

Van Lines are requesting exemptions from certain controlled substance and alcohol testing requirements specifically, 49 CFR 382.105, 49 CFR 382.305(I)(1), and 49 CFR 40.13(a), (b), (c) and (d).

Mayflower and United Van Lines propose two conditions for their exemption that they believe would allow the FMCSA to monitor whether they have met the required annual random testing percentage. First, they intend to mark each driver controlled substance and alcohol testing record with either "CDL driver" or "non-CDL driver" so that an enforcement officer can readily determine which records are for drivers subject to 49 CFR part 383 Commercial Driver's License Standards; Requirements and Penalties. Secondly, they will establish a random testing program that will test all drivers (both CDL drivers and non-CDL drivers) for controlled substances and alcohol at an annual rate of at least 15 percent for alcohol and at least 55 percent for controlled substances. The applicants believe by implementing these two conditions they will meet the minimum annual random testing percentage while still having a single pool of drivers for random selection.

#### Request for Comments

In accordance with 49 U.S.C. 31315(b)(4) and 31136(e), FMCSA is requesting public comment from all interested persons on these exemption applications. All comments received before the close of business on the comment closing date, indicated at the beginning of this notice, will be considered and will be available for examination in the docket at the location listed under the address section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable, but FMCSA may make its decision at any time after the close of the comment period. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

#### SUPPLEMENTARY INFORMATION:

### National Highway Traffic Safety Administration

*Title:* National Automotive Sampling System (NASS).

OMB Number: 2127-0021.

Type of Request: Continuation.

**Abstract:** The collection of crash data that support the establishment and enforcement of motor vehicle regulations that reduce the severity of injury and property damage caused by motor vehicle crashes is authorized under the National Traffic and Motor Vehicle Safety Act of 1966 (Pub. L. 89-563, Title 1, Sec. 106, 108, and 112). The National Automotive Sampling System (NASS) Crashworthiness Data System (CDS) of the National Highway Traffic Safety Administration investigates high severity crashes. Once a crash has been selected for investigation, researchers locate, visit, measure, and photograph the crash scene; locate, inspect, and photograph vehicles; conduct a telephone or personal interview with the involved individuals or surrogate; and obtain and record injury information received from various medical data sources. NASS CDS data are used to describe and analyze circumstances, mechanisms, and consequences of high severity motor vehicle crashes in the United States. The collection of interview data aids in this effort.

**Affected Public:** Passenger Motor Vehicle Operators.

**Estimated Total Annual Burden:** 5,807 hours.

**ADDRESSES:** Send comments, within 30 days, to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725-17th Street, NW., Washington, DC 20503, Attention NHTSA Desk Officer.

**Comments are invited on:** Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Departments estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

A Comment to OMB is most effective if OMB receives it within 30 days of publication.
