Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2003-14658; Airspace Docket No. 03-ACE-27]

Proposed modification of Class E airspace; Fort Leonard Wood, MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to modify Class E airspace areas at Fort Leonard, MO. An examination of controlled airspace at Fort Leonard, MO revealed discrepancies in the dimensions of the Fort Leonard, MC Class E4 and Class E5 airspace areas. This action corrects the discrepancies by modifying the airspace areas.

The intended effect of this proposal is to provide controlled Class E airspace for aircraft executing instrument approach procedures to Waynesville Regional Airport at Forney Field and to segregate aircraft using instrument approach procedures in instrument conditions from aircraft operating in visual conditions.

DATES: Comments for inclusion in the Rules Docket must be received on or before April 25, 2003.

ADDRESSES: Send comments on this proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590-0001. You must identify the

The Proposal

This notice proposes to amend Title 14 Code of Federal Regulations, part 71 (14 CFR part 71) by modifying the Class E airspace area designated as an extension to the Class D airspace and the Class E airspace area extending upward from 700 feet or more above the surface at Fort Leonard Wood, MO. An examination of controlled airspace at Fort Leonard, MO revealed the dimensions of these airspace areas were not in compliance with FAA Order 8260.19, Flight Procedures and Airspace. This proposed rule making would decrease the size of the Fort Leonard Wood, MO Class E airspace area designated as an extension to the Class D airspace by relocating the southeastern boundary of this area from 16 miles to 7 miles southeast of the Buckhorn Nondirectional Radio Beacon (NDB). It would also increase the dimensions of the Class E airspace area extending upward from 700 feet or more above the surface to approximately the current dimensions of the Class E airspace area designated as an extension to the Class D airspace. These actions would correct the discrepancies in the controlled airspace at Fort Leonard Wood, MO and bring them into compliance with FAA Order 8260.19. These areas would be depicted on appropriate aeronautical charts.

Class E airspace areas designated as an extension to a Class D area are published in Paragraph 6004 of FAA Order 7400.9K, dated August 30, 2002, and effective September 16, 2002, which is incorporated by reference in 14 CFR 71.1. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of the same Order. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant

preparation of a Regulatory Evaluation as they anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
