#### **Proposed Information Collection; Comment Request; Atlantic Highly Migratory Species Observer Notification Requirements**

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA).

**ACTION:** Notice.

Silver Spring, MD 20910 (phone 301-713-2347).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Abstract**

Under current regulations NMFS may select for observer coverage any fishing trip by a vessel that has a permit for Atlantic Highly Migratory Species (HMS). NMFS notifies vessel owners, in writing, when their vessels have been selected. The owners of those vessels are then required to notify NMFS before commencing any fishing trip for Atlantic HMS. This notification allows NMFS to arrange for observer placements and assignments. The notification may be made by phone, fax, or in writing prior to each trip for which a vessel is selected. A form is provided by NMFS for written responses. It is estimated that it would require approximately two minutes to provide the response. The estimated number of responses exceeds the number of respondents due to multiple trips taken within a particular season.

The vessels are selected randomly from a list of active vessels that have reported landings of targeted species during the previous year. Observers are placed aboard vessels to collect, among other things, information on species caught, catch disposition, gear, effort, and bycatch. The information is used in stock assessments, to estimate rates of bycatch of non-targeted and protected species such as sea turtles, and to improve overall management of the fishery. A Biological Opinion (BiOp) issued on June 1, 2004, under the Endangered Species Act, requires a minimum of eight percent observer coverage in the pelagic longline fishery. The shark bottom longline observer program has set a target of five percent observer coverage in the shark bottom longline fishery. A BiOp issued in October 2003, requires NMFS to maintain or increase this level of observer coverage. Observer coverage for the shark gillnet fishery fluctuates from approximately 50 percent to 100 percent, depending on the time of year. Vessels operating in other HMS fisheries are not observed currently but are subject to observer coverage under the regulations. Burden estimates include a ten percent adjustment upward from current levels to account for future expansion of other fisheries.

##### **II. Method of Collection**

Notification can be made by phone, fax, or letter.
