

collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** For further information or for a copy of the collection instruments and instructions contact Ms. Suzanne H. Plimpton, Reports Clearance Officer, via surface mail: National Science Foundation, ATTN: NSF Reports Clearance Officer, Suite 295, 4201 Wilson Boulevard, Arlington, VA 22230; telephone (703) 292-7556; e-mail [splimpto@nsf.gov](mailto:splimpto@nsf.gov); or FAX (703) 292-9188.

**SUPPLEMENTARY INFORMATION:**

*Title of Collection:* 2003 National Survey of College Graduates.

*OMB Approval Number:* 3145-0141.

*Expiration Date of Approval:* April 30, 2001.

*Type of Request:* Intent to seek approval to reinstate an information collection for three years.

1. *Abstract:* The National Survey of College Graduates (NSCG), formerly called the National Survey of Natural and Social Scientists and Engineers, has been conducted biennially since the 1970s. The 2003 NSCG will consist of a sample of individuals under the age 76 with at least a bachelor's degree as of April 1, 2000, the day of Census 2000. The 2003 NSCG will be the baseline survey for NSCG surveys for the rest of the decade. The purpose of this longitudinal study is to provide national estimates on the science and engineering workforce and changes in employment, education, and demographic characteristics. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering population.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “\* \* \* provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The NSCG is designed to comply with these mandates by providing information on the supply and utilization of the nation's scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals.

They will also provide necessary input into the SESTAT labor force data system, which produces national estimates of the size and characteristics of the country's science and engineering population. The Foundation uses this information to prepare congressionally mandated reports such as Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.

The Bureau of the Census, as in the past, will conduct the study for NSF. Questionnaires will be mailed in October 2003 and nonrespondents to the mail questionnaire will be followed by computer-assisted interviewing. The survey will be collected in conformance with the Privacy Act of 1974 and the individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes, analyzing data, and preparing scientific reports and articles.

2. *Expected Respondents:* A sample of approximately 180,000 persons identified as having at least a bachelor's degree will receive the mail questionnaire. The sample will be selected according to generally accepted probability sampling procedures.

3. *Burden on the Public:* The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. NSF estimates that the total annual burden will be 75,000 hours during the year.

Dated: November 12, 2002.

## NATIONAL SCIENCE FOUNDATION

### Notice of Intent To Seek Approval To Reinstate an Information Collection

**AGENCY:** National Science Foundation.

**ACTION:** Notice and request for comments.

**SUMMARY:** The National Science Foundation (NSF) is announcing plans to request clearance of this collection. In accordance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), we are providing opportunity for public

comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting that OMB approve clearance of this collection for no longer than 1 year.

**DATES:** Written comments on this notice must be received by January 17, 2003, to be assured of consideration.

Comments received after that date will be considered to the extent practicable.

**FOR FURTHER INFORMATION CONTACT:**

Contact Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230; telephone 703-292-7556; or send e-mail to [splimpton@nsf.gov](mailto:splimpton@nsf.gov). Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday. You also may obtain a copy of the data collection instrument and instructions from Ms. Plimpton.

**SUPPLEMENTARY INFORMATION:** *Title of Collection:* Evaluation of NSF Support for Undergraduate Research Opportunities (URO).

*OMB Number:* 3145-0121.

*Expiration Date of Approval:* Not applicable.

*Type of Request:* Intent to seek approval to reinstate an information collection for one year.

*Abstract:* “Evaluation of NSF Support for Undergraduate Research Opportunities (URO).”

*Proposed Project:* The National Science Foundation (NSF) manages a number of programs that provide meaningful research experiences for undergraduate students. This suite of programs include: Research Experiences for Undergraduates (REU), both the Site and Supplement components; Research in Undergraduate Institutions (RUI); the undergraduate research components in several of NSF's large research centers programs, e.g., Engineering Research Centers (ERC) Programs, Science and Technology Centers (STCs); and several institution-wide resources development programs in which undergraduate research experiences are often one component.

These Programs provide a wide range of US undergraduate students with opportunities to conduct hands-on research under the mentorship of graduate students, postdoctoral fellows, and faculty in various types of higher education institutions, including small liberal arts colleges, minority-serving institutions, research universities, as well as non-profit institutions in which science or engineering research is conducted.

The purpose of the proposed evaluation is to examine the impact of undergraduate research experiences supported by NSF on the undergraduate student and faculty and other mentors who participate. Study questions include: Why do undergraduates choose to participate in research activities? What are the perceived advantages and disadvantages to faculty for mentoring undergraduates in research activities? What are the criteria for selecting students for research activities? What kinds of activities comprise undergraduate "research" experiences? How do undergraduate research experiences affect students' decisions about their academic and work future?

*Use of the Information:* The information will allow NSF to review its portfolio of programs in which a substantial number of undergraduates participate in research projects of faculty and other mentors to determine whether there needs to be any rebalancing. In addition, it will include an inventory of undergraduate research opportunities around the US and contribute to the literature on best practices in undergraduate research experiences.

*Estimate of Burden:* Public reporting burden for this collection of information is estimated to average 20 minutes per response.

*Respondents:* Individuals.

*Estimated Number of Respondents:* 9000.

*Estimated Total Annual Burden on Respondents:* 3000 hours—9000 respondents at 20 minutes each.

*Frequency of Responses:* One time.

*Comments:* Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents; and (d) ways to minimize the burden of the collection of information on those who are to respond.

Dated: November 13, 2002.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 30-33887-CivP (EA 01-302), ASLBP No. 03-805-01-CivP]

### High Mountain Inspection Service, Inc.; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28,710 (1972), and sections 2.205, 2.700, 2.702, 2.714, 2.714a, 2.717, 2.721, and 2.772(j) of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to preside over the following proceeding: High Mountain Inspection Service, Inc., Mills, Wyoming; Order Imposing Civil Monetary Penalty.

This Board is being established pursuant to the request of High Mountain Inspection Service, Inc., for a hearing regarding an order issued by the NRC staff, dated September 30, 2002, entitled "Order Imposing Civil Monetary Penalty" (67 FR 63,170 (Oct. 10, 2002)).

The Board is comprised of the following administrative judges:

Ivan W. Smith, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Dr. Charles N. Kelber, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Dr. Peter S. Lam, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

All correspondence, documents and other materials shall be filed with the Panel Judges in accordance with 10 CFR 2.701.

Issued at Rockville, Maryland, this 12th day of November, 2002.

**G. Paul Bollwerk, III,**

*Chief Administrative Judge, Atomic Safety and Licensing Board Panel.*

## NUCLEAR REGULATORY COMMISSION

[Docket No. 72-17]

### Portland General Electric Company Trojan Independent Spent Fuel Storage Installation; Notice of Docketing of Materials License SNM-2509 Amendment Application

By letter dated October 18, 2002, Portland General Electric Company

(PGE) submitted an application to the Nuclear Regulatory Commission (NRC or the Commission), in accordance with 10 CFR part 72, requesting the amendment of the Trojan Independent Spent Fuel Storage Installation (ISFSI) license (SNM-2509) and the Technical Specifications for the ISFSI located at Columbia County, Oregon. PGE is seeking Commission approval to amend the materials license and the ISFSI Technical Specifications to reflect a change in the Holtec International Multi-Purpose Canister (MPC) helium backfill pressure upper limit.

This application was docketed under 10 CFR part 72; the ISFSI Docket No. is 72-17 and will remain the same for this action. The amendment of an ISFSI license is subject to the Commission's approval.

The Commission may issue either a notice of hearing or a notice of proposed action and opportunity for hearing in accordance with 10 CFR 72.46(b)(1) or, if a determination is made that the amendment does not present a genuine issue as to whether public health and safety will be significantly affected, take immediate action on the amendment in accordance with 10 CFR 72.46(b)(2) and provide notice of the action taken and an opportunity for interested persons to request a hearing on whether the action should be rescinded or modified.

For further details with respect to this amendment, see the application dated October 18, 2002, which is available for public inspection at the Commission's Public Document Room, One White Flint North Building, 11555 Rockville Pike, Rockville, MD or from the publically available records component of NRC's Agencywide Documents Access and Management System (ADAMS). The NRC maintains ADAMS, which provides text and image files of NRC's public documents. These documents may be accessed through the NRC's Public Electronic Reading Room on the Internet at <http://www.nrc.gov/reading-rm/adams.html>. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737 or by email to [pdr@nrc.gov](mailto:pdr@nrc.gov).

Dated at Rockville, Maryland, this 7th day of November 2002.

For the Nuclear Regulatory Commission.
