

requires nor results in reasonable progress toward either achievement of environmental compliance or implementation of an adequate EMS by a date certain.

Where EPA determines that this policy does not apply, and where EPA elects to exercise its enforcement discretion, other EPA enforcement policies remain applicable. The State's and EPA's options in these circumstances include discretion to take or not take formal enforcement action in light of factual, equitable, or local government capacity considerations with respect to violations that had been identified during compliance assistance and were not corrected. Neither the State's actions in providing, nor in failing to provide, compliance assistance shall constitute a legal defense in any enforcement action. However, a local government's good faith efforts to correct violations during compliance assistance may be considered a mitigating factor in determining the appropriate enforcement response or penalty in subsequent enforcement actions.

Nothing in this policy is intended to release a State from any obligations to supply EPA with required routinely collected and reported information. As described above, States should provide EPA with lists of participating small local governments and copies of final compliance agreements and schedules. States should also give EPA immediate notice upon discovery of a violation or circumstance that may present an imminent and substantial endangerment to, has caused or is causing actual serious harm to, or presents serious threats to, public health, welfare, or the environment.

This policy has no effect on the existing authority of citizens to initiate a legal action against a local government alleging environmental violations.

This policy sets forth factors for consideration that will guide the Agency in its exercise of enforcement discretion. It states the Agency's views as to how the Agency intends to allocate and structure enforcement resources. The policy is not final agency action, and is intended as guidance only. This policy is not intended for use in pleading, or at hearing or trial. It does not create any rights, duties, obligations, or defenses, implied or otherwise, in any third parties.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other

Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Pub. L. 104-13. Needs and Uses: The Commission adopted the Schedule S, a standardized form for space station license applications, and Form 312-EZ for earth station license applications. The implementation of the decisions in the Schedule S rulemaking will enable the Commission to review space station and earth station applications more quickly than is now possible, and therefore, increase speed of service to the public. It will prevent numbers from being held in unavailable status without demonstrated reasons, and will make more numbers available for subscribers who need and want them. If DSMI is uncertain whether a number should be placed in unavailable status, it should seek guidance from the Commission's Wireline Competition Bureau.
