

state regulatory agencies. Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's rules and regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at <http://www.ferc.gov> using the "RIMS" link, select "Docket#" and follow the instructions (call 202-208-2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2232-407, North Carolina]

Duke Energy Corporation; Notice of Availability of Environmental Assessment

July 26, 2002.

An environmental assessment (EA) is available for public review. The EA analyzes the environmental impacts of Duke Energy Corporation's (Duke) application to grant a non-project use of project land to Charlotte-Mecklenburg Utilities Department (CMUD) to increase its raw water withdrawal, in Mountain Island Lake, a reservoir for the Catawba-Wateree Hydroelectric Project. Duke's proposed grant would also allow York to withdrawal up to 330 million gallons of water per day. The Catawba-Wateree Project is on the Catawba River in Lancaster, York, and Fairfield Counties, South Carolina, and Gaston, Lincoln, and Burke Counties, North Carolina.

The EA was prepared by staff in the Office of Energy Projects, Federal Energy Regulatory Commission. In the EA, Commission staff conclude that

approving Duke's application to grant the use would not constitute a major federal action significantly affecting the quality of the human environment. The EA may be viewed on the Commission's web site at <http://www.ferc.gov> using the "RIMS" link, select "Docket #" and follow the instructions (call 202-208-2222 for assistance). Copies are also available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington DC 20426, or by calling (202) 208-1371.

Linwood A. Watson, Jr.,

Deputy Secretary.

[Docket Nos. CP02-116-000 and CP02-117-000]

Tennessee Gas Pipeline Company; Notice of Availability of the Environmental Assessment for the Proposed South Texas Expansion Project

July 26, 2002.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Tennessee Gas Pipeline Company (Tennessee) in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of the South Texas Expansion Project including:

- About 9.28 miles of a 30-inch-diameter lateral in Hidalgo County, Texas;
- A new meter station near the terminus of the new lateral in Hidalgo, Texas;
- About 7.58 miles of a 24-inch-diameter loop of Tennessee's existing Donna Line in Hidalgo County, Texas;
- A new 9,470 horsepower compressor station in Hidalgo County, Texas; and
- Minor modifications of Tennessee's existing Compressor Station 1 located in

Nueces County, Texas, and existing Compressor Station 9 located in Victoria County, Texas.

Tennessee's proposed project also includes a border crossing facility at the International Boundary between the United States in Hidalgo County, Texas and Mexico in the State of Tamaulipas, which would consist of a 1,800-foot-long segment of 30-inch-diameter pipeline. The primary purpose of the South Texas Expansion Project is to provide up to 320,000 Decatherms per day of natural gas to a developing power generation complex located in the Northern Mexico Municipalities of Rio Bravo and Valle Hermoso, Tamaulipas.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference and Files Maintenance Branch, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 208-1371.

Copies of the EA have been mailed to Federal, state and local agencies, public interest groups, interested individuals, newspapers, and parties to this proceeding.

Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your comments to: Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426;
- Label one copy of the comments for the attention of the Gas Branch 1, PJ11.1.
- Reference Docket Nos. CP02-116-000 and CP02-117-000; and
- Mail your comments so that they will be received in Washington, DC on or before August 26, 2002.

Please note that we are continuing to experience delays in mail deliveries from the U.S. Postal Service. As a result, we will include all comments that we receive within a reasonable time frame in our environmental analysis of this project. However, the Commission encourages electronic filing of any comments or interventions or protests to this proceeding. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at <http://www.ferc.gov> under the "e-Filing" link and the link to the User's Guide. Before you can file comments you will need to create a free account which can be

created by clicking on "Login to File" and then "New User Account."

Comments will be considered by the Commission but will not serve to make the commentor a party to the proceeding. Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.214).¹ Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your comments considered.

Additional information about the proposed project is available from the Commission's Office of External Affairs, at (202) 208-1088 or on the FERC Internet website (www.ferc.gov) using the "RIMS" link to information in this docket number. Click on the "RIMS" link, select "Docket #" from the RIMS Menu, and follow the instructions. For assistance with access to RIMS, the RIMS helpline can be reached at (202) 208-2222.

Similarly, the "CIPS" link on the FERC Internet website provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings. From the FERC Internet website, click on the "CIPS" link, select "Docket #" from the CIPS menu, and follow the instructions. For assistance with access to CIPS, the CIPS helpline can be reached at (202) 208-2222.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM01-12-000]

Electricity Market Design and Structure; Notice of Intent To Prepare an Environmental Assessment and Request for Comments on the Scope of Issues to be Addressed for the Proposed Rulemaking on Electricity Market Design and Structure

July 26, 2002.

1. The staff of the Federal Energy Regulatory Commission ("FERC" or "Commission") will prepare an environmental assessment to address the environmental impacts of the Commission's Proposed Rulemaking on Electric Market Design and Structure.

2. The Commission anticipates issuing the proposed rulemaking on July 31, 2002. This represents the third of a series of initiatives undertaken by the Commission to harness the benefits of competitive markets for the nation's electric energy customers, in order to meet its statutory responsibility to assure adequate and reliable supplies of electric energy at a just and reasonable price. The Commission's objectives in this third rulemaking initiative are to establish a standardized transmission service and wholesale electric market design that will provide a non-discriminatory level playing field for all entities that seek to participate in wholesale electric markets.

The Commission proposes to provide new choices through a flexible transmission service, promote efficient grid operations, establish a market design that minimizes the opportunities for market manipulation and gaming, mitigate market power and provide the right pricing signals for investment in transmission and generation facilities, as well as investment in demand reduction.

3. *The EA Process:* The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from the issuance of a rulemaking. NEPA also requires the Commission to discover and address concerns the public may have about proposed federal actions. This process is referred to as "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local

government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern. The EA will discuss impacts that could occur as a result of implementation of the proposed rulemaking.

4. We will also evaluate possible alternatives to the proposal or portions of the proposal, and make recommendations on how to lessen or avoid environmental impacts. Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected industry representatives, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

5. To ensure your comments are considered, please carefully follow the instructions in the public participation section below.

6. *Currently Identified Environmental Issues:* We have already examined the likely environmental effects of establishing competitive wholesale markets for electric power in an Environmental Impact Statement for Order No. 888 (Docket Nos. RM95-8-000 and RM94-7-001) and an Environmental Assessment for Order No. 2000 (Docket No. RM99-2-000). We intend to focus this assessment on any relevant changes that may have arisen since those other two studies, effects that particular aspects of Standard Market Design may have, and environmental effects not contemplated earlier.

7. *Public Participation:* You can provide us with specific comments or concerns about the proposal. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded.

8. Send an original and two copies of your letter to: Magalie R. Salas, Secretary, Federal Energy Regulatory

¹ Interventions may also be filed electronically via the Internet in lieu of paper. See the previous discussion on filing comments electronically.
