SUPPLEMENTARY INFORMATION: The proposed project is the approval of the Section 14 Master Development Plan, which facilitates approval of future leases on trust land in Section 14 by the BIA. Section 14 is located on the Agua Caliente Indian Reservation in downtown Palm Springs. It is comprised of tribally owned parcels, allotted parcels and parcels owned in fee. The section is bounded by Alejo Road to the north, Sunrise Road to the east, Ramon Road to the south and Indian Canyon Drive to the west. The 640 acre section is one block east of downtown Palm Springs and one mile west of Palm Springs Regional Airport.

The intent of the Section 14 Master Development Plan is to:

- Create an attractive, feasible and marketable vision for the area's future development;
- Achieve the highest and best use of Indian trust lands;
- Maximize and coordinate the development potential of Indian trust and fee lands in Section 14;
- Revitalize existing uses;

- Ensure compatibility with existing, proposed and planned development in the downtown area;

- Achieve a comprehensive master plan of development that is high quality, marketable and able to be implemented in a timely manner; and
- Provide a specific plan that ensures quality development will occur independent of ownership.

Businesses that are expected to be attracted and which will result in new construction include restaurants and various retail establishments. These establishments will consist of cinemas, live theaters, museums, and "entertainment retail" shopping where customers are entertained as they browse. There will also be health, sports and recreational complexes along with a large-scale hotel located across from the existing Convention Center.

In addition to the new development, existing structures will receive facade rehabilitation in order to blend in with the new destination resort theme of Section 14. Streets will also be redesigned and enhanced within Section 14 to promote a pedestrian-friendly destination resort environment.

Alternative transportation modes will be established within the area to help limit automobile traffic. Walkways and bikeways will be linked into the existing street grid and the major attractions of the area. Shade features such as awnings, overhangs and trellises will be established to attract both recreational and destination oriented pedestrians and cyclists. A rubber-tire shuttle will be installed linking Section 14, the airport and downtown, with stops at major hotels and attractions.

Alternatives to the proposed project that are considered in the DEIS/EIR include (1) no action, which will keep the City of Palm Springs General Plan in effect; (2) reduced intensity development; and (3) increased intensity development. Environmental issues addressed in the DEIS/EIR include landform/topography, geology/soils/seismicity, hydrology/water quality, biological resources, cultural and scientific resources, land use, air quality, traffic/circulation, noise, health and safety, public services and utilities, and visual resources.
