

rulings that have the force and effect of law. Consequently, the most stringent OMB quality standards for transparency of documentation and reproducibility of results are unlikely to apply to the dissemination of information by the National Endowment for the Humanities. Nevertheless, NEH is committed to ensuring that data-gathering projects and analytical studies conducted by the Endowment or on its behalf comply with generally accepted disciplinary and professional standards with respect to the transparency of documentary sources and research methods. It is the Endowment's policy to document the data sources, quantitative methods and assumptions, and checks that support any analytical results produced and disseminated by this agency so that appropriately qualified members of the public will be adequately informed to make an independent judgment of their validity.

As part of its data gathering function, the Endowment also prepares information products using data produced or maintained by other federal agencies, non-profit organizations, foreign governments, and international organizations. All external data are reviewed for relevance and are properly sourced and cited. Known limitations of the external data are clearly stated.

4. Utility

The Endowment is committed to ensuring the usefulness for its intended audience of the information that this agency disseminates. Data gathering projects such as surveys are designed and developed in conformity with the requirements of the Paperwork Reduction Act and after consultation with a variety of data consumers and stakeholders, including other federal agencies, professional societies, and nonprofit organizations. As appropriate, analytical studies are reviewed prior to publication by experts outside the agency.

5. Integrity

NEH has been a leader in the national effort to develop standards and best practices for the creation, dissemination, and maintenance of access to humanities materials in digital formats. Moreover, the Endowment is committed to ensuring that its own computer data systems are secure against unauthorized access or revision, compromise of confidentiality, and inadvertent corruption. The Endowment's system of information security controls include sound practices that have been recognized as responsive to the requirements of the

Government Information Security Reform Act (GISRA).

NEH is subject to a variety of statutory requirements to protect information that the agency gathers and maintains. These requirements are set forth in the following:

- Privacy Act of 1974;
- Computer Security Act of 1987;
- OMB Circulars A-123, A-127, and A-130;
- Government Information Security Reform Act; and
- Federal Managers' Financial Integrity Act of 1982.

6. Information Correction Mechanism

Persons affected by the public dissemination of information initiated or sponsored by the National Endowment for the Humanities may request correction of any such information that they believe does not comply with the above Information Quality Guidelines, or with the broader guidelines issued by OMB. Affected persons are those who may benefit or be harmed by NEH-disseminated information.

To facilitate citizen review, affected persons may seek and obtain, where appropriate, timely correction of information maintained and disseminated by NEH that does not comply with OMB or NEH guidelines.

a. Requests for correction should be sent in writing, by mail, fax, or email to: Information Quality, National Endowment for the Humanities, Room 403, 1100 Pennsylvania Avenue, NW., Washington, DC 20506. 202-606-8428. osp@neh.gov.

b. The request should clearly identify the information asserted to be incorrect, including the name of the publication or other source of information, the date of issuance, and a detailed description of the information to be corrected. The request should state specifically why the information should be corrected and suggest specific changes.

c. The request should include the requester's name, mailing address, fax number, email address, and telephone number. NEH needs this information to respond to the request and to contact the requester as necessary.

d. If a request does not reasonably describe the information asserted to be incorrect, NEH may request additional information.

The Endowment's Assistant Chairman for Planning and Operations has been designated NEH Information Quality Official. The Information Quality Official will coordinate an objective review of all valid complaints. Valid complaints are defined as neither frivolous nor made in bad faith. An

objective review is understood as one conducted independently of the NEH programmatic office that originated the information at issue.

NEH will generally notify the requester of the agency decision on whether and how any corrections will be made within 30 business days of receipt of the request. If the requester does not agree with the agency's decision regarding corrective action, the requester may file for reconsideration by the Chairman within 30 days of NEH's decision. Such reconsideration requests will generally be resolved within 45 business days.

On an annual fiscal-year basis, NEH will submit a report to the Director of OMB providing information (both quantitative and qualitative, where appropriate) on the number and nature of complaints received by NEH regarding agency compliance with these guidelines and how such complaints were resolved. NEH will submit these reports no later than January 1 of each following year, with the first report due January 1, 2004.

Dated: August 6, 2002.

For the National Endowment for the Humanities.

Daniel Schneider,
General Counsel.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-461]

Amergen Energy Company, LLC; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of AmerGen Energy Company, LLC (the licensee), to withdraw part of its May 21, 2001, application for proposed amendment to Facility Operating License No. NPF-62 for the Clinton Power Station, Unit No. 1, located in DeWitt County, Illinois.

The amendment application proposed revising the Technical Specifications to allow alternate actions if the refueling equipment interlocks become inoperable and to increase the frequency of the refueling equipment interlock inputs channel functional test from 7 to 31 days. In partial response to the licensee's request, the NRC staff issued an amendment dated April 4, 2002, approving the alternate actions if the refueling equipment interlocks become inoperable. The request to revise the

frequency of the refueling equipment interlock inputs channel functional test was not addressed in that license amendment.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on December 26, 2001 (66 FR 66463). However, by letter dated July 16, 2002, the licensee withdrew the portion of the proposed change pertaining to the channel functional test frequency.

For further details with respect to this action, see the application for amendment dated May 21, 2001, the license amendment dated April 4, 2002, and the licensee's letter dated July 16, 2002, which withdrew part of the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737 or by e-mail to pdrc@nrc.gov.

Dated at Rockville, Maryland, this 5th day of August 2002.

For the Nuclear Regulatory Commission.

Jon B. Hopkins,

Senior Project Manager, Section 2, Project Directorate III, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-247]

Entergy Nuclear Operations, Inc.; Notice of Issuance of Amendment to Facility Operating License and Final Determination of No Significant Hazards Consideration

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 232 to Facility Operating License No. DPR-26 issued to Entergy Nuclear Operations, Inc. (the licensee), which revised the Technical Specifications for operation of the

Indian Point Nuclear Generating Unit No.2 (IP2; the facility) located in Westchester County, New York. The amendment was effective as of the date of its issuance.

The amendment made a one-time only change to Technical Specification Surveillance Requirement 4.4.A.3 to revise the frequency for the containment integrated leak rate test (ILRT, Type A test) from at least once per 10 years to at least once per 15 years. This change applies only to the interval following the last Type A test that was performed satisfactorily in June 1991 at IP2.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 22, 2001 (66 FR 44165). A request for a hearing was filed on March 18, 2002, by Riverkeeper, Inc.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the Safety Evaluation related to this action. Accordingly, as described above, the amendment has been issued and made immediately effective and any hearing will be held after issuance.

The Commission has determined that this amendment satisfies the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 13, 2001, as supplemented November 30, 2001, March 13, April 3, May 30, and June 13, 2002, (2) Amendment No. 232 to License No. DPR-26, and (3) the

Commission's related Safety Evaluation, which are available for public inspection at the Commission's PDR, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System's (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, 301-415-4737, or by e-mail to pdrc@nrc.gov.

Dated at Rockville, Maryland, this 5th day of August 2002.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-1201]

Framatome ANP, Inc.; Notice of Intent To Prepare an Environmental Assessment, and Notice of Opportunity for a Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of receipt of request from Framatome ANP, Inc. to renew Special Nuclear Material License SNM-1168, Notice of intent to prepare an Environmental Assessment, and Notice of opportunity for hearing.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission has received, by letter dated March 28, 2002, a request from Framatome ANP, Inc. to renew its NRC Special Nuclear Material License SNM-1168. This facility, located in Lynchburg, Virginia, fabricates low enriched Light Water Reactor fuel assemblies under a 10 CFR part 70 license. The NRC staff intends to prepare an Environmental Assessment for this action.

This application will be reviewed by the staff using NRC formal guidance, NUREG-1520, "Standard Review Plan for the Review of a License Application for a Fuel Cycle Facility."

The amendment application and environmental report are available for
