DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement for a Proposed Mill Creek Watershed Plan Including Potential Flood Damage Reduction Measures and Ecosystem Restoration, Davidson County, TN

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The Corps of Engineers, Nashville District, is preparing a Draft Environmental Impact Statement (DEIS) for a proposed Mill Creek Watershed Plan that includes Flood Damage

Reduction and Ecosystem Restoration Alternatives. The Corps of Engineers is studying the possible impacts of maintaining, modifying, or adding to existing aquatic, riparian, and terrestrial habitat in combination with potential flood damage reduction measures. Forecasts of future development, floodplain management, stream habitat, endangered species protection, stream bank stabilization, storm water management, and water quality could be made to assess possible cumulative impacts for each of these resources within the watershed.

DATES: Written scoping comments on issues to be considered in the DEIS will be accepted by the Corps of Engineers until January 1, 2004.

ADDRESSES: Scoping comments should be mailed to: Ms. Joy Broach, Biologist, Project Planning Branch, Nashville District Corps of Engineers, PO Box 1070 (PM-P), Nashville, TN 37202-1070, or may be e-mailed to joy.i.broach@lrn02.usace.army.mil.

FOR FURTHER INFORMATION CONTACT: For additional information concerning the proposed action and DEIS, please contact Ms. Sue Ferguson, Project Manager, Project Planning Branch, (615) 736-7192.

SUPPLEMENTARY INFORMATION:

1. Study authority was granted by a resolution of the U.S. House Committee on Transportation and Infrastructure adopted September 14, 1995. The DEIS is necessary to provide National Environmental Policy Act (NEPA) compliance for proposed changes to the water quality, aquatic, riparian, and terrestrial habitat, and potential flood damage reduction measures within Mill Creek and its tributaries. Historical information regarding flooding, landuse, aquatic, and terrestrial ecology would be used as a baseline and has been described in previous NEPA documents including the 1986 report: *Metro Region of Nashville, Tennessee, Mill Creek, Final Interim Feasibility Report and Environmental Impact Statement*. The Nashville Metropolitan Water Services is the sponsor for this project.

2. The Mill Creek watershed has had a history of floods dating 1979, 1984, 1998, 2000, and 2003 that have endangered residents and have resulted in millions of dollars of flood related damage. Continued development within the watershed, has increased the flood potential and associated cost of damages. The intent of the DEIS is to provide NEPA compliance for changes in hydraulics and hydrology that could occur with implementation of any flood reduction measure. These measures could include detention ponds, swales,
