SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducts a series of monthly, quarterly, and annual surveys as part of the Current Industrial Reports (CIR) program. The CIR surveys deal mainly with the quantity and value of shipments of particular products and occasionally with data on production and inventories; unfilled orders, receipts, stocks and consumption; and comparative data on domestic production, exports, and imports of the products they cover. These surveys provide continuing and timely national statistical data on manufacturing. The results of these surveys are used extensively by individual firms, trade associations, and market analysts in planning or recommending marketing and legislative strategies.

The CIR program includes both mandatory and voluntary surveys. Typically, the monthly and quarterly surveys are conducted on a voluntary basis and annual collections are mandatory. The collection frequency of individual CIR surveys is determined by the cyclical nature of production, the need for frequent trade monitoring, or the use of data in Government economic indicator series. Some monthly and quarterly CIR surveys have an annual "counterpart" collection. The annual counterpart collects annual data on a mandatory basis from those firms not participating in the more frequent collection.

Due to the large number of surveys in the CIR program, for clearance purposes, the CIR surveys are divided into "waves." There are three waves that include the mandatory and voluntary surveys. Mandatory and voluntary surveys historically have been divided into separate clearance requests, making six separate clearances. Each year, one wave (or two clearance requests) is submitted for OMB review. We are now combining the mandatory and voluntary surveys of each wave into one clearance request, reducing the total number of

clearance requests from six to three, and the number of OMB submissions annually from two to one. This year the Census Bureau plans to submit

mandatory and voluntary surveys of Wave I for clearance. Also, in this request we are converting the MA311D "Confectionery" and MA333N, "Fluid

Power Products" from mandatory collection to voluntary. The surveys in Wave I are:

Mandatory surveys	Voluntary survey
<p>** MA311D—Confectionery</p> <p>MA325F—Paint and Allied Products</p> <p>MA327C—Refractories</p> <p>MA331A—Iron and Steel Castings</p> <p>MA331B—Steel Mill Products</p> <p>MA331E—Nonferrous Castings</p> <p>MA332Q—Antifriction Bearings</p> <p>MA333A—Farm Machinery and Lawn and Garden Equipment</p> <p>MA333M—Refrigeration, Air Conditioning and Warm Air Heating Equipment.</p> <p>** MA333N—Fluid Power Products</p> <p>MA334B—Selected Instruments and Related Products</p> <p>MA335A—Switchgear, Switchboard Apparatus, Relays, and Industrial Controls.</p> <p>MA335F—Major Household Appliances</p> <p>MA335H—Motors and Generators</p> <p>MA335K—Wiring Devices and Supplies</p>	<p>* MQ325B—Inorganic Fertilizer Materials and Related Products</p> <p>* MQ327D—Clay Construction Products</p>

* These voluntary surveys have mandatory annual counterparts.

** Mandatory annual surveys convert to voluntary status.

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect data. We ask respondents to return monthly report forms within 10 days, quarterly report forms within 15 days, and annual report forms within 30 days of the initial mailing. Telephone calls and/or letters encouraging participation will be mailed to respondents who have not responded by the designated time.
