II. Background

A. What Action is the Agency Taking?

The Agency has issued a RED for the pesticide active ingredient lindane. Under FIFRA, as amended in 1988 and 1996, EPA is conducting an accelerated reregistration program to re-evaluate existing pesticides to make sure they

meet current scientific and regulatory standards. The data base to support the reregistration of lindane is substantially complete, and the Agency has identified risk mitigation measures that, if adopted by the registrant, will address the human health and ecological risks associated with the remaining uses of lindane.

As part of the lindane RED, the Agency will revoke all existing lindane tolerances because all lindane products for which the tolerances were originally established have been cancelled. The Agency has also determined that the currently registered lindane seed treatment products would be eligible for reregistration if the registrants make the changes to the terms and conditions specified in the lindane RED and provide the required data, and if EPA is able to establish all required tolerances for residues of lindane in food. The RED document includes guidance and time frames for complying with any label changes for products containing lindane.

The reregistration program is being conducted under Congressionally mandated time frames, and EPA recognizes both the need to make timely reregistration decisions and to involve the public. Therefore, EPA is issuing the lindane RED as a final document with a 60-day public comment period. Although the 60-day comment period does not affect the registrants's response due date, it is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the RED. All comments will be carefully considered by the Agency. If any comment significantly affects the lindane RED, EPA will amend the RED by publishing the amendment in the **Federal Register**.

B. What is the Agency's Authority for Taking this Action?

The legal authority for these RED falls under FIFRA, as amended in 1988 and 1996. Section 4(g)(2)(A) of FIFRA directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration."
