

- A 90-day subchronic inhalation toxicity study.
- A 14-day dermal toxicity study.
- Genotoxicity (gene mutation and chromosomal effects) studies.

The second phase (program review testing) consisted of:

- A developmental toxicity study.
- An *in vitro* dermal penetration study.

Test results from the first and second phases are contained in the docket for this testing action. Whether or not a third phase of testing would be required that would focus on *in vivo* dermal penetration rate testing is to be determined by EPA, with input from CPSC, after its review of the program's test results, recommendations submitted by the DBEs Group and any comments received from the public in response to this notice.

C. What Did the DBEs Group Recommend Regarding Phase 3 Testing?

Following the submission of test results obtained under phase 2 testing, the DBEs Group submitted its recommendation in a letter dated May 14, 2003, arguing that *in vivo* dermal penetration rate testing was not needed (See Dibasic Esters Group. Letter concerning the need for additional dermal studies involving DBEs submitted to the TSCA Public Docket Office, EPA May 14, 2003). The DBEs Group stated the following in support of its position: "Since the 14-day dermal study confirmed a lack of systemic toxicity in rats, and given that the *in vitro* dermal study established that DBEs, when applied alone as a single solvent system or as part of a 1:3:1 blend [DMS:DMG:DMA], penetrated rat skin significantly faster compared to human skin, the DBEs Group has concluded that it is unnecessary to conduct additional dermal experiments with DBEs. The DBEs Group does recognize that had systemic toxicity been noted in the 14-day dermal study, accompanied by target organ effects, an *in vivo* dermal study using radio[¹⁴C]-labeled DBE could be justified, exclusive of the *in vitro* dermal penetration rate differences reported for rat and human skin."

III. What Will Occur Once Program Review Has Been Completed?

The primary outcome of the program review will be an EPA decision on whether or not the DBEs Group should proceed to sponsor *in vivo* dermal penetration rate testing, and, if so, the specific protocol that would be followed in such testing, including the identification of the DBEs or DBE mixture to be studied. On completing its review, including the consideration of

comments submitted in response to this notice, EPA will notify the DBEs Group of its decision regarding phase 3 testing by letter, which will also be entered in the public docket.

Accordingly, EPA specifically requests public comment on the need for, and, if there is thought to be a need, the specific nature of, *in vivo* dermal penetration rate testing for individual DBEs or mixtures of DBE. Comments that support such testing should provide a clear rationale for such testing and specify how the testing should be conducted, identifying test species and target organ(s), if appropriate. EPA understands that the 1:3:1 [DMS:DMG:DMA] blend of DBEs is a mixture common to many DBE-containing consumer products and industrial solvent products and was the subject of some of the tests conducted under the first two phases of ECA testing.

GENERAL SERVICES ADMINISTRATION

Office of Transportation and Property Management; The Third Annual AMSA and GSA Household Goods and Freight Forum

AGENCY: Federal Supply Service, General Services Administration

ACTION: Notice.

SUMMARY: The General Services Administration (GSA) will hold its third annual Household Goods and Freight Forum on February 22–23, 2006 at the Hyatt Regency, Orange County, Garden Grove (Anaheim) California. This event is co-sponsored by the American Moving and Storage Association (AMSA). *Creating Best Value Solutions*

is the theme for this 2006 transportation forum. GSA and its partners have planned educational and instructive sessions. Join Traffic Managers, Relocation Specialists, Freight Specialists, Financial Analysts, Contracting Officers, Transportation Policy Specialists, Administrative Support Personnel, and others managing or impacting transportation and relocation processes within their organizations. Receive the most recent training on freight and household goods transportation issues, relocations changes and updates, and technology enhancements. Also learn more about GSA's proposed rule that requires employees whose duties involve procuring transportation services (including rate tender procurements) to be properly certified and authorized in writing to obligate government funds. Attendees will have the opportunity to interface with industry leaders and government experts. Find solutions that create best value for your organization and hear how other agencies were able to achieve this goal within their organizations. The vendor exhibits will feature the latest technology, products, and services. Federal agencies may learn more about the Household Goods and Freight Forum and register at <http://www.gsa.gov/hhgfrtforum>. Industry registration is at www.promover.org. **FOR FURTHER INFORMATION CONTACT:** Lynn Ju, Federal Supply Services, at (703) 605–2889, or by email to lynnette.ju@gsa.gov.
