DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: HHS/ACF Rural Welfare-to-Work Strategies Demonstration Evaluation Project 30-Month Survey.

OMB No.: New Collection.

Description: The Rural Welfare-to-Work Strategies Demonstration Evaluation Project, which was developed and funded by the Administration for Children and Families (ACF) of the U.S. Department of Health and Human Services (HHS), is a national evaluation to determine the benefits and cost-effectiveness of methods designed to aid current or former Temporary Assistance for Needy Families (TANF) recipients or other low-income families as they transition from welfare to the employment arena. This evaluation addresses four research questions:

- What are the issues and challenges associated with operating the new welfare-to-work services and policy approaches being studied?
- How effective are the welfare-to-work programs under the project in increasing employment and earnings and in improving other measures?
- What are the net costs of the welfare-to-work programs, and do the programs' benefits outweigh the costs?
- What approaches should policymakers and program managers consider in designing strategies to improve the efficacy of welfare-to-work strategies for families in rural areas?

The evaluation employs a multi-pronged approach to answer the research questions. These approaches include: (1) An impact study, which will examine the differences between control and intervention groups with respect to factors such as employment rates, earnings, and welfare receipt; (2) a cost-benefit analysis, which will calculate estimates of net program cost-effectiveness; and (3) an in-depth process study, which will identify implementation issues and challenges, examine program costs, and provide details on how programs achieve observed results. The data collected during the conduct of this study will be used for the following purposes:

- To study rural welfare-to-work programs' effects on factors such as employment, earnings, educational attainment, and family composition;
- to collect data on a wider range of outcome measures—such as job acquisition, retention, and advancement; job quality; educational attainment; and employment barriers—than is available through welfare or unemployment insurance records, in order to understand how individuals are being affected by the demonstration programs;
- to support research on the implementation of welfare-to-work programs across sites;
