## INTERNATIONAL TRADE COMMISSION

### Agency Information Collection Activities; Proposed Collection; Comment Request

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Notice of proposed collection; comment request.

**SUMMARY:** The proposed information collection is a 3-year extension, pursuant to the Paperwork Reduction Act of 1995 (Public Law 104-13), of the current "generic clearance" (approved by the Office of Management and Budget under control No. 3117-0016) under which the Commission can issue information collections (specifically, producer, importer, purchaser, and foreign producer questionnaires and certain institution notices) for the following types of import injury investigations: countervailing duty, antidumping, escape clause, market disruption, NAFTA safeguard, and "interference with programs of the USDA." Comments concerning the proposed information collections are

requested in accordance with 5 CFR 1320.8(d); such comments are described in greater detail in the section of this notice entitled supplementary information.

**DATES:** To be assured of consideration, written comments must be received not later than April 19, 2002.

**ADDRESSES:** Signed comments should be submitted to Marilyn Abbott, Acting Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436.

**FOR FURTHER INFORMATION CONTACT:** Copies of the proposed information collections (and related instructions) and draft Paperwork Reduction Act Submission and Supporting Statement to be submitted to the Office of Management and Budget may be obtained from either of the following persons: Debra Baker, Office of Investigations, U.S. International Trade Commission, telephone 202-205-3180, or Lynn Featherstone, Director, Office of Investigations, U.S. International Trade Commission, telephone 202-205-3160. The draft Supporting Statement is also on the Commission's website (at <http://info.usitc.gov/OINV/INVEST/OINVINVEST.NSF>).

### SUPPLEMENTARY INFORMATION:

#### Request for Comments

Comments are solicited as to (1) whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used; (3) the quality, utility, and clarity of the information to be collected; and (4) minimization of the burden of the proposed information collection on those who are to respond (including through the use of appropriate automated, electronic, mechanical, or other technological forms of information technology, e.g., permitting electronic submission of responses).

### Summary of the Proposed Information Collections

#### (1) Need for the Proposed Information Collections

The Commission conducts countervailing duty and antidumping investigations under provisions of Title VII of the Tariff Act of 1930 to determine whether domestic industries are being materially injured or threatened with material injury by

reason of imports of products which are subsidized (countervailing duty cases) or sold at less than fair value (antidumping cases). Five-year reviews of antidumping and countervailing duty orders and suspended investigations are conducted to determine whether revocation of the existing orders would be likely to lead to continuation or recurrence of material injury to the domestic industry. The Commission conducts escape-clause investigations to determine whether increased imports are a substantial cause of serious injury or threat of serious injury to a domestic industry. NAFTA safeguard investigations are conducted under the authority of the North American Free Trade Agreement and examine whether increased imports from Canada or Mexico are a substantial cause of serious injury or threat of serious injury to a domestic industry. Market disruption investigations are conducted to determine whether imports of an article produced in a Communist country are causing material injury to a domestic industry. The Commission also conducts investigations to determine whether imports are interfering with programs of the Department of Agriculture for agricultural commodities or products. Specific investigations are almost always instituted in response to petitions received from U.S. manufacturers of the product(s) in question. Data received in response to the questionnaires (specifically, producer, importer, purchaser, and foreign producer questionnaires) issued under the terms of the proposed generic clearance are consolidated and form much of the statistical base for the Commission's determinations in these statutorily-mandated investigations.

Included in the proposed generic clearance are the institution notices for the five-year reviews of antidumping and countervailing duty orders and suspended investigations. Responses to the institution notices will be evaluated by the Commission and form much of the record for its determination to conduct either an expedited or full review.

#### (2) Information Collection Plan

Using the sample "generic clearance" questionnaires as a guide, questionnaires for specific investigations are prepared and are sent to U.S. producers manufacturing the product(s) in question. Importer and purchaser questionnaires are also sent to all significant importers/purchasers of the product(s). Finally, all foreign manufacturers of the product(s) in question that are represented by counsel are sent questionnaires, and, in
