SUPPLEMENTARY INFORMATION:

1. The Wireless Telecommunications Bureau invites the public to comment on a Report on Technical and Operational Issues Impacting the Provision of Wireless Enhanced 911 Services by Dale N. Hatfield filed on October 15, 2002 (the Hatfield Report). The Commission will use the information in the Hatfield Report and in the comments it receives to assess enhanced emergency 911 services (E911) deployment issues and consider methods to overcome any obstacles and accelerate deployment.

2. In a series of orders beginning in 1996, the Commission required wireless carriers to provide both basic and enhanced emergency 911 services. The Commission has recognized that despite substantial progress to date in the development of the technologies to support E911 location capability, much remains to be done to achieve the Commission's fundamental goal of having wireless E911 location capabilities deployed throughout the country.

3. In the fall of 2001, the Commission announced that Dale N. Hatfield, former Chief of the Commission's Office of Engineering and Technology, would conduct an inquiry into technical and operational issues with wireless E911 deployment.

4. On March 5, 2002, the Wireless Telecommunications Bureau (the Bureau) released a Public Notice announcing the details of the inquiry. The Bureau noted that the purpose of the inquiry was to obtain an expert, informed, unbiased assessment of the technical and operational issues that affect wireless E911 deployment. The Bureau stated that information would be gathered and evaluated from many sources, including from technology vendors, network equipment and handset manufacturers, carriers, the public safety community, and other sources concerning technology standards issues, development of hardware and software, and supply conditions. The inquiry was also intended to address the provisioning by Local Exchange Carriers (LECs) of the facilities and equipment necessary to receive and utilize E911 data elements. The Bureau indicated that the focus of the inquiry was on the future of the wireless E911 deployment, including obstacles to deployment and steps that might be taken to overcome or minimize them. The Bureau noted that, at the conclusion of his inquiry, Mr. Hatfield
