SUMMARY: Sempra Energy Resources (SER) and Termoelectrica U.S., LLC (T-US) jointly applied to rescind Presidential Permit PP-235 held by SER and to issue a Presidential permit to T-US covering the same international transmission facilities. In addition, SER and T-US are requesting expedited consideration of their joint application.

DATES: Comments, protests, or requests to intervene must be submitted on or before September 25, 2002.

ADDRESSES: Comments, protests, or requests to intervene should be addressed as follows: Office of Coal & Power Import/Export, FE-27/Forrestal Building, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Ellen Russell (Program Office) 202-586-9624 or Michael T. Skinker (Program Attorney) 202-586-2793.

SUPPLEMENTARY INFORMATION:

The construction, operation, maintenance, and connection of facilities at the international border of the United States for the transmission of electric energy between the United States and a foreign country is prohibited in the absence of a Presidential permit issued pursuant to Executive Order (EO) 10485, as amended by EO 12038. Existing Presidential permits are not transferable or assignable. However, in the event of a proposed voluntary transfer of facilities, in accordance with the regulations at 10 CFR 205.323, the existing permit holder and the transferee are required to file a joint application with DOE that includes a statement of reasons for the transfer.

On August 29, 2002, SER and T-US jointly filed an application with the Office of Fossil Energy (FE) of the Department of Energy (DOE) for a transfer from SER to T-US of the facilities authorized by Presidential Permit PP-235. These facilities include the following facilities and all supporting structures within the right-of-way occupied by such facilities:

Two 230,000-volt electric transmission circuits installed on a single set of steel lattice towers and extending from San Diego Gas & Electric Company's Imperial Valley Substation approximately 6 miles south to the U.S. international border with Mexico.

At the border these transmission facilities connect to similar facilities owned by Termoelectrica de Mexicali (TDM) and continue south 3 miles to the 500-megawatt natural gas fired powerplant currently being developed by TDM west of the town of Mexicali, Baja California, Mexico.
