II	Free Trade Agreements—Chile and Singapore, and Trade Agreements Thresholds (Interim)	2003–016	Davis.

SUPPLEMENTARY INFORMATION:

Summaries for each FAR rule follow. For the actual revisions and/or amendments to these FAR cases, refer to the specific item number and subject set forth in the documents following these item summaries.

FAC 2001–19 amends the FAR as specified below:

**Item I—New Consolidated Form for
Selection of Architect-Engineer
Contractors (FAR Case 2000–608A)**

This amendment to final rule, FAR Case 2000–608, New Consolidated Form for Selection of Architect-Engineer Contractors, changes the effective date from January 12, 2004, to June 8, 2004. This final rule was published in FAC 2001–018 in the **Federal Register** at 68 FR 69227, December 11, 2003. This amendment also eliminates the reference to an applicability date. By changing the effective date, it allows the users of the SF 330 more time to prepare before the SF 330 is effective.

**Item II—Free Trade Agreements—Chile
and Singapore, and Trade Agreements
Thresholds (Interim) (FAR Case 2003–
016)**

This interim rule amends FAR parts 5, 12, 13, 14, 17, 19, 22, 25, and 52 to implement new Free Trade Agreements with Chile and Singapore, as approved by Congress (Public Laws 108–77 and 108–78). These Free Trade Agreements are scheduled to go into effect January 1, 2004. Singapore is already a designated country under the Trade Agreements Act, but Chile was not previously a designated country. The threshold under these Free Trade Agreements for acquisition of end products and services is \$58,550 and the threshold for construction contracts is

\$6,725,000. In acquisitions that exceed these thresholds and are subject to trade agreements, this rule allows the acquisition of end products or construction material from Chile or Singapore without application of the Buy American Act, and provides for certain procedures in the acquisition of services, unless the service is excluded from coverage by the trade agreement. The interim rule directs the contracting officer to determine the origin of a service by the country in which the firm providing the services is established. The interim rule also implements new dollar thresholds for application of trade agreements, as published by the U.S. Trade Representative in the **Federal Register** at 68 FR 70861, December 19, 2003. Contracting officers must review the new thresholds in order to select the appropriate clauses to implement the Buy American Act, trade agreements, and sanctions of European Union country end products and services.

Dated: December 30, 2003.

Director, Acquisition Policy Division.

SUPPLEMENTARY INFORMATION:

A. Background

An interagency ad hoc committee developed the SF 330.

It was based on the results of a joint Federal-industry survey of the existing Standard Forms (SFs) 254, Architect-Engineer and Related Services Questionnaire, and 255, Architect-Engineer and Related Services Questionnaire for Specific Project, conducted by the Standing Committee on Procurement and Contracting of the Federal Facilities Council (FCC) in 1995 and published in 1996 as FCC Report Number 130, entitled “Survey on the Use of Standard Forms 254 and 255 for Architect-Engineer Qualifications.” The survey’s purpose was to evaluate the current use of the forms which are used for the submission of qualifications by architect-engineer (A–E) firms interested in Federal contracts, and to identify possible improvements which would enable the existing forms to better serve the needs of Federal agencies and the A–E industry. The SFs 254 and 255 have changed little since their introduction in 1975, although the variety of A–E services has greatly expanded and new technologies have dramatically changed the way A–E firms do business. The report states that Federal agencies and A–E industry overwhelmingly support a structured

format for submitting A–E qualifications, because the structured format saves time and effort and allows efficient and consistent evaluations. It also recommends many specific changes to the existing forms to enhance their effectiveness and simplify their use. Both Federal and A–E industry practitioners believe that the forms need streamlining as well as updating to facilitate electronic usage. The objectives of the SF 330 are to merge the SFs 254 and 255 into a single streamlined form, expand essential information about qualifications and experience, reflect current architect-engineer disciplines, experience types and technology, eliminate information of marginal value, permit limitations on submission length, and facilitate electronic usage. A proposed FAR rule for a new Architect-Engineer Qualifications form was published in the **Federal Register** at 66 FR 53314, October 19, 2001. The final rule replaces SFs 254 and 255 with SF 330, and makes related FAR revisions in 1.106, 36.603, 36.702, 53.236–2, 53.301–254, 53.301–255, and 53.301–330. Use of the SF 330 becomes effective June 8, 2004. Agencies are to continue to use SFs 254 and 255 until the SF 330 is effective.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act analysis was completed and addressed in the final rule published in the **Federal Register** at 68 FR 69227, December 11, 2003.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 104–13) applies; however, this information was provided in the final rule published in the **Federal Register** at 68 FR 69227, December 11, 2003.
