 2411(c)). Information about offsets for this proposed sale is described in the enclosed confidential attachment.

Sincerely,

A handwritten signature in cursive script, reading "Richard J. Millies", is positioned above the printed name and title.

Richard J. Millies  
Acting Director

## Transmittal No. 02-45

Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act, as amended

- (i) **Prospective Purchaser:** Australia
- (ii) **Total Estimated Value:**

Major Defense Equipment*	\$ 85 million
Other	\$ <u>21 million</u>
TOTAL	\$106 million
- (iii) **Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:** up to 92 JAVELIN anti-tank missile systems (consisting of up to 92 JAVELIN command launch units, up to 666 JAVELIN missile rounds, and 10 lot acceptance missiles), simulators, support equipment, spare and repair parts, publications and technical data, personnel training and equipment, U.S. Government and contractor engineering and logistics personnel services, a Quality Assurance Team, and other related elements of logistics support.
- (iv) **Military Department:** Army (ZYH)
- (v) **Prior Related Cases, if any:** none
- (vi) **Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:** none
- (vii) **Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:** See Annex attached
- (viii) **Date Report Delivered to Congress:** 22 JUL 2002

\* as defined in Section 47(6) of the Arms Export Control Act.

### **POLICY JUSTIFICATION**

#### **Australia – JAVELIN Anti-tank Missile Systems**

In support of a proposed Australia open tender competition, the Government of Australia has requested a possible sale of up to 92 JAVELIN anti-tank missile systems (consisting of up to 92 JAVELIN command launch units, up to 666 JAVELIN missile rounds, and ten lot acceptance missiles), simulators, support equipment, spare and repair parts, publications and technical data, personnel training and equipment, U.S. Government and contractor engineering and logistics personnel services, a Quality Assurance Team, and other related elements of logistics support. The estimated cost is up to \$106 million.

If down-selected by Australia, the proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of an ally which has been and continues to be an important force for political stability and economic progress in the Asia Pacific region.

If this system is down-selected, Australia will use these JAVELIN anti-tank missile systems to enhance their direct fire capability for infantry, cavalry and commando units against armored vehicles, buildings and field fortifications. This system will provide Australia with a strong man-portable direct fire capability and will increase interoperability with U.S. forces. Australia will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor, if selected, will be JAVELIN Joint Venture (Raytheon and Lockheed Martin) of Orlando, Florida. One or more proposed offset agreements may be related to this proposed sale.

Implementation of this proposed sale will require the assignment of a U.S. Government Quality Assurance Team or two U.S. Government and one contractor representatives to Australia for one week to assist in the delivery and deployment of the missiles.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale if down-selected.

## Transmittal No. 02-45

**Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act**

**Annex  
Item No. vii**

**(vii) Sensitivity of Technology:**

1. The JAVELIN anti-tank missile system provides a man-portable, medium anti-tank capability to infantry, scouts, and combat engineers. JAVELIN is comprised of two major components; a reusable command launch unit (CLU) and a missile sealed in a disposable launch tube assembly. The CLU incorporates an integrated day/night sight and provides target engagement capability in adverse weather and countermeasure environments. The CLU may also be used in the stand-alone mode for battlefield surveillance and target detection. JAVELIN's key technical feature is the use of fire-and-forget technology that allows the gunner to fire and immediately take cover. Additional special features are the top attack and/or direct fire modes (for targets under cover), integrated day/night sight, advanced tandem warhead, imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Australia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
