FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Board of Governors of the Federal Reserve System (Board)

ACTION: Notice of information collection to be submitted to OMB for review and approval under the Paperwork Reduction Act of 1995.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the Board, the Federal Deposit Insurance Corporation (FDIC), and the Office of the Comptroller of the Currency (OCC) (the "agencies") may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The Board hereby gives notice that it plans to submit to the Office of Management and Budget (OMB) on behalf of the agencies a request for review of the information collection described below.

On December 5, 2003, the agencies, under the auspices of the Federal Financial Institutions Examination Council (FFIEC), requested public comment for 60 days on the revision,

without extension, of the currently approved information collection: the Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks (FFIEC 002). The comment period expired February 3, 2004.

Telecommunications Device for the Deaf (TDD) users may call (202) 263-4869.

SUPPLEMENTARY INFORMATION:

Proposal to revise the following currently approved collection of information:

Report Title: Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks.

Form Number: FFIEC 002.

OMB Number: 7100-0032

Frequency of Response: Quarterly

Affected Public: U.S. branches and agencies of foreign banks

Estimated Number of Respondents: 295

Estimated Total Annual Responses: 1,180

Estimated Time per Response: 22.75 burden hours

Estimated Total Annual Burden: 26,845 burden hours

General Description of Report: This information collection is mandatory: 12 U.S.C. 3105(b)(2), 1817(a)(1) and (3), and 3102(b). Except for select sensitive items, this information collection is not given confidential treatment (5 U.S.C. 552(b)(8)).

Abstract: On a quarterly basis, all U.S. branches and agencies of foreign banks (U.S. branches) are required to file detailed schedules of assets and liabilities in the form of a condition report and a variety of supporting schedules. This information is used to fulfill the supervisory and regulatory requirements of the International Banking Act of 1978. The data are also used to augment the bank credit, loan, and deposit information needed for monetary policy and other public policy purposes. The Federal Reserve System collects and processes this report on behalf of all three agencies.

Current Actions: In response to the December 5, 2003, notice (68 FR 68082), the agencies received one comment letter from a Federal Reserve district bank. The bank supported the proposed revisions and suggested some additional instructional clarifications with regard to repurchase agreements. These clarifications will be incorporated as appropriate.

The revisions to the FFIEC 002 have been approved by the FFIEC as originally proposed and are summarized below. The agencies will implement the changes as of the March 31, 2004, reporting date.

Schedule L—Derivatives and Off-Balance-Sheet Items

Modified Line Item 12, "Gross fair values of derivative contracts," to remove the following requirement: "The following items should be completed by those branches or agencies with total assets of \$100 million or more." The exemption from reporting the fair values of derivative contracts for branches and agencies with less than \$100 million in assets originated when derivatives were considered off-balance sheet items and predates FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities (FAS 133), which took effect

in 2001. FAS 133 requires all derivatives to be measured at fair value and reported on the balance sheet as assets or liabilities. Because branches and agencies with less than \$100 million in assets that have derivatives now have to regularly determine their fair value for reporting purposes, they have the information necessary to disclose the fair value of their derivatives in Schedule L. Accordingly, the agencies are eliminating this disclosure exemption. The fair value data on derivatives will complement the data that branches and agencies with less than \$100 million in assets currently report on the notional amount of their derivative contracts.

Schedule M—Due from/Due to Related Institutions in the U.S. and in Foreign Countries (CONFIDENTIAL)

1. Modified Line Item 12, "Gross fair values of derivative contracts," to remove the following requirement: "The following items should be completed by those branches or agencies with total assets of \$100 million or more." The rationale for the proposed change is similar to the justification above for the comparable change to Schedule L.

2. Added Memoranda items 1.a, "Gross positive fair value," and 1.b, "Gross negative fair value" to Memorandum item 1, "Notional amount of all credit derivatives on which the reporting branch or agency is the guarantor." The new items will provide a better measure of credit and market risk for credit derivatives entered into with related depository institutions, particularly for branches and agencies with large positions in such credit derivatives.

3. Added Memoranda items 2.a, "Gross positive fair value," and 2.b, "Gross negative fair value" to Memorandum item 2, "Notional amount of all credit derivatives on which the reporting branch or agency is the beneficiary." The rationale for the proposed change is the same as the justification above for adding items to Memorandum item 1.

Request for Comment

Comments submitted in response to this Notice will be shared among the agencies and will be summarized or included in the Board's request for OMB approval. All comments will become a matter of public record. Written comments should address the accuracy of the burden estimates and ways to minimize burden as well as other relevant aspects of the information collection requests. Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

(b) The accuracy of the agencies' estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start up costs and costs of operation, maintenance, and purchase of services to provide information.

Board of Governors of the Federal Reserve System, February 20, 2004.

Proposed Project: YMC Tracking Study (OMB No. 0920-0582)—Extension—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background

In FY 2001, Congress established the Youth Media Campaign at the Centers for Disease Control and Prevention (CDC). Specifically, the House Appropriations Language said: "The Committee believes that, if we are to have a positive impact on the future

health of the American population, we must change the behaviors of our children and young adults by reaching them with important health messages." CDC, working in collaboration with federal partners, is coordinating an effort to plan, implement, and evaluate a media campaign (Youth Media Campaign or YMC) designed to clearly communicate messages that will help kids develop habits that foster good health over a lifetime. The campaign is based on principles that have been shown to enhance success, including: designing messages based on research; testing messages with the intended audiences; involving young people in all aspects of campaign planning and implementation; enlisting the involvement and support of parents and other influencers; tracking the campaign's effectiveness and revising Campaign messages and strategies as needed.

In accordance with the original OMB approval (OMB No. 0920-0582, March 10, 2003), this request will continue to expand and enhance the ongoing monitoring of the campaign's penetration with the target audience. For the campaign to be successful, campaign planners must have mechanisms to determine the target audiences and the reaction to the campaign brand and messages as the campaign evolves. Campaign planners also need to identify which messages are likely to have the greatest impact on attitudes and desired behaviors. This approval contains 2 surveys: (1) VERB Continuous Tracking Study; and (2) Media Benchmarking Study.

The VERB Continuous Tracking Study has facilitated campaign planners' ability to continually assess and improve the effectiveness of the targeted communication and other marketing variables throughout the evolution of the campaign. It enables staff to determine which media channels are most-effective to optimize communication variables such as weight levels, frequency and reach components, and programming formats that will have the greatest effect upon communicating the desired message to the target audiences. Implementation of the survey has provided for efficient collection of campaign awareness and understanding levels on a continual basis.

The campaign uses a tracking methodology with specific time points, using age-targeted samples. Tracking methods may include, but are not limited to telephone surveys, telephone or in-person focus groups, web-based surveys, or intercept interviews with tweens (9-13 year olds), parents, other
