Any person desiring to intervene or to protest in any of the above proceedings

must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other and the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). [Docket Nos. CP05-144-000, CP05-150-000, CP05-151-000, CP05-152-000]

Columbia Gas Transmission Corporation, Hardy Storage Company, LLC; Notice of Availability of the Environmental Assessment for the Proposed Hardy Storage and Transmission Projects

August 5, 2005.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline and aboveground facilities proposed by Columbia Gas Transmission Corporation (Columbia) and Hardy Storage Company, LLC (Hardy LLC) in the above referenced dockets.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential effects of the proposed Hardy Storage and Transmission Projects. As part of the Hardy Storage Project, Hardy LLC would install approximately 36.8 miles of natural gas transmission pipeline and associated aboveground facilities (three repeater towers, five cathodic protection ground beds, and a methanol injection system) in Hardy and Hampshire Counties, West Virginia. In addition, Hardy LLC would convert 12 existing, inactive production wells into storage wells, recondition 3 existing production wells into observation wells, drill 14 new storage wells, install 26 new well lines, and construct the new 7,100-horsepower Hardy Compressor Station.

In conjunction with the Hardy Storage Project (as the separate Hardy Transmission Project), Columbia would install three segments of new 24-inch diameter loop¹ (totaling approximately 30.2 miles) in Shenandoah, Rockingham, Page, and Greene Counties, Virginia, along Columbia's existing WB-2-VA line. Columbia would also install a new 2.6-mile segment of 14-inch-diameter loop along Columbia's existing VM-107 and VM-108 lines in Louisa County, Virginia,

¹ A loop is a segment of pipeline that is installed adjacent to an existing pipeline and is connected to it on both ends. The loop allows more gas to be moved through the pipeline system.
