

produced do not comply with S6 of 49 CFR 571.205, Federal Motor Vehicle Safety Standard (FMVSS) No. 205, "Glazing materials." General Motors has filed an appropriate report pursuant to 49 CFR part 573, "Defect and Noncompliance Reports."

Pursuant to 49 U.S.C. 30118(d) and 30120(h), General Motors has petitioned for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of General Motors' petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Affected are a total of approximately 7,326 model year 2005 Chevrolet Corvette coupes equipped with removable transparent Targa roofs. S6, certification and marking, of FMVSS No. 205 and the referenced Section 7 of ANSI/SAE Z26.1-1996 specify that the required identification and certification markings must be located on the glazing. On the subject vehicles, the required markings are present, but they are located on the frame of the Targa roof assembly, rather than on the glazing portion of the roof assembly.

General Motors believes that the noncompliance is inconsequential to motor vehicle safety and that no corrective action is warranted. The petitioner states:

- The subject glazing meets all applicable performance requirements of FMVSS No. 205. There is no safety performance implication associated with this technical noncompliance.
- The certifications markings required by FMVSS No. 205 are provided on the frame of the subject Corvette Targa roof assemblies. This noncompliance relates only to the location of the required markings, not to their presence.
- Once assembled, the Targa roof frame and glazing are indivisible. For in-service repair, the roof assembly (glazing mounted in frame) is serviced as a unit. There is no service provision to replace only the frame or only the glazing. As a practical matter, therefore, marking the frame is functionally equivalent to marking the glazing.
- Given the small volume of service parts that will be needed and the high investment cost required to manufacture the subject Corvette roof assemblies, it is probable that all service parts will be manufactured by the same supplier as the original equipment parts. Accordingly, there is virtually no chance of uncertainty about the manufacturer of the subject parts, should a need to identify the manufacturer arise in the future.
- GM is not aware of any crashes, injuries, customer complaints or field reports associated with this condition.

General Motors also states that NHTSA has previously granted inconsequential noncompliance petitions involving the omission of FMVSS No. 205 markings and provides the following examples: Western Star Trucks (63 FR 66232, 12/1/1998), Ford Motor Company (64 FR 70116, 12/15/1999), Toyota Motor Corporation (68 FR 10307, 3/4/2003), and Freightliner LLC (68 FR 65991, 11/24/2003).

Interested persons are invited to submit written data, views, and arguments on the petition described above. Comments must refer to the docket and notice number cited at the beginning of this notice and be submitted by any of the following methods. Mail: Docket Management Facility, U.S. Department of Transportation, Nassif Building, Room PL-401, 400 Seventh Street, SW., Washington, DC 20590-0001.
