SUPPLEMENTARY INFORMATION:

Title: Small Community Air Service Development Program.

OMB Control Number: XXXX-XXXX.

Type of Request: Comments on data collection.

Abstract: The Department of Transportation needs to collect certain information from eligible grant applicants in order to evaluate community proposals for financial grants to address their air service/air fare needs under the criteria set forth in 49 U.S.C. 41743 for the Small Community Air Service Development Program (Small Community Program) (Grant Application Form). In addition, the Department needs to collect information from those communities selected for grant awards regarding improvements to their air services and air fares, the community's expenditures made in conjunction with the authorized air service/fare improvements, and the effectiveness of the expenditures for such service(s). The purpose of these collections is to permit the Department to monitor the effects of the Small Community Program on the use of the air service at the local airport (Enplanement Report); to effectively and efficiently process a community's reimbursement requests during implementation of the air service/air fare improvements (Reimbursement Form); and to monitor and evaluate the effectiveness of the project being implemented with federal funding provided under the Small Community Program (Final Report).

Respondents: Eligible local communities or consortia of communities and/or local airports serving those communities.

Estimated Number of Respondents: 380. This consists of approximately 100 grant applicants each year; 120 grant recipients filing enplanement reports and reimbursement requests; and 40 grant recipients filing final reports each year.

Estimated Total Burden on Respondents: 13,200 hours. This consists of 8,000 hours for the application process; 480 hours for enplanement reports; 400 hours for final reports, and 4,320 hours for reimbursement requests. For applications, this assumes a maximum of 80 hours to prepare an application for

100 respondents; one hour each to complete the enplanement report four times per year assuming 120 grant recipients; ten hours to complete the final report, assuming 40 grant recipients file final reports each year; and three hours to complete a reimbursement request, assuming 120 grant recipients file one reimbursement request each month. With the exception of the reimbursement requests, which must include an original signature and supporting documentation, respondents are permitted to submit the collection data electronically to the Department. The Department expects to transition into an electronic submission system for reimbursement requests within the next 12 months.

Comments are invited on: (a) Whether the proposed collection of information is reasonable for the proper performance of the grant award functions of the Department under the Small Community Program, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information collection; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Issued in Washington, DC, on April 13, 2006.

Acting Director, Office of Aviation Analysis.

Office hours are from 7:30 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: George Washington Birthplace National Historic Site, Visitor Transportation Survey.

Background: The transportation related data that is collected is used for management decisions that affect visitor access and mobility, including estimates of the facility's future highway needs and assessments of highway system performance. The information is used by the FHWA to develop and implement legislation and by State and Federal transportation officials to adequately plan, design, and administer effective, safe, and efficient transportation systems in and around the subject facility. This data is essential to the FHWA and Congress in evaluating the effectiveness of the Federal-Lands Highway Program (FLHP). The data that is required by the FLHP is continually reassessed and streamlined by the FHWA.

Respondents: General public visitors to the National Historic Site.

Estimated Average Burden Per Response: The estimated average reporting burden per response is 10 minutes.

Estimated Total Annual Burden: The estimated total annual burden for all respondents is 17 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that burdens could be minimized, including use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Environmental Impact Statement on New Transit Operations in Madison, WI

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of Intent To Prepare an Environmental Impact Statement (EIS).

SUMMARY: The Federal Transit Administration (FTA) and the City of Madison, WI (Madison) intend to prepare an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act (NEPA) for a proposal by Madison to implement new transit operations in an approximately 13-mile travel corridor extending from the City of Middleton on the west, through the campus of the University of Wisconsin-Madison to the Isthmus of Madison, WI to the American Parkway interchange on US 151, southwest of Sun Prairie, WI and encompassing the surrounding urbanized areas.

Growing mobility challenges coupled with very limited opportunity for highway capacity expansion has prompted the communities in the area to consider investment in transportation improvements, both to supplement and enhance existing Metro bus service and
