NUCLEAR REGULATORY COMMISSION

[Docket No. 50-341]

Detroit Edison Company; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of the Detroit Edison Company (the licensee) to withdraw its March 17, 2005, application for proposed amendment to Facility Operating License No. NPF-43 for Fermi 2, located in Monroe County, Michigan.

The proposed amendment would have revised the facility technical specifications (TSs) pertaining to TS 3.3.6.1, "Primary Containment Isolation Instrumentation," to correct a formatting error introduced during conversion to Improved Technical Specifications by replacing "1" per room with "2" per

room for the required channels per trip system for the reactor water cleanup area ventilation differential temperature high primary containment isolation instrumentation.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on April 26, 2005 (70 FR 21449). However, by letter dated January 31, 2006, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated March 17, 2005, and the licensee's letter dated January 31, 2006, which withdrew the application for license amendment. NUCLEAR REGULATORY COMMISSION

[Docket No. 040-08838]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for the Department of the Army's Facility at Jefferson Proving Ground

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Availability.

FOR FURTHER INFORMATION CONTACT:

Thomas McLaughlin, Project Manager, Decommissioning Directorate, Division of Waste Management and Environmental Protection, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; Telephone: (301) 415-5869; fax number: (301) 415-5398; e-mail: tgm@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to the Department of the Army (Army or licensee) for License No. SUB-1435. The amendment would authorize an alternate decommissioning schedule pursuant to 10 Code of Federal Regulations (CFR) part 40.42(g)(2), for the Army to conduct site characterization and prepare and submit a decommissioning plan for its facility at Jefferson Proving Ground, Madison, Indiana. NRC has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate.

II. EA Summary

The purpose of this proposed action is to amend Radioactive Materials License SUB-1435 to allow the Army to

decommission its Jefferson Proving Ground facility using an alternate schedule for submittal of a decommissioning plan pursuant to 10 CFR part 40.42(g)(2). The Army is requesting a 5-year period to characterize the site and submit a decommissioning plan. The Army's request is contained in a letter to NRC dated May 25, 2005.

The NRC staff has determined that all steps in the proposed site characterization could be accomplished in compliance with the NRC public and occupational dose limits and effluent release limits. In addition, the staff has concluded that approval of the alternate decommissioning schedule would not result in a significant adverse radiological or non-radiological impact on the environment.

If the NRC approves the license amendment, the authorization will be documented in an amendment to NRC License No. SUB-1435. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report in addition to the EA.

III. Finding of No Significant Impact

The staff has prepared the EA (summarized above) in support of the Army's proposed alternate schedule for submittal of a decommissioning plan. The NRC staff has concluded that there will be no significant adverse environmental impacts associated with approving the Army's license amendment request. On the basis of the EA, the NRC has concluded that the environmental impacts from the action are expected to be insignificant and has determined not to prepare an environmental impact statement for the action.

IV. Further Information

Documents related to this action, including the application for amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agency-wide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to pdrr@nrc.gov.
