

Dated: July 30, 2002.

**Patricia L. Toppings,**

*Alternate OSD Federal Register Liaison  
Officer, Department of Defense.*

#### **A0040-5a DASG**

##### **SYSTEM NAME:**

DoD Health Surveillance/Assessment Registries.

##### **SYSTEM LOCATION:**

U.S. Army Center for Health Promotion and Prevention Medicine, 5158 Blackhawk Road, Aberdeen Proving Ground, MD 21010-5403; and Army Medical Surveillance Activity, Building T-20, Room 213, 6900 Georgia Avenue, NW, Washington, DC 20307-5001.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM: ANY INDIVIDUAL THAT PARTICIPATES IN A DOD HEALTH SURVEY.**

##### **CATEGORIES OF RECORDS IN THE SYSTEM:**

Information in this system of records originates from health surveys/assessments (e.g., Pentagon Post Disaster Health Assessment) conducted by or for the Department of Defense. Records being maintained include individual's name, Social Security Number, date of birth, sex, branch of service, home address, age, medical treatment facility, condition of medical and physical health and capabilities, responses to survey questions, register number assigned, and similar records, information and reports, relevant to the various registries, (e.g., cancer, Human Immunodeficiency Virus (HIV), serum repository).

##### **AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301, Departmental Regulations; 10 U.S.C. 136, Under Secretary of Defense for Personnel and Readiness; 10 U.S.C. 3013, Secretary of the Army, 10 U.S.C. 8013, Secretary of the Air Force, 10 U.S.C. 5013, Secretary of the Navy; DoD Instruction 1100.13, Surveys of DoD Personnel; DoD Directive 6490.2, Joint Medical Surveillance; DoD Directive 6490.3, Implementation and Application of Joint Medical Surveillance for Deployments; and E.O. 9397 (SSN).

##### **PURPOSE(S):**

To record, store and document injury, illness and exposure to chemical/biochemical elements, and collect data for statistical purposes. To enhance efficient management practices and effective analysis and comparisons of statistical data utilized in the public health assessment data registry.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: In

addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

The DoD 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of systems of records notices also apply to this system.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

##### **STORAGE:**

Paper records in file folders and electronic storage media.

##### **RETRIEVABILITY:**

Information is retrieved by individual's name, Social Security Number, and registry number.

##### **SAFEGUARDS:**

Records are maintained within secured buildings in areas accessible only to persons having official need, and who therefore are properly trained and screened. Automated segments are protected by controlled system passwords governing access to data.

##### **RETENTION AND DISPOSAL:**

Records are destroyed when no longer needed for reference and for conducting business.

##### **SYSTEM MANAGER(S) AND ADDRESS:**

Commander, U.S. Army Center for Health Promotion and Prevention Medicine, 5158 Blackhawk Road, Aberdeen Proving Ground, MD 21010-5403.

##### **NOTIFICATION PROCEDURE:**

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Commander, U.S. Army Center for Health Promotion and Prevention Medicine, 5158 Blackhawk Road, Aberdeen Proving Ground, MD 21010-5403.

For verification purposes, individual should provide the full name, Social Security Number, details which will assist in locating record, and signature.

##### **RECORD ACCESS PROCEDURES:**

Individuals seeking access to information about themselves contained in this system should address written inquiries to the Commander, U.S. Army Center for Health Promotion and Prevention Medicine, 5158 Blackhawk Road, Aberdeen Proving Ground, MD 21010-5403.

For verification purposes, individual should provide the full name, Social

Security Number, details which will assist in locating record, and signature.

##### **CONTESTING RECORD PROCEDURES:**

The Army's rules for accessing records, and for contesting contents and appealing initial agency determinations are contained in Army Regulation 340-21; 32 CFR part 505; or may be obtained from the system manager.

##### **RECORD SOURCE CATEGORIES:**

From the individual and mortality reports.

##### **EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

**BILLING CODE 5001-08-P**

## **DEPARTMENT OF DEFENSE**

### **Department of the Army; Corps of Engineers**

#### **Intent To Prepare a Draft Environmental Impact Statement for the Lake Okeechobee Watershed Project**

**AGENCY:** Department of the Army, U.S. Army Corps of Engineers, DoD.

**ACTION:** Notice of intent.

**SUMMARY:** The U.S. Army Corps of Engineers (Corps), Jacksonville District, intends to prepare an integrated Project Implementation Report/Draft Environmental Impact Statement (PIR/DEIS) for the Lake Okeechobee Watershed Project. The study is a cooperative effort between the Corps and the South Florida Water Management District (SFWMD), which is also a cooperating agency for this DEIS. One of the recommendations of the final report of the Central & South Florida (C&SF) Comprehensive Review Study (Restudy) was the implementation of the Lake Okeechobee Watershed Project. This project is intended to improve the water quality of Lake Okeechobee and its tributaries by capturing and treating surface water discharges into the watershed, while managing optimal water levels necessary to improve the habitats within the lake and downstream bodies. This project is a component of the Comprehensive Everglades Restoration Plan, a multi-year effort to restore the greater Everglades ecosystem while providing water supply and other water-related benefits to South Florida over many decades.

**FOR FURTHER INFORMATION CONTACT:** Mr. Brad Tarr, U.S. Army Corps of Engineers, Planning Division, Environmental Branch, P.O. Box 4970,

Jacksonville, FL, 32232-0019, by e-mail [bradley.a.tarr@usace.army.mil](mailto:bradley.a.tarr@usace.army.mil), or by telephone at 904-232-3582.

**SUPPLEMENTARY INFORMATION:**

a. *Authorization:* The authority for this project is contained within the Water Resources Development Act (WRDA) 2000. The "Design Agreement between the Department of the Army and the SFWMD for the Design of Elements of the Comprehensive Plan for the Everglades and South Florida Ecosystem Restoration Project" contains additional guidance.

b. *Study Area:* Lake Okeechobee lies 30 miles west of the Atlantic Ocean and 60 miles east of the Gulf of Mexico, in the central part of the Florida peninsula. The Lake is approximately 730 square miles, and is the principal natural reservoir in south Florida. The study area includes portions of St. Lucie, Martin, Okeechobee, Glades, and Hendry Counties.

c. *Project Scope:* The Lake Okeechobee Watershed Project includes four separable elements including; North of Lake Okeechobee Storage Reservoir, Taylor Creek/Nubbin Slough Storage and Treatment Area, Lake Okeechobee Watershed Quality Treatment Facilities, and Lake Okeechobee Tributary Sediment Dredging. The Restudy recommends the construction of 14,375 acres of reservoir-assisted stormwater treatment areas, a 17,500 acre reservoir with a 2,500 acre stormwater treatment area (providing up to 210,000 acre-feet of storage), the removal of 150 tons of phosphorus from tributaries, and the restoration of approximately 3,500 acres of wetlands.

The objectives of the project are to improve the water quality of inflows to Lake Okeechobee, store excess water to allow for better management of Lake Okeechobee water levels and reduce damaging fresh water releases to the Caloosahatchee estuary and the St. Lucie estuary, and restore several wetlands in the basins. Wet season runoff from the watershed north of the Lake will be attenuated by reservoirs and restored wetlands. The increased storage capacity in these basins will reduce the duration and frequency of both extreme high and low water levels in the Lake that are stressful to the Lake's littoral zone and ecosystem and will reduce large discharges from the Lake that damage the downstream estuarine ecosystems. Runoff from the basins will be diverted to stormwater treatments areas to reduce phosphorus loading to the Lake.

The study will evaluate alternatives based on their ability to improve water

deliveries to the natural system, protect and conserve water resources, improve water quality, protect or restore fish and wildlife and their associated habitat, restore and manage wetland and associated upland ecosystems, sustain economic and natural resources, and other performance criteria being developed by the Project Delivery Team.

d. *Preliminary Alternatives:* Formulation of alternative plans will involve the selection of the most suitable locations, sizes, depths, and configurations of facilities through detailed planning and design.

The Environmental Impact Statement (EIS) will include an evaluation of adverse environmental impacts, including but not limited to, water quality, socio-economic, archaeological and biological. In addition to adverse impacts, the evaluation will also focus on how well the plans perform with regard to specific performance measures.

e. *Issues:* The EIS will address the impacts of capturing and holding excess water in large storage areas during wet periods and the subsequent release for later use during dry periods into stormwater treatment areas.

The EIS will also address environmental issues: water quality; impacts to the estuaries; flood protection; aesthetics and recreation; fish and wildlife resources, including protected species; cultural resources; and other impacts identified through scoping, public involvement, and interagency coordination.

f. *Scoping:* A scoping letter and public workshops will be used to invite comments on alternatives and issues from Federal, State, and local agencies, affected Indian tribes, and other interested private organizations and individuals. The next public workshop is scheduled for 13 August 2002, at the Okeechobee Freshman Campus Auditorium, on 700 SW., Avenue, Okeechobee, Florida. The meeting will begin at 6 p.m. and continue to 9 p.m.

Other public meeting will be held over the course of the study; the exact location, dates, and times will be announced in public notices and local newspapers.

g. *DEIS Preparation:* The integrated draft PIR, which will include a DEIS, is currently scheduled for publication in November 2005.

Dated: February 2, 2002.

**James C. Duck,**  
Chief, Planning Division.

**DEPARTMENT OF DEFENSE**

**Department of the Army; Corps of Engineers**

**Availability of the Draft Environmental Impact Statement for the Centralia Flood Reduction Project, Lewis County, WA**

**AGENCY:** Department of the Army, U.S. Army Corps of Engineers, DoD.

**ACTION:** Notice of availability.

**SUMMARY:** Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, as amended, the U.S. Army Corps of Engineers (USACE), Seattle District has prepared a Draft Environmental Impact Statement (DEIS) examining the impacts of feasible structural and nonstructural alternatives to reduce flood damage within Lewis County, WA.

The alternatives initially considered included: (1) No action; (2) modifications to Skookumchuck Dam; (3) overbank excavation and flow-way bypass at various locations; (4) construction of a flood levee system; (5) upstream flow-restriction structures and upstream flood-water storage; (6) non-structural flood control measures including watershed management, flood-proofing structures, developing evacuation plans, and removal of certain structures from the floodplain; and (7) a variety of flood control, regulatory, and planning measures developed by an interagency committee. After initial screening of the above alternatives for engineering feasibility, economic justification, environmental effects and other criteria, four were carried forward for detailed analysis: (1) Alternative #3 combined with alternative #2 (specifically Centralia overbank excavation and Chehalis SR6 flow-way bypass with modifications to Skookumchuck Dam); (2) alternative #4 combined with modifications to Skookumchuck Dam (preferred alternative); (3) alternative #7 combined with modifications to Skookumchuck Dam; and (4) no action.

**DATES:** The comment period for this DEIS is 45 days from the date of publication in the **Federal Register** or September 18, 2002, whichever is later.

**ADDRESSES:** Comments may be submitted to the attention of: Mr. George A. Hart, Environmental Coordinator, U.S. Army Corps of Engineers, P.O. Box 3755, Seattle, WA 98124-3755; Fax: (206) 764-4470, or e-mail [george.a.hart@usace.army.mil](mailto:george.a.hart@usace.army.mil).

**FOR FURTHER INFORMATION CONTACT:** Mr. George A. Hart at the above address, e-mail, or telephone (206) 764-3641.
