

II. Method of Collection

The data will be collected by telephone. Interviews with former current survey field representatives should take approximately seven (7) minutes. We estimate that interviews will be conducted with a total of 500 field representatives on a yearly basis. Approximately every month, a sample of one-half of all field representatives who voluntarily resigned within the period will be contacted by telephone to complete a BC-1294 questionnaire.

The form BC-1294(D) contains a few more questions related to decennial census working conditions, including the impact of proposed automation of some data collection operations. Interviews with former enumerators should take approximately ten (10) minutes. Initial hiring for the 2006 Test Census is scheduled to begin in 2005 for early operations. The 2010 Census Dress Rehearsal is scheduled for 2008, with initial hiring to begin in 2007. It is estimated that interviews will be conducted with 375 former enumerators in 2005, 2006, and 2007. Beginning approximately two weeks after the start of the 2006 Tests Census operations in 2005 (and in 2007 for the 2008 Dress Rehearsal), a sample of enumerators who have continuously been in a non-pay status for a period of two weeks will be contacted by telephone to complete a BC-1294(D) questionnaire.

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to J. Michael Stump or Tonika Butler, Bureau of the Census, 4700 Silver Hill Rd. Stop 5780, Room Number 1314, SFB #2, Washington, DC 20233-5780 and 301-763-1429.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Special Census Program is a reimbursable service offered and performed by the Census Bureau for the government of any state; county, city, or other political subdivision within a state, for the government of the District of Columbia, and for the government of any possession or area over which the U.S. exercises jurisdiction, control, or sovereignty, and other governmental units which require current population data between decennial censuses.

Many states distribute funds based on current population statistics. In addition, special census data are used by the local jurisdictions to plan new schools, transportation systems, housing programs, and water treatment facilities.

The Census Bureau will use the following forms to update addresses listed on the Census Bureau's Master Address File (MAF) and to enumerate populations in special censuses:

SC-1, Special Census Enumerator Questionnaire—This interview form will be used to collect special census data at regular housing units (HU).

SC-1(SUPP), Continuation Form for Enumerator Questionnaire—This interview form will be used to collect special census data at a regular HU when there are more than five members in a household.

SC-1(Telephone), Special Census Enumeration Questionnaire—This interview form will be used to collect special census data when a respondent calls the local special census office.

SC-2, Special Census Special Place Questionnaire—This interview form will be used to collect special census data at group quarters (GQ) in special places (SP) such as hospitals, prisons, boarding and rooming houses, campgrounds, hotels, college dormitories, military facilities, and convents.

SC-116, Group Quarters Enumeration Control Sheet—This page will be used by Special Census enumerators to list residents/clients at GQs.

SC-351, Group Quarters Initial Contact Checklist—This checklist will be used by enumerators to collect contact information and to determine the type of GQ.

SC-920, Address Listing Page—This page will include existing addresses from the MAF. Special Census enumerators will update these addresses, if needed, at the time of enumeration.

SC-921(HU), Housing Unit Add Page—This page will be used by enumerators to add HUs that are observed to exist on the ground and that are not contained on the address listing page.

SC-921(SP), Special Place/Group Quarter Add Page—This page will be used by enumerators to add SPs/GQs that are observed to exist on the ground and that are not reflected in the address listing page.

The Special Census Program will operate as a generic OMB clearance including a library of forms and the operational procedures that will be used for the many special censuses we anticipate conducting this decade. The Census Bureau will establish a reimbursable agreement with a variety of potential special census customers that are unknown at this time.

We will submit for OMB's review and approval, under cover of a change worksheet, any special-purpose questions requested by customers to be added to special census questionnaires.

II. Method of Collection

The Special Census Program will use the Census 2000 Update/Enumerate (U/E) methodology. Enumerators will canvass their assigned areas with an address register that contains addresses obtained from the MAF. Special Census enumerators will update the address information, as needed, based on their observation of HUs and/or SPs/GQs that exist on the ground. Additionally, enumerators will interview households at regular HUs and residents at GQs using the appropriate Special Census questionnaire.
