Number of respondents: FR Y-9C: 1,859, FR Y-9LP: 2,225, FR Y-9SP: 3,634, FR Y-9CS: 600

Small businesses are affected.

General description of report: This information collection is mandatory (12 U.S.C. 1844(c)). Confidential treatment is not routinely given to the data in these reports. However, confidential treatment for the reporting information, in whole or in part, can be requested in accordance with the instructions to the form.

Abstract: The FR Y-9C consists of standardized consolidated financial statements similar to the Federal Financial Institutions Examination Council (FFIEC) Consolidated Reports of Condition and Income (Call Reports) (FFIEC 031 & 041; OMB No. 7100-0036). The FR Y-9C is filed quarterly by top-tier bank holding companies that have total assets of \$150 million or more and by lower-tier bank holding companies that have total consolidated assets of \$1 billion or more. In addition, multibank holding companies with total consolidated assets of less than \$150 million with debt outstanding to the general public or engaged in certain nonbank activities must file the FR Y-9C.

The FR Y-9LP includes standardized financial statements filed quarterly on a parent company only basis from each bank holding company that files the FR Y-9C. In addition, for tiered bank holding companies, a separate FR Y-9LP must be filed for each lower tier bank holding company.

The FR Y-9SP is a parent company only financial statement filed semiannually by one-bank holding companies with total consolidated assets of less than \$150 million, and multibank holding companies with total consolidated assets of less than \$150 million that meet certain other criteria. This report, an abbreviated version of the more extensive FR Y-9LP, is designed to obtain basic balance sheet and income statement information for the parent company, information on intangible assets, and information on intercompany transactions.

The FR Y-9CS is a free form supplement that may be utilized to collect any additional information deemed to be critical and needed in an expedited manner. It is intended to supplement the FR Y-9C and FR Y-9SP reports.

CURRENT ACTIONS: The Federal Reserve proposes to require electronic submission of all FR Y-9 reports effective with the June 30, 2003, report date for FR Y-9C and FR Y-9LP filers and the December 31, 2003, report date¹ for

FR Y-9SP filers. The Federal Reserve would no longer accept paper copy reports from BHCs. The current submission deadline would remain 45 calendar days after the report date.

BHCs that do not currently submit their FR Y-9 reports electronically may either develop the appropriate software for electronic submission or contract with a software vendor that can provide the required software and services.² Any BHC that would like to develop its own electronic submission software would be required to contact its district Federal Reserve Bank for guidance.

The Federal Reserve has provided BHCs the option to submit their FR Y-9 reports electronically (via FedLine in 1991 and the Internet in 2000), but has never required electronic submission. The Federal Reserve has continued to promote the use of electronic submission of the FR Y-9 series of reports and other regulatory reports. Currently, approximately 60% of the larger BHCs submit their FR Y-9C and FR Y-9LP reports electronically, while only about 20% of the smaller BHCs submit their FR Y-9SP reports electronically. However, all banks have been required to submit their FFIEC Call Reports electronically since 1997.

The Federal Reserve proposes to require electronic submission of the reports as part of an ongoing effort to provide the public with financial information for U.S. BHCs on a timelier basis. Requiring electronic submission would be the first phase in this effort. The Federal Reserve anticipates that in the future BHCs would be required to build into their electronic submission software data editing capabilities utilizing the Federal Reserve's "validity" and "quality" edits. As part of the electronic submission process,

December 31, 2002. If the FR Y-9ES report is approved it would be subject to the electronic submission requirement for the December 31, 2003 report date. See Federal Register notice (67 FR 49356) published July 30, 2002.

S1 Corporation, 2815 Coliseum Centre Drive, Suite 300, Charlotte, NC 28217, Telephone: (704) 423-0394, frs.s1.com. STB Systems, 245 Park Avenue, 39th Floor, New York, NY 10167, Telephone: (212) 792-4136, www.stbsystems.com. This list is not an endorsement from the Federal Reserve of any of these products.

¹ The Federal Reserve is proposing to implement a new annual report (FR Y-9ES) that would be filed by ESOP banking holding companies effective

BHCs would be required to pass all validity edits and provide narrative remarks for all quality edit exceptions prior to data being accepted by the Federal Reserve. The Federal Reserve will submit these data editing requirements for public comment as a separate proposal at a later date.

A list of validity edits is located in the instructions to the FR Y-9 reports (except for the FR Y-9CS) and has been available to BHCs and software vendors for a number of years. These validity edits are principally used by the Federal Reserve to check the mathematical accuracy of financial data submitted in the FR Y-9 reports. The Federal Reserve also employs quality edits, currently not available to BHCs and software vendors, typically used to review the relationships between report line items and schedules. The Federal Reserve anticipates releasing many of the quality edits to BHCs and software vendors in the near future so that they may become familiar with the type of review performed by the Federal Reserve.

The Federal Reserve envisions that when these two requirements, mandated electronic submission and editing, are operating effectively, it could accelerate the public release of BHC financial data in a time frame that is much closer to the submission date. Currently, the Federal Reserve makes available to the public via the Internet (at the Federal Reserve Board's public web site at www.federalreserve.gov) data from the FR Y-9C and FR Y-9LP reports for the 50 largest U.S. BHCs generally within 10 days of the submission deadline. All other FR Y-9 data are typically posted to the Internet within 35 days after the submission date. These data are posted to the Internet after the financial data are reviewed and edited by the Federal Reserve.

The Federal Reserve believes that this approach will result in a more efficient financial data collection and dissemination process. This revised process should not be a significant burden to large or small bank holding companies because of advancements in, and the common use of, computer technology, and because all banks are currently required to submit their Call Reports electronically.

The Federal Reserve plans to extend the electronic submission requirement to other Federal Reserve regulatory reports in the future.

Board of Governors of the Federal Reserve System, September 10, 2002.

Jennifer J. Johnson,
Secretary of the Board.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from the American Institute for Conservation of Historic and Artistic Works ("AIC"). AIC has its principal place of business in Washington, DC.

The proposed consent order has been placed on the public record for thirty (30) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After thirty (30) days, the Commission will again review the agreement and the comments received, and decide whether it should withdraw from the agreement or make final the agreement's proposed order.

AIC is an association of professional conservators. The complaint alleges that AIC engages in substantial activities for the economic benefit of its members. The complaint alleges that AIC has approximately 3,100 members, many of whom provide professional services for a fee or who are employed by organizations that provide such services for a fee.

A conservation professional is a person who manages, cares for, preserves, or treats cultural objects, including artistic, historical, archaeological, scientific, and religious objects. The conservation professional may determine the condition, the need for treatment or restoration, and the appropriate method for preservation of such objects, and perform the required work to minimize deterioration or to restore such objects to their original state.

The complaint charges that AIC has violated Section 5 of the Federal Trade Commission Act by acting as a combination of its members and in agreement with some of its members to restrain price competition among conservation professionals. The
