Title: PM_{2.5} National Ambient Air Quality Standard Implementation Rule.

ICR numbers: EPA ICR No. 2258.01.

ICR status: This ICR covers the 3-year time period from April 5, 2008 through April 4, 2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Paperwork Reduction Act requires the information found in this Information Collection Request (ICR) number 2258.01, to assess the burden (in hours and dollars) of the PM_{2.5} National Ambient Air Quality Standard Implementation (NAAQS) Rule as well as the periodic reporting and record keeping necessary to maintain the rule. The rule was proposed November 1, 2005 (70 FR 65983) and promulgated April 25, 2007 elsewhere in the Rules section of part II of this **Federal Register**. The preamble to the proposed and final regulation addressed the administrative burden in general terms. The preamble to the final rule stated that an ICR would be prepared. The rule includes requirements that involve collecting information from States with areas that have been designated nonattainment for the PM_{2.5} NAAQS.

The time period covered in this ICR is a 3-year period from April 5, 2008 through April 4, 2011. The milestones for the State or local air agency respondents will include the required SIP elements prescribed in the Clean Air Act (CAA) sections 110 and part D, subpart 1 of title I for Implementation plans and the requirements in the PM_{2.5} NAAQS Implementation Rule (40 CFR 51.1000–51.1012). The PM_{2.5} SIP will contain rules and other requirements designed to achieve the NAAQS by the deadlines established under the CAA,

and it also contains a demonstration that the State's requirements will in fact result in attainment. The SIP must meet the requirements in subpart 1 to adopt Reasonable Available Control Measures, Reasonable Available Control Technology, and provide for Reasonable Further Progress toward attainment for the period prior to the area's attainment date. However, not all of the milestones and associated burden and administrative cost estimates apply to every designated PM_{2.5} nonattainment area. Areas with cleaner air quality have fewer requirements.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 10,000 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 21.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 210,000 hours.

Estimated total average annual costs per respondent: \$604,762. This includes an estimated burden cost of \$604,762 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

Additional Background on Burden Estimation Method

The methodology and draft estimates of incremental administrative burden for this ICR are documented in a separate supporting statement in the docket. The methodology and draft estimates in the PM_{2.5} Implementation

Rule ICR are based on the ICR developed for the 8-hour ozone Implementation Rule ICR (EPA ICR No. 2236.02, OMB Control No. 2060–0594). The 8-hour ozone Implementation Rule ICR methodology and draft estimates were submitted to EPA's Ozone National Ambient Air Quality Standards Implementation Workgroup for their review and comment. This workgroup is comprised of representatives from EPA Regional Offices I through IX as well as EPA's Offices of General Counsel, Policy-Economics and Innovation, and Air and Radiation (including the Offices of Transportation and Air Quality, Air Quality Planning and Standards, and Policy Analysis and Review).

The workgroup provided constructive criticism on earlier drafts which resulted in clarifications to the methodology section, revisions to the categorization of non-attainment areas by regional office, and changes to the temporal allocation of regional office administrative burden. The workgroup reviewed the June 2006 ICR supporting statement which was forwarded to OMB's Office of Information and Regulatory Affairs. The workgroup believed there would be differences between the realized incremental administrative burden of the states and regional offices versus what was in the supporting statement. However, the estimates in the ICR supporting statement were judged to be appropriate (e.g. in the right ballpark).

What Is the Next Step in the Process for This ICR?

The EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
