SUPPLEMENTARY INFORMATION:

I. Abstract

Owners of vessels that fish for tuna in the eastern Pacific Ocean (bounded by the coast of the Americas, 40° N. lat., 40° S. lat., and 150° W. long.) were required to submit information about their fishing vessels in 2000 so that the United States could provide information for a vessel register being compiled under the terms of an Inter-American Tropical Tuna Commission (IATTC) recommendation approved by the Department of State under the Tuna Conventions Act. The National Marine Fisheries Service used existing sources of information to obtain most of the information needed, but vessel owners were required to provide some information as well as a picture of the vessel with its registration number showing. The vessel register is needed to support uniform monitoring of compliance with IATTC conservation and management recommendations that are implemented by member governments, including the United States. Once the initial information was provided, the only reporting requirement was to report changes in vessel characteristics, ownership or other information on the form. It is estimated that no more than 30 vessel owners would be subject to this requirement in any year. In addition, it is estimated that 20 reports will be needed annually for new vessels to be placed on the register.

II. Method of Collection

Paper forms and pictures are submitted.

III. Data

OMB Number: 0648-0431.

Form Number: None.

Type of Review: Regular submission.

Affected Public: Business or other for-profit organizations.

Department of the Army; Corps of Engineers

The Release of the Draft Environmental Impact Statement and the Announcement of a Public Hearing for the Relocation of Bogue Inlet Channel Between Emerald Isle and Hammocks Beach State Park, and the Placement of the Dredged Material onto Emerald Isle Beach, in Carteret County, NC

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice

SUMMARY: The U.S. Corps of Engineers (COE), Wilmington District, Wilmington Regulatory Field Office has received a request for Department of the Army authorization, pursuant to section 404 of the Clean Water Act and section 10 of the Rivers and Harbor Act, from the Town of Emerald Isle for the relocation of Bogue Inlet Channel to protect residential homes and town infrastructures, and to place the dredged material on approximately 5.0 miles of beach for nourishment. The project is being proposed to move the main ebb channel in Bogue Inlet to a more central location between the west end of Bogue Banks and the east end of Bear Island (Hammocks Beach State Park). The main ebb channel through Bogue Inlet presently occupies a position juxtaposed to the west end of the Town of Emerald Isle and is causing severe erosion that threatens development in the subdivision known as The Pointe.

The relocation of the main ebb channel to a central location would restore the channel to a position it occupied in the late 1970s and eliminate the erosive impact of tidal currents on the east shoulder of the inlet. A portion of the material removed to relocate the main ebb channel would be used to close the existing channel with the balance of the material used to nourish the shoreline on the west end of the Town of Emerald Isle.

The channel through Bogue Inlet has been maintained by the COE for commercial and recreational boating interest since 1981. The COE is authorized to maintain the channel to a depth of 8 feet mean low water (mlw) over a width of 150 feet. Any changes in the location of the ebb tide delta channel would be consistent with this maintenance criteria.

DATES: The public hearing will be held at the Emerald Isle Parks and Recreation Community Center, at 7500 Emerald Isle Drive, in Emerald Isle, on December 8, 2003 at 6:30 p.m. Written comments on
