

Order and Further Notice of Proposed Rulemaking ("Order"), *In the Matter of Digital Broadcast Content Protection*, MB Docket No. 02-230, FCC 03-273. The Order establishes a redistribution control content protection system for digital broadcast television in order to prevent the widespread indiscriminate redistribution of high value digital broadcast content and to assure the continued availability of such content to broadcast outlets. The Order adopts use of an ATSC flag, which can be imbedded in DTV content to signal to consumer electronics devices to protect such content from indiscriminate redistribution.

In order for this protection system to work, demodulators integrated within, or produced for use in, DTV reception devices, including PC and IT products, ("Covered Demodulator Products") must recognize and give effect to the ATSC flag pursuant to certain compliance and robustness rules. In particular, content that is marked with the ATSC flag must be handled in a protected fashion through the use of digital content protection and recording technologies. In order to ensure that digital content is being adequately protected, such technologies must be reviewed and approved for use. The Order establishes interim procedures by which proponents of digital content protection and recording technologies can certify to the Commission that such technologies are appropriate for use in Covered Demodulator Products, subject to public notice and comment.

To facilitate enforcement and compliance, the Order adopts a written commitment regime whereby manufacturers or importers of ATSC demodulators obtain from buyers of such products a written commitment that they will incorporate such demodulators into compliant and robust devices or sell or distribute to third parties that have also made such written commitment. The Order also adopts a written commitment regime to ensure that manufacturers or importers of Peripheral TSP Products (products where the demodulator and transport stream processor are physically separate) will abide by the Demodulator Products compliance and robustness rules.

The interim approval process for digital content protection and recording technologies and the written commitment regime are essential components of the Commission's redistribution control content protection system for digital broadcast television. These information collections ensure objectivity and transparency as a part of this process.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Federal Financial Participation in State Assistance Expenditures; Federal Matching Shares for Medicaid, the State Children's Health Insurance Program, and Aid to Needy Aged, Blind, or Disabled Persons for October 1, 2004 Through September 30, 2005

AGENCY: Office of the Secretary, DHHS.

ACTION: Notice.

SUMMARY: The Federal Medical Assistance Percentages and Enhanced Federal Medical Assistance Percentages for Fiscal Year 2005 have been calculated pursuant to the Social Security Act (the Act). These percentages will be effective from October 1, 2004 through September 30, 2005. This notice announces the calculated "Federal Medical Assistance Percentages" and "Enhanced Federal Medical Assistance Percentages" that we will use in determining the amount of Federal matching for State medical assistance (Medicaid) and State Children's Health Insurance Program (CHIP) expenditures, and Temporary Assistance for Needy Families (TANF) Contingency Funds, the federal share of Child Support Enforcement collections,

Child Care Mandatory and Matching Funds of the Child Care and Development Fund, Foster Care Title IV-E Maintenance payments, and Adoption Assistance payments. The table gives figures for each of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. Programs under title XIX of the Act exist in each jurisdiction; programs under titles I, X, and XIV operate only in Guam and the Virgin Islands; while a program under title XVI (Aid to the Aged, Blind, or Disabled) operates only in Puerto Rico. Programs under title XXI began operating in fiscal year 1998. The percentages in this notice apply to State expenditures for most medical services and medical insurance services, and assistance payments for certain social services. The statute provides separately for Federal matching of administrative costs.

Sections 1905(b) and 1101(a)(8)(B) of the Act require the Secretary of Health and Human Services to publish the Federal Medical Assistance Percentages each year. The Secretary is to figure the percentages, by formulas in sections 1905(b) and 1101(a)(8)(B), from the Department of Commerce's statistics of average income per person in each State and in the Nation as a whole. The percentages are within the upper and lower limits given in section 1905(b) of the Act. The percentages to be applied to the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands are specified in statute, and thus are not based on the statutory formula that determines the percentages for the 50 states.

The "Federal Medical Assistance Percentages" are for Medicaid. Section 1905(b) of the Act specifies the formula for calculating Federal Medical Assistance Percentages as follows:

"Federal medical assistance percentage" for any State shall be 100 per centum less the State percentage; and the State percentage shall be that percentage which bears the same ratio to 45 per centum as the square of the per capita income of such State bears to the square of the per capita income of the continental United States (including Alaska) and Hawaii; except that (1) the Federal medical assistance percentage shall in no case be less than 50 per centum or more than 83 per centum, (2) the Federal medical assistance percentage for Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa shall be 50 per centum.

A provision in the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of
