II. Background

The Department of Labor, as part of its continuing effort to reduce paperwork

and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)).

This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is correct. The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

The Standard specifies several paperwork requirements. The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of each of these requirements is to prevent employees from using unsafe cranes and ropes, thereby reducing their risk of death or serious injury caused by a crane or rope failure during material handling.

(A) Inspection Records (§ 1910.180(d)(6))

This paragraph specifies that employers must prepare a written record to certify that the monthly inspection or critical items in use on cranes (such as brakes, crane hooks, and ropes) has been performed. The certification record must include the inspection date, the signature of the person who conducted the inspection, and the serial number (or other identifier) of the inspected crane. Employers must keep the certificate readily available. The certification record provides employers, employees, and OSHA compliance officers with assurance that critical items on cranes have been inspected, and that equipment is in good operating condition, so that the crane and rope will not fail during material handling. These records also enable OSHA to determine that an employer is complying with the Standard.

(B) Rated Load Tests (§ 1910.180(e)(2))

This provision requires employers to make available written reports of load-rating tests showing test procedures and confirming the adequacy of repairs or alterations, and to make readily available any rerating-test reports. These reports inform the employer, employees,
