OMB Control No.: 3060-0056.

Expiration Date: December 31, 2004.

Title: Part 68—Connection of Terminal Equipment to the Telephone Network.

Form No.: N/A.

Respondents: Business or other for-profit; Individuals or household.

Estimated Annual Burden: 54,369 respondents; .10 minutes—24 hours per respondent; 2.1 hours per response (avg.); 117,959 total annual burden hours.

Estimated Annual Reporting and Recordkeeping Cost Burden: \$2,705,000.

Frequency of Response: On occasion; Recordkeeping; Third Party Disclosure.

Description: In the Telecommunications Act of 1996 (1996 Act), Congress directed the Commission to review its rules every even-numbered year and repeal or modify those found to be no longer in the public interest. Consistent with the directive of Congress, in the year 2000, the Commission undertook its second comprehensive biennial review of the Commission's rules to eliminate regulations that are no longer necessary because the public interest can be better served through reliance on market forces. In a Report and Order issued in CC Docket No. 99-216, Biennial Regulatory Review of Part 68 of the Commission's Rules and Regulations, released December 21, 2000 (Order), the Commission completely eliminate significant portions of Part 68 of our rules governing the connection of customer premises equipment (terminal equipment) to the public switched telephone network and privatize the standards development and terminal equipment approval processes. Specifically, in the Commission transferred responsibility for developing technical criteria to Standards Development Organizations (SDOs) that are accredited by the American National Standards Institute (ANSI), and the responsibility for compiling and publishing all standards ultimately adopted as technical criteria for terminal equipment to the Administrative Council for Terminal Attachments (Administrative Council). The Commission maintains its rules' broad principles, including a proscription against causing any of four harms to the public switched telephone network by the direct connection of terminal equipment. Once the Administrative Council publishes the technical criteria, the Commission shall

presume the criteria to be valid for the prevention of the harms to the public switched telephone network by terminal equipment interconnection, subject to *de novo* review by petition to this Commission. Conformance with the technical criteria will be considered a demonstration of compliance with the Commission's rules prohibiting terminal equipment from harming the public switched telephone network. Terminal equipment manufacturers either will submit their products to telecommunications certification bodies (TCBs) for certification of conformity with the technical criteria (instead of submitting them for registration with the Commission), or they will use the Commission's Supplier's Declaration of Conformity (SDoC) process to show conformity with the technical criteria. This process will be more efficient and responsive to the needs of all segments of the industry, and remove the Commission from a role where governmental involvement is no longer necessary or in the public interest. Following is a summary of the collections contained in the Order and 47 CFR part 68. See the Order and 47 CFR part 68 for additional information.

a. Administrative Council for Terminal Attachment's Requirements—Currently, under rule 68.102 manufacturers must register terminal equipment. FCC Form 730 is no longer required to be used to obtain registration of telephone equipment pursuant to part 68 of the Commission's rules, but applicants may be required to file information with Telecommunications Certification Bodies or with the Administrative Council for Terminal Attachments. The Commission has ceased accepting applications for registration of part 68 equipment and transferred responsibility for establishing and maintaining the database of approved equipment to the Administrative Council. While continued collection of the information formerly required by FCC Form 730 is permitted, the Commission only requires that the database contain sufficient information for providers of telecommunications, this Commission and the U.S. Customs Service to carry out their functions. (No. of respondents: 2400; hours per response: 24 hours; total annual burden: 57,600 hours).

b. Section 68.106—Notification to Provider of Wireline Telecommunications—Section 68.106 requires customers connecting terminal equipment or protective circuitry to the public switched telephone network shall, upon request of the provider of wireline telecommunications inform the provider of wireline
