

the final results. Apple pomace was valued using an April 2000 study published by the University of Georgia.

Preliminary Results of the Review

We preliminarily determine that the following dumping margin exists for the

period June 1, 2002, through November 30, 2002:

Exporter	Producer	Weighted-average margin percentage
Yantai Golden Tide Fruits & Vegetable Food Co., Ltd.	Yantai Golden Tide Fruits & Vegetable Food Co., Ltd.	12.36 %

Public Comment

Pursuant to 19 CFR 351.310(c), any interested party may request a hearing within 30 days of the date of publication of this notice. Any hearing, if requested, will be held approximately 42 days after the publication of this notice, or the first workday thereafter. Issues raised in hearings will be limited to those raised in the case and rebuttal briefs. Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs within 30 days of the date of publication of this notice. Furthermore, as discussed in 19 CFR 351.309(d)(2), rebuttal briefs, which must be limited to issues raised in the case briefs, may be filed not later than 35 days after the date of publication of this notice. Parties who submit case briefs or rebuttal briefs in this new shipper review are requested to submit with each argument (1) a statement of the issue and (2) a brief summary of the argument with an electronic version included.

The Department will publish the final results of this new shipper review, including the results of its analysis of issues raised in any such written briefs or hearing, within 90 days of the date of issuance of these preliminary results, pursuant to section 751(a)(2)(B)(iv) of the Act.

Assessment Rates

Pursuant to 19 CFR 351.212(b), the Department calculates an assessment rate for each importer of the subject merchandise. Upon issuance of the final results of this new shipper review, if any importer/customer-specific assessment rates calculated in the final results are above *de minimis* (i.e., at or above 0.5 percent), the Department will issue appraisement instructions directly to the U.S. Bureau of Customs and Border Protection to assess antidumping duties on appropriate entries by applying the assessment rate to the entered value of the merchandise.

For assessment purposes, we calculate importer-specific assessment rates for the subject merchandise by aggregating the dumping duties due for all U.S. sales to each importer and dividing the amount by the total entered value of the sales to that importer. The Department will issue assessment instructions

directly to the U.S. Bureau of Customs and Border Protection within 15 calendar days of the publication of the final results of this new shipper review in the **Federal Register**.

Cash Deposit Requirements for New Shipper Review

Bonding will no longer be permitted to fulfill security requirements for shipments from Golden Tide of AJC from the PRC on or after the publication date of the final results of this new shipper review. Instead, the following cash deposit requirements will be effective upon publication of the final results of the new shipper review for all shipments from Golden Tide of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date: (1) for subject merchandise manufactured and exported by Golden Tide, we will require a cash deposit at the rate established in the final results; and (2) for subject merchandise exported by Golden Tide but not manufactured by it, the cash deposit will be the PRC countrywide rate (i.e., 51.74 percent).

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing these results in accordance with section 751(a)(2)(B) of the Act and 19 CFR 351.214.

Dated: July 23, 2003.

Joseph A. Spetrini,

*Acting Assistant Secretary for Grant Aldonas,
Under Secretary.*

Certain Hot-Rolled Carbon Steel Flat Products From India: Extension of Preliminary Results of Countervailing Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time limit for preliminary results of countervailing duty administrative review.

EFFECTIVE DATE: July 30, 2003.

FOR FURTHER INFORMATION CONTACT:

Tipten Troidl, Office of AD/CVD Enforcement VI, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave, NW., Washington, DC 20230; telephone: (202) 482-2786.

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to make a preliminary determination within 245 days after the last day of the anniversary month of an order/finding for which a review is requested and a final determination within 120 days after the date on which the preliminary determination is published. However, if it is not practicable to complete the review within the time period, section 751(a)(3)(A) of the Act allows the Department to extend these deadlines to a maximum of 365 days and 180 days, respectively.

Background

On January 22, 2003, the Department published a notice of initiation of administrative review of the countervailing duty order on certain hot-rolled carbon steel flat products from India, covering the period April 20, 2001, through December 31, 2002 (see 68 FR 3009). The preliminary results are currently due no later than September 2, 2003.

Extension of Preliminary Results of Review

In this administrative review, we are currently reviewing new subsidy allegations; including: debt forgiveness, debt restructuring, suspension of interest payments, and debt-to-equity conversions. In addition, we are reviewing numerous programs found countervailable during the original investigation. In order to complete our analysis, we not only require additional information, but also additional time. See July 24, 2003, Memorandum to Holly A. Kuga, Acting Deputy Assistant Secretary, RE: Extension of Preliminary Results: Certain Hot-Rolled Carbon Steel Flat Products from India. As a result, it is not practicable to complete the preliminary results of this review within the original time limit. Therefore, the Department is extending the time limits for completion of the preliminary results until no later than December 31, 2003.

This extension is in accordance with section 751(a)(3)(A) of the Act.

Dated: July 24, 2003.

Holly A. Kuga,

Acting Deputy Assistant Secretary for Import Administration.

National Oceanic and Atmospheric Administration

[I.D. 071703A]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Mr. Jody Symons on behalf of Florida Offshore Aquaculture, Inc. of Madeira Beach, FL. If granted, the EFP would authorize a feasibility study for 24 months of net cage culture of cobia, mahi-mahi, greater amberjack, Florida pompano, red snapper and cubera snapper at a site approximately 33 statute miles (53 km) WSW. of John's Pass, FL. According to

the applicant, the purpose of the proposed study is to determine the feasibility to grow commercial quantities of native fish species in the offshore environment of the eastern Gulf of Mexico using mariculture techniques. The applicant proposes to place hatchery-raised juvenile fish in net cages, feed them, allow them to grow for approximately 4 months, harvest each cage three times annually, land them in Florida, and sell them. No wild-caught fish will be involved in this study.

DATES: Comments must be received no later than 5 p.m., eastern time, on August 29, 2003.

ADDRESSES: Comments on the application must be mailed to Peter Eldridge, Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702. Comments also may be sent via fax to 727-570-5583. Comments will not be accepted if submitted via e-mail or Internet. The application and related documents are available for review upon written request to the address above.

FOR FURTHER INFORMATION CONTACT: Peter Eldridge, 727-570-5305; fax: 727-570-5583; e-mail: peter.eldridge@noaa.gov.

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and regulations at 50 CFR 600.745(b), concerning scientific research activity, exempted fishing permits, and exempted educational activity.

Florida Offshore Aquaculture, Inc., of Madeira Beach, FL intends to conduct a feasibility study for 24 months to determine if it is practical to raise commercial quantities of cobia, mahi-mahi, greater amberjack, red snapper and cubera snapper in nets at a site approximately 33 statute miles (53 km) WSW. of John's Pass, FL (27°34.79' N. lat., 83°16.11' W. long.; depth 109 ft (33.2 m)). An important objective of the project is to determine environmentally responsible procedures that should be employed to ensure minimal environmental impacts on native species as well as the habitat surrounding the project, which will be approximately 1 square mile in area. The proposed site is over sandy bottom and is not in a traditional fishing area for recreational and commercial fisheries. Thus, there should be minimal interaction between the mariculture site and fishermen.

Four to eight Sea Station TM cages will be deployed. These cages have a central steel support spar within a steel tubular ring with spoke lines radiating

from the top and bottom of the spar to the ring and a net stretched over the outside of this spar and cable frame. This design is self-supporting and provides total encasement of the fish; each cage is 53 ft (16 m) tall and 83 ft (25 m) in diameter and will contain a maximum fish biomass of 165,000 lb (75,000 kg). The cages utilize a net made out of spectra fiber and are stretched tightly over the entire structure, which greatly reduces the possibility of entanglement by sea turtles and marine mammals. The cages will be submerged except during harvesting and should pose no foreseeable threat to sea birds. Each cage will be attached to four 2,000-kg Danforth anchors to prevent movement from the site.

The stocking schedule is as follows: Cobia will be the first species stocked. There will be four 6-month stocking phases. During the first phase, four cages will be deployed, stocked and harvested; during the second phase stocking and harvesting of the initial four cages will continue; during the third phase four additional cages will be deployed with cobia, mahi-mahi, greater amberjack, Florida pompano, red snapper and cubera snapper. During the fourth phase stocking and harvesting of all species will occur.

Disease-free fingerlings will be obtained from the Aquaculture Center of the Florida Keys (59300 Overseas Highway, Marathon, FL, phone 305-743-6135) and the Marine Science Institute of the University of Texas (750 Channel View Drive, Port Aransas, TX, phone 361-749-6795). In the event that the fish in the cages develop diseases or parasites from wild sources and treatments are indicated, they will be treated with U.S. Food and Drug Administration (FDA)-approved vaccines, drugs or antibiotics only. This will be done in their feed or, in the extreme case, the cage(s) will be enclosed with material and will be treated with U.S. FDA-approved vaccines, drugs or antibiotics in solution. If any fish are found to have commutable virus, the entire population of the affected cage will be immediately removed and destroyed. The brood stock and their spawn will be genetically tagged using the satellite DNA method. The Florida Fish and Wildlife Conservation Commission (FFWCC) facility at Port Manatee, FL, will conduct this phase of the research.

Feeds for this project will be commercially manufactured diets formulated for the species being fed from established aquaculture feed companies. The pelletized feeds will contain essential feed ingredients only and will minimize introduction of
