

U.S.C. 3001 (9–10), the human remains described above represent the physical remains of one individual of Native American ancestry. Officials of the Illinois State Museum also have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Cherokee Nation, Oklahoma; Eastern Band of Cherokee Indians of North Carolina; and United Keetoowah Band of Cherokee Indians in Oklahoma.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Dr. Robert E. Warren, Curator of Anthropology, Illinois State Museum, 1011 East Ash Street, Springfield, IL 62703–3535, telephone (217) 524–7903, before November 7, 2003. Repatriation of the human remains to the Cherokee Nation, Oklahoma; Eastern Band of Cherokee Indians of North Carolina; and United Keetoowah Band of Cherokee Indians in Oklahoma may proceed after that date if no additional claimants come forward.

The Illinois State Museum is responsible for notifying the Cherokee Nation, Oklahoma; Eastern Band of Cherokee Indians of North Carolina; and United Keetoowah Band of Cherokee Indians in Oklahoma that this notice has been published.

Dated: August 22, 2003.

John Robbins,

Assistant Director, Cultural Resources.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Illinois State Museum, Springfield, IL

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession of Illinois State Museum, Springfield, IL. The human remains were removed from Montana.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has

control of the Native American human remains. The National Park Service is not responsible for the determinations within this notice.

A detailed assessment of the human remains was made by Illinois State Museum professional staff in consultation with representatives of the Cheyenne-Arapaho Tribes of Oklahoma and the Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana.

In the late 1960s, human remains representing one individual were removed from an unspecified site in Montana by Dr. Ronald Gordon. The human remains were reportedly removed from a road embankment which cut through a known Indian cemetery. Markings believed to have been made by Dr. Gordon on the frontal bone of the skull read "Cheyenne ♀ Montana." Prior to 1987, Dr. Gordon donated the human remains to the Dickson Mounds Museum, a branch of the Illinois State Museum. The accession card indicates that the remains are of a Cheyenne female. No known individual was identified. No associated funerary objects are present.

Review of the cranial morphology indicates that the individual is clearly Native American. The Cheyenne Indians are represented by two present-day Indian tribes, the Cheyenne-Arapaho Tribes of Oklahoma and the Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana.

Officials of the Illinois State Museum have determined that, pursuant to 25 U.S.C. 3001 (9–10), the human remains described above represent the physical remains of one individual of Native American ancestry. Officials of the Illinois State Museum also have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Cheyenne-Arapaho Tribes of Oklahoma and the Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains should contact Dr. Robert E. Warren, Curator of Anthropology, Illinois State Museum, 1011 East Ash Street, Springfield, IL 62703–3535, telephone (217) 524–7903, before November 7, 2003. Repatriation of the human remains to the Cheyenne-Arapaho Tribes of Oklahoma and the Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana may proceed after that date if no additional claimants come forward.

The Illinois State Museum is responsible for notifying the Cheyenne-Arapaho Tribes of Oklahoma and the Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana that this notice has been published.

Dated: August 25, 2003.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Phoebe A. Hearst Museum of Anthropology, University of California, Berkeley, Berkeley, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of an inventory of human remains and associated funerary objects in the possession of the Phoebe A. Hearst Museum of Anthropology, University of California, Berkeley, Berkeley, CA. The human remains and associated funerary objects were removed from site 45KL242, also known as Millers Island site 20 and 21, Klickitat County, WA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations within this notice.

An assessment of the human remains, and catalog records and associated documents relevant to the human remains, was made by Phoebe A. Hearst Museum of Anthropology professional staff in consultation with representatives of the Confederated Tribes of the Warm Springs Reservation of Oregon.

In 1926, human remains representing at least 24 individuals were excavated from site 45KL242, also known as Millers Island site 20 and 21, Klickitat County, WA, by Dr. Julian H. Steward and donated the same year to the Phoebe A. Hearst Museum of Anthropology by H.J. Biddle. No known

individuals were identified. The 1,610 associated funerary objects are bracelets, metal fragments, copper fragments, copper tubes, copper pendants, copper pendant fragments, copper buttons, iron fragments, wooden pins, glass beads, ochre-stained leather fragments, matting fragments, board fragments, basketry fragments, shell beads, shell pendants, dentalium shells, a bark fragment with copper, tube pipes, bone buttons, bone point fragments, bone implement fragments, bear claws, an incised tooth pendant, whalebone war club handles and fragments, bone gaming sticks and fragments, bone carvings and fragments, an ivory pendant, metal buttons, Phoenix metal buttons, arrow points, a mortar and pestle, a stone dish, ochre fragments, awl fragments, a carved lava fragment, headdress fragments and carvings, rock fragments, and an iron tomahawk head.

The style of manufacture of associated funerary objects and burial contexts indicate that the human remains are of Native American individuals. The presence of items of Euroamerican manufacture date the burials to the 19th century. The site is located within the aboriginal territory of the Confederated Tribes of Warm Springs, specifically the Tenino, based on the territory described in Volume 12 of the Handbook of North American Indians.

Officials of the Phoebe A. Hearst Museum of Anthropology have determined that, pursuant to 25 U.S.C. 3001 (9–10), the human remains described above represent the physical remains of at least 24 individuals of Native American ancestry. Officials of the Phoebe A. Hearst Museum of Anthropology also have determined that, pursuant to 25 U.S.C. 3001 (3)(A), the 1,610 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Phoebe A. Hearst Museum of Anthropology have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Confederated Tribes of the Warm Springs Reservation of Oregon.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact C. Richard Hitchcock, NAGPRA Coordinator, Phoebe A. Hearst Museum of Anthropology, University of California, Berkeley, Berkeley CA 94720, telephone (510) 642-6096, before

November 7, 2003. Repatriation of the human remains and associated funerary objects to the Confederated Tribes of the Warm Springs Reservation of Oregon may proceed after that date if no additional claimants come forward.

The Phoebe A. Hearst Museum of Anthropology is responsible for notifying the Confederated Tribes of the Warm Springs Reservation of Oregon that this notice has been published.

Dated: August 27, 2003.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: UCLA Fowler Museum of Cultural History, University of California, Los Angeles, Los Angeles, CA, and California Department of Parks and Recreation, Sacramento, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects in the possession of the UCLA Fowler Museum of Cultural History, University of California, Los Angeles, Los Angeles, CA, and in the control of the California Department of Parks and Recreation, Sacramento, CA. The human remains and associated funerary objects were removed from Anza-Borrego Desert State Park, San Diego County, CA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations within this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations within this notice.

A detailed assessment of the human remains was made by UCLA Fowler Museum of Cultural History and California Department of Parks and Recreation professional staff in consultation with members of the Kumeyaay Cultural Repatriation Committee, authorized NAGPRA representative of the Barona Group of Capitan Grande Band of Mission Indians

of the Barona Reservation, California; Campo Band of Diegueno Mission Indians of the Campo Indian Reservation, California; Cuyapaipe Community of Diegueno Mission Indians of the Cuyapaipe Reservation, California; Inaja Band of Diegueno Mission Indians of the Inaja and Cosmit Reservation, California; Jamul Indian Village of California; La Posta Band of Diegueno Mission Indians of the La Posta Indian Reservation, California; Manzanita Band of Diegueno Mission Indians of the Manzanita Reservation, California; Mesa Grande Band of Diegueno Mission Indians of the Mesa Grande Reservation, California; San Pasqual Band of Diegueno Mission Indians of California; Santa Ysabel Band of Diegueno Mission Indians of the Santa Ysabel Reservation, California; Sycuan Band of Diegueno Mission Indians of California; and Viejas (Baron Long) Group of Capitan Grande Band of Mission Indians of the Viejas Reservation, California.

In 1958, human remains representing a minimum of five individuals were removed from five cremation sites (SDI-335, SDI-359, SDI-379, SDI-434, and SDI-526) in Anza-Borrego Desert State Park, San Diego County, CA, by Dr. Clement Meighan. No known individuals were identified. The 675 associated funerary objects are 3 basket fragments, 56 shell beads, 2 glass beads, 4 chipped stones, 1 deer bone, 1 worked bone, 41 flakes, 1 bag of cordage fragments, 1 bag of shell fragments, 9 shell ornaments and pendants, 1 haliotis shell fragment, 1 obsidian point, 553 ceramic sherds, and 1 bifacial mano.

In 1959, human remains representing a minimum of three individuals were removed from the Angelina Springs cremation site (SDI-453) in Anza-Borrego Desert State Park, San Diego County, CA, by Joan Townsend, a University of California, Los Angeles anthropology student. No known individuals were identified. The four associated funerary objects are one burned steatite pipe, one bag of steatite fragments, one bag of charcoal fragments, and one bag of burned animal bones.

The collections described above were made during a survey of the Anza-Borrego Desert State Park, supervised by Dr. Clement Meighan of the University of California, Los Angeles and supported by the California Department of Parks and Recreation. According to Dr. Meighan, in a 1959 article "Archaeological Resources of Borrego Desert State Park," the sites from which the cultural items were removed are located in an area formerly occupied by two Yuman groups, the Northern
