##### Cheyenne Plains Gas Pipeline Company, Colorado Interstate Gas Company; Notice of Status Change of Environmental Review and Expiration of Scoping Period for the Proposed Cheyenne Plains Pipeline Project

June 10, 2003.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental impact statement (EIS) that will discuss the environmental impacts of the construction and operation of the facilities proposed in the Cheyenne Plains Gas Pipeline Company's (CPG) project in various counties of Colorado and Kansas.<sup>1</sup> The purpose of this Notice is to give interested stakeholders a final opportunity to submit comments on the

<sup>1</sup> On May 20, 2003, in Docket No. CP03-302-000, CPG's application was filed with the Commission under Section 7 of the Natural Gas Act and part 157 of the Commission's regulations.

Cheyenne Plains Pipeline Project as we<sup>2</sup> conclude the scoping period for this project and begin writing the draft Environmental Impact Statement (EIS).

On March 14, 2003, the Commission issued a Notice of Pre-Filing Environmental Review and Scoping for the Cheyenne Plains Pipeline Project under Docket No. PF03-1-000.<sup>3</sup> That notice announced that the FERC staff was initiating its National Environmental Policy Act (NEPA) review process on CPG's project prior to receipt of a formal application. The purpose of the NEPA Pre-filing Process is to involve landowners, government entities, and other interested parties early in the project planning and to address their issues before an application is filed with the FERC.

The EIS will discuss the environmental impacts of CPG's proposal, which involves the construction and operation of about 387 miles of natural gas pipeline and eight meter stations in Colorado and Kansas. Approximately 13 miles of the pipeline would be located on the Pawnee National Grassland in Weld County, Colorado. Colorado Interstate Gas Company (CIG) has filed a companion application that would add one new "jumper" compressor unit (at 2,443 horsepower) at its existing Cheyenne Compressor Station, which CIG states is necessary to deliver gas on the new Cheyenne Plains system.

The FERC will use the EIS in its decision-making process to determine whether the project is in the public convenience and necessity. The U.S. Department of Agriculture (USDA) Forest Service, Pawnee National Grassland will use the EIS in its decision-making process to determine whether or not to issue a Right-of-Way for occupancy of National Grassland System lands affected by the pipeline project. A general project location map is shown in appendix 1.<sup>4 5</sup>

<sup>2</sup> "We," "us," and "our" refer to the environmental staff of the Office of Energy Projects.
