Federal Emergency Management Agency

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Federal Emergency Management Agency, Emergency Preparedness and Response Directorate, Department of Homeland Security.

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed continuing information collections. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), this notice seeks comments on the information FEMA requires to address close basin lake continuous flooding events. The information is required by FEMA regulation 44 CFR part 61, Appendix A(2), Standard Flood Insurance Policy, section VII., General Conditions, T., Continuous Lake Flooding and FEMA Policy Guidance for Closed-Basin Lakes.

SUPPLEMENTARY INFORMATION: The information collections for closed basin lake endorsement under the standard flood insurance policy allows policyholders to file a total loss claim for an insured building that is actually damaged or under imminent threat of flooding before the structure has been inundated 90 days by lake water. State, local and tribal governments and property owners must meet specific requirements set forth in FEMA regulatory and policy guidance before policyholders can qualify for insurance claim benefits.

Collection of Information

Title: Closed-Basin Lake Endorsement Requirements.

Type of Information Collection: Revision of a currently approved collection.

OMB Number: 1660–0050.

Abstract: A closed basin lake is a natural lake from which water leaves primarily through evaporation and whose surface area now exceeds or has exceeded one square mile at any time in the recorded past. FEMA Regional Directors shall determine that State, local and tribal governments satisfy the FEMA regulatory and policy guidance

(including that the local government or tribe has established new building restrictions and the State is providing the support needed to eliminate future flood losses) before policyholders can qualify for insurance claim benefits under the closed basin lake standard flood insurance policy endorsement.

The following information is required from State, local and tribal governments and property owners:

(1) A community, county, or other local jurisdiction must request in writing to the FEMA Regional Director, through the State National Flood Insurance Program (NFIP) Coordinating Agency, that a community or area be designated a “closed basin lake in order for homeowners and commercial interests to be eligible for a total loss claim under the closed basin lake standard flood insurance policy endorsement.

(2) State, local or tribal governments may request FEMA to amend the Flood Insurance Rate Map (FIRM) area of special consideration (ASC) to remove areas protected by the construction of additional certified flood control projects.

(3) State, local and tribal governments will conduct a risk assessment that:

(a) Identifies the number of structures at risk around the lake within the published ASC;

(b) Provides the current elevation of the structures and an assessment of insurance coverage;

(c) Identifies properties that have received previous flood insurance claim payments; and

(d) Identifies any new or ongoing construction within the published ASC.

(4) The State will enter into an agreement with FEMA prior to the provision of insurance claim payments. The agreement sets forth the actions the State will take to contribute to a permanent solution to the closed basin lake flooding problem and include the State’s acknowledgment that relocation and acquisition of structures and property in the ASC may become a priority use of HMGP funds. Commitments in this agreement must be reflected in future FEMA/State agreements for Presidential disaster declarations.

(5) Tribes and local governments must:

(a) Participate in the NFIP (approved under OMB Number 1660–0004);

(b) Develop, adopt, and enforce permanent land use ordinances, or a temporary moratorium for a period not to exceed 6 months to be followed by a permanent land use ordinance, which prohibits the construction of any
