

deep water areas and around the inlets of Pamlico Sound, strandings decreased 67 percent from the 2000 level. The effectiveness of prohibiting large-mesh gillnet fishing in the deep water in reducing sea turtle mortality has been demonstrated. The sea turtle mortality resulting from the failure to implement a prohibition on fishing with large-mesh gillnets in deep water would seriously threaten sea turtle populations. This final rule is intended to address a major source of fishing-related sea turtle mortality.

In keeping with the intent of Executive Order 13132 to provide continuing and meaningful dialogue on issues of mutual state and Federal interest, NOAA Fisheries has conferred with the State of North Carolina regarding the need for NOAA Fisheries to implement a closure to protect listed sea turtles. NOAA Fisheries is working with NCDMF on the issuance of an ESA section 10(a)(1)(B) permit, which would create a partial exemption to the closure in this action. NOAA Fisheries intends to continue to consult with the State of North Carolina during the implementation of this final rule and regarding NCDMF's management of state water fisheries bycatch of sea turtles.

List of Subjects in 50 CFR Part 223

Administrative practice and procedure, Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements.

Dated: August 30, 2002.

William T. Hogarth, Ph.D.

Assistant Administrator, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 223 is amended to read as follows:

PART 223—THREATENED MARINE AND ANADROMOUS SPECIES

1. The authority citation for part 223 continues to read as follows:

Authority: 16 U.S.C. 1531 *et seq.*

2. In § 223.206, revise paragraph (d)(7) to read as follows:

§ 223.206 Exceptions to prohibitions relating to sea turtles.

* * * * *

(d) * * *

(7) Restrictions applicable to gillnet fisheries in North Carolina. No person may fish with gillnet fishing gear which has a stretched mesh size larger than 4 1/4 inches (10.8 cm), annually from September 1 through December 15, in the inshore waters of Pamlico Sound, North Carolina, and all contiguous tidal

waters, bounded on the north by 35°46.3' N. lat., on the south by 35°00' N. lat., and on the west by 76°30' W. lat.

National Oceanic and Atmospheric Administration

50 CFR Part 635

[I.D. 083002D]

Atlantic Highly Migratory Species Fisheries; Atlantic Bluefin Tuna

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Increase of Atlantic bluefin tuna General category daily retention limit.

SUMMARY: NMFS has determined that the Atlantic bluefin tuna (BFT) General category daily catch limit should be adjusted to two large medium or giant BFT per vessel in order to allow for maximum utilization of the General category September time-period subquota.

DATES: Effective September 1, 2002, until September 14, 2002.

FOR FURTHER INFORMATION CONTACT: Brad McHale, 978-281-9260.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas among the various domestic fishing categories, and General category effort controls (including time-period subquotas and restricted fishing days (RFDs)) are specified annually under 50 CFR 635.23(a) and 635.27(a). The 2002 General category effort controls were proposed on July 27, 2002 (67 FR 43266).

Adjustment of Daily Retention Limits

Under § 635.23 (a)(4), NMFS may increase or decrease the daily retention limit of large medium and giant BFT over a range from zero (on RFDs) to a maximum of three per vessel to allow

for maximum utilization of the quota for BFT. Based on a review of dealer reports, daily landing trends, and the availability of BFT on the fishing grounds, NMFS has determined that an increase of the daily retention limit for the first half of September is appropriate and necessary to allow full use of the September subquota. Therefore, NMFS adjusts the daily retention limit for September 1 through September 14 to two large medium or giant BFT per vessel.

The intent of this adjustment is to allow for maximum utilization of the General category subquotas for the September fishing period (specified under 50 CFR 635.27(a)) by General category participants in order to help achieve optimum yield in the General category fishery, to collect a broad range of data for stock monitoring purposes, and to be consistent with the objectives of the HMS FMP.

While catch rates have continued to be low so far this season, NMFS recognizes that they may increase. If catch rates remain depressed, NMFS may increase the daily retention limits and/or waive some or all of the previously scheduled RFDs. The RFD schedule will be announced with the publication of the final initial 2002 BFT quota specifications and General category effort controls. Until these specifications have been announced, no RFDs have been implemented.

Classification

This action is taken under 50 CFR 635.23(a)(4) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 971 *et seq.* and 16 U.S.C. 1801 *et seq.*

Dated: August 30, 2002.

Theophilus R. Brainerd,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

50 CFR Part 679

[Docket No. 011218304-1304-01; I.D. 083002A]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 610 of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock in Statistical Area 610 of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the C season allowance of the pollock total allowable catch (TAC) for Statistical Area 610 of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), August 30, 2002, until 1200 hrs, A.l.t., October 1, 2002.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for the Groundfish Fishery of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

Within any fishing year, underage or overage of a seasonal allowance may be added to or subtracted from subsequent seasonal allowances in a manner to be determined by the Regional Administrator, Alaska Region, NMFS, provided that the sum of the revised seasonal allowances does not exceed 30 percent of the annual TAC apportionment for the Central and Western Regulatory Areas in the GOA (§ 679.20(a)(5)(ii)(C)). For 2002, 30 percent of the annual TAC for the Central and Western Regulatory Areas is

15,187 mt. For 2002, the Regional Administrator has determined that within each area for which a seasonal allowance is established, any overage or underage of harvest from the previous season(s) shall be subtracted from or added to the seasonal allowance of the following season provided that the resulting sum of seasonal allowances in the Central and Western Regulatory Areas does not exceed 15,187 mt in any single season. The C season allowance of the pollock TAC in Statistical Area 610 of the GOA is 5,949 metric tons (mt) as established by an emergency rule implementing 2002 harvest specifications and associated management measures for the groundfish fisheries off Alaska (67 FR 956, January 8, 2002 and 67 FR 34860, May 16, 2002). The B season allowance in Statistical Area 610 was exceeded by 271 mt, therefore the Regional Administrator, in accordance with § 679.20(a)(5)(ii)(C), is reducing the C season pollock TAC in Statistical Area 610 by 271 mt to 5,678 mt.

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the C season allowance of the pollock TAC in Statistical Area 610 will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 5,628 mt, and is setting aside the remaining 50 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance will soon be reached. Consequently, NMFS is prohibiting

directed fishing for pollock in Statistical Area 610 of the GOA.

Maximum retainable bycatch amounts may be found in the regulations at § 679.20(e) and (f).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is contrary to the public interest. This requirement is contrary to the public interest as it would delay the closure of the fishery, lead to exceeding the TAC, and therefore reduce the public's ability to use and enjoy the fishery resource.

The Assistant Administrator for Fisheries, NOAA, also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 30, 2002.

Theophilus R. Brainerd,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
