

from mining and grazing and compare the environmental impacts of alternatives. The FEIS should also include detailed mitigation measures to protect aquatic resources.

ERP No. D-COE-E09810-MS Rating LO, Enhanced Evaluation of Cumulative Effects Associated with U.S. Army Corps of Engineers Permitting Activity for Large-Scale Development in Coastal Mississippi, Mississippi, Hancock, Harrison and Jackson Counties, MS.

Summary: While EPA has no objections to the proposed project, EPA did request clarification on the recreation and parking improvements proposed as part of the project.

ERP No. D-COE-L01009-ID Rating EC2, Emerald Creek Garnet Project, Proposal to Mine Garnet Reserves within the St. Maries River Floodplain near Fernwood, Walla Walla District, Issuance of Several Permits, Benewah and Shoshone Counties, ID.

Summary: EPA expressed concerns over the potential impacts of mining proposals on water quality. EPA recommends that adequate mitigation and reclamation be implemented to move the St. Maries River towards its designated beneficial uses. EPA also expressed concern over alternatives that do not avoid ecologically valuable oxbow complexes and recommended that if an alternative is selected that does not avoid oxbows, additional mitigation measures be implemented to ensure the long-term protection and restoration of wetland functions.

ERP No. D-USA-K11111-HI Rating EC2, Transformation of the 2nd Brigade, 25th Infantry Division (Light) to a Stryker Brigade Combat Team in Hawaii, Implementation, Honolulu and Hawaii Counties, HI.

Summary: EPA raised concerns that the project exceeds the Federal Air Quality Standard for particulate matter less than 10 microns in diameter (fugitive dust) from training operations. Although the DEIS offers mitigation for fugitive dust emissions, it does not quantify reductions expected from controls nor a commitment to implement such mitigation. The Final EIS should evaluate the feasibility of monitoring at sites where the Federal standard is exceeded, and adopting additional mitigation if needed. EPA raised concerns that increased fugitive dust levels may have a disproportionately high adverse effect on low-income or minority populations when transported offsite.

ERP No. DS-COE-C39016-PR Rating EO2, Port of the Americas Project, Additional Information on the Development of a Deep-Draft Terminal at the Port of Ponce to Receive Post-

Panamax Ships, COE Section 10 and 404 Permits, Municipalities of Guyanilla-Penuelas and Ponce, Puerto Rico.

Summary: EPA believes that the permit applicant failed to adequately document compliance with the Clean Water Act Section 404(b)(1) Guidelines, and until further information is received, that the proposed discharges of fill material would have a substantial and unacceptable impact on aquatic resources of national importance. EPA recommended denial of the permit application for the project as currently proposed.

Final EISs

ERP No. F-FHW-J40158-MT I-15 Corridor Project, Transportation Improvements from Montana City to the Lincoln Road Interchange, Funding and U.S. Army COE Section 404 Permit Issuance, Jefferson and Lewis & Clark Counties, MT.

Summary: EPA has no objections to the preferred alternative.

ERP No. F-NOA-K91010-00 US West Coast Fisheries for Highly Migratory Species Fishery Management Plan (FMP), Approval and Implementation, Ocean Waters off the States of Washington, Oregon and California a portion of the Exclusive Economic Zone (EEZ), WA, OR and CA.

Summary: EPA continues to express concerns regarding bycatch and research actions needed to address information gaps.

Section 11(e)(2)(B) of the Bank Act (12 U.S.C. 1431(e)(2)(B)) requires the Finance Board to determine and regulate the charges the Banks must charge for these services.
