SUPPLEMENTARY INFORMATION:

Title: Locatable Minerals.

OMB Number: 0596-0022.

Expiration Date of Approval: July 31, 2005.

Type of Request: Extension with no revision.

Abstract: This collection of information is necessary to ensure that the environmental impacts associated with locatable mineral operations on National Forest System lands are minimized to the extent practicable. The Forest Service regulations at 36 CFR 228.5 require operators, with some exceptions, to submit a Notice of Intent or a Plan of Operations for conducting locatable minerals operations on National Forest System lands. The information that an operator must provide in a Plan of Operations is set out in 36 CFR 228.4(c), (d), and (e). The content of a Notice of Intent is described in 36 CFR 228.4(a)(2), and the content regarding Cessation of Operations is described in 36 CFR 228.10. Paragraph (g) of 36 CFR 228.4 displays the OMB number assigned to the information collection associated with locatable mineral operations.

Mineral operators notify the authorized Forest Service officer of their intention to conduct a locatable mineral operation on National Forest System lands by filing either a Notice of Intent or a Plan of Operations. No specific format is required for the information collection, but the form, FS-2800-5, Plan of Operations for Mining Activities on National Forest System lands, is available for use by the operators.

A Plan of Operations includes the following information: (1) The name and legal mailing address of operators (and claimants if they are not the operators) and their lessees, assigns, or designees; (2) a map or sketch showing information sufficient to locate the proposed area of operations on the ground, existing and/or proposed roads or access routes to be used in connection with the operations as set forth in 228.12 on access and the approximate location and size of areas where surface resources will be disturbed; and (3) information sufficient to describe the type of operations proposed and how they would be conducted, the type and standard of existing and proposed roads or access routes, the means of transportation used or to be used as set forth in 228.12, the period during which the proposed activity will take place, and measures to

be taken to meet the requirements for environmental protection in 36 CFR 228.8.

A Notice of Intent includes the following information: (1) Information sufficient to identify the area involved; (2) the nature of the proposed operation; (3) the route of access to the area of operations; and (4) the method of transport. A Cessation of Operations statement includes verification of intent to maintain structures, equipment, and other facilities; expected reopening date; and an estimate of extended durations of operations.

These collections of information are crucial for protecting surface resources, plants, animals and their habitat, as well as the public safety on National Forest System lands. The collected information will help ensure that the exploration, development, and production of mineral resources are conducted in an environmentally sensitive manner; that these mineral operations are integrated with the planning and management of other resources using the principles of ecosystem management; and, that lands disturbed by minerals operations are reclaimed using the best scientific knowledge and principles and returned to other productive uses.

The following table shows the estimated time it takes an operator for an average Plan of Operations, Notice of Intent, and a Cessation of Operations to gather the appropriate information and put it into a logical order before submitting it to the Forest Service. The table also shows the number of the various types of locatable mineral operations received:

	Plan of operations	Notice of intent	Cessation of operations
Estimate of Annual Burden.	8 hours	2 hours	1 hour.
Type of Respondents.	Mineral Operators.	Mineral Operators.	Mineral Operators.
Estimated Annual Number of Respondents.	736	1,396	19
Estimated Annual Number of Responses per Respondent.	1	1	1

	Plan of operations	Notice of intent	Ces-sation of op-er-ations
Estimated Total Annual Burden on Re-spondents.	5,888	2,792	19

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the agency, including whether the information will have practical or scientific utility; (2) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission for Office of Management and Budget approval.

Dated: December 28, 2004.

International Trade Administration

(A-122-840)

Notice of Correction to Notice of Final Results of Antidumping Duty Administrative Review: Carbon and Certain Alloy Steel Wire Rod from Canada

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 22, 2004

FOR FURTHER INFORMATION CONTACT: Daniel O'Brien or David Neubacher, at (202) 482-1376 or (202) 482-5823, respectively; AD/CVD Operations, Office 1, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW, Washington, DC 20230.

CORRECTION:

On November 24, 2004, the Department of Commerce (the Department) published its final results of the antidumping administrative review of the order of carbon and certain alloy steel wire rod (subject merchandise) from Canada for the period April 10, 2002, through September 30, 2003. *See Notice of Final Results of Antidumping Duty Administrative Review: Carbon and Certain Alloy Steel Wire Rod from Canada* 69 FR 68309 (November 24, 2004). Subsequent to the issuance of the final results, we identified an inadvertent error in the **Federal Register**.

In the "Assessment" section of the review notice, the Department indicated that it would "issue appropriate assessment instructions directly to CBP within 15 days of publication of these final results of review." The "within 15 days of publication" description is incorrect in the notice. Section 356.8 of the applicable regulations provides that the Department shall not order liquidation until the "forty-first day after the date of publication of the notice ..." following an administrative review of merchandise exported from Canada or Mexico. Accordingly, the notice should be corrected to indicate that the Department will send assessment instructions to CBP "on or after the 41st day after publication."

This correction is issued and published in accordance with section 777(i) of the Tariff Act of 1930, as amended.
