DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Project No. 6641-046-Kentucky]

City of Marion, Kentucky, Smithland Hydroelectric Partners; Notice of Availability of Environmental Assessment

September 20, 2002.

In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Energy Regulatory Commission's (Commission) regulations (18 CFR part 380), Commission staff have reviewed an application for a non-capacity related license amendment at the Smithland Project (FERC No. 6641), and have prepared an Environmental Assessment (EA) on the application. The project is located on the Ohio River in Livingston County, Kentucky.

Specifically, the project licensees (City of Marion, Kentucky and Smithland Hydroelectric Partners) have requested Commission approval to amend the present license by changing

the location of the transmission line. In the EA, Commission staff have analyzed the probable environmental effects of the proposed transmission line construction and have concluded that approval of the proposal, with appropriate environmental measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in Public Reference Room 2-A of the Commission's offices at 888 First Street, NE., Washington, DC. The EA also may be viewed on the Commission's Internet website (www.ferc.gov) using the "FERRIS" link. The EPA would like to solicit comments to:
