

alternative for activities involving Security Category I/II materials, which constitute roughly half of the activities conducted at TA-18. The NTS alternative, which would house four of the five TA-18 experimental reactors in the existing Device Assembly Facility (DAF), was designated the preferred alternative based upon cost, technical, environmental, and mission factors. NNSA's preferred alternative also has the balance of the TA-18 missions, involving mostly Security Category III/IV materials and operations, remaining at LANL.

Signed in Washington, DC this 10th day of September, 2002.

Everet H. Beckner,

Deputy Administrator for Defense Programs.
