

7. Consider and act on nominations for the Vice Chairman of the Board of Directors.

8. Consider and act on delegation to Chairman of authority to make Committee assignments.

9. *Chairman's Report.*

10. *Members' Reports.*

11. *President's Report.*

12. *Inspector General's Report.*

13. Consider and act on the report of the *Provision for the Delivery of Legal Services Committee.*

14. Consider and act on the report of the *Finance Committee.*

15. Consider and act on the report of the *Operations & Regulations Committee.*

16. Staff presentation on LSC's Technology Initiative Grants.

17. Staff presentation on LSC's Competitive Grants Process.

18. Status Report on Performance Measures for Strategic Directions.

19. Consider and act on the selection of locations for LSC Board meetings in calendar year 2008.

20. Consider and act on Director Fuentes' suggestion that Board meet more frequently.

21. Public comment.

22. Consider and act on other business.

23. Consider and act on whether to authorize an executive session of the Board to address items listed below under *Closed Session.*

Closed Session

24. Consider and act on the report of the *Performance Reviews Committee.*

25. Consider and act on General Counsel's report on potential and pending litigation involving LSC.

26. IG briefing of the Board.

27. Consider and act on motion to adjourn meeting.

CONTACT PERSON FOR INFORMATION:

Patricia D. Batie, Manager of Board Operations, at (202) 295-1500.

SPECIAL NEEDS: Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Patricia D. Batie, at (202) 295-1500.

Dated: January 12, 2007.

Victor M. Fortuno,

Vice President for Legal Affairs, General Counsel & Corporate Secretary.

NRC IMPORT LICENSE APPLICATION

NUCLEAR REGULATORY COMMISSION

Request To Amend License To Import Radioactive Waste

Pursuant to 10 CFR 110.70 (c) "Public notice of receipt of an application," please take notice that the Nuclear Regulatory Commission (NRC) has received the following request to amend an import license. Copies of the request are available electronically through ADAMS and can be accessed through the Public Electronic Reading Room (PERR) link <http://www.nrc.gov/NRC/ADAMS/index.html> at the NRC Homepage.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

Information concerning the exemption from the requirement for a specific import license is as follows:

Name of applicant, date of application, date received, Application No., Docket No.	Description of material	End use	Country of origin
Diversified Scientific Services, Inc. (DSSI), December 22, 2006, December 28, 2006, IW004/04, 11004982.	Class A radioactive mixed waste containing tritium and carbon-14, and mixed fission product radionuclides.	For processing, incineration and return of resultant residue to Canada. Amend to extend the expiration date from December 31, 2006 to December 31, 2008.	Canada.

For the Nuclear Regulatory Commission.
Dated this 5th day of January 2007 at
Rockville, Maryland.

Margaret M. Doane,

*Deputy Director, Office of International
Programs.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-33881]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment to Byproduct Materials License No. 37-30229-01, for Termination of the License and Unrestricted Release of the West Pharmaceutical Service's Facility in Lionville, PA

AGENCY: Nuclear Regulatory
Commission.

ACTION: Issuance of Environmental
Assessment and Finding of No
Significant Impact for License
Amendment.

FOR FURTHER INFORMATION CONTACT:

Dennis Lawyer, Health Physicist,
Commercial and R&D Branch, Division
of Nuclear Materials Safety, Region I,
475 Allendale Road, King of Prussia,
Pennsylvania; telephone (610) 337-
5366; fax number (610) 337-5393; or by
e-mail: drl1@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Byproduct Materials License No. 37-30229-01. This license is held by West Pharmaceutical Services (the Licensee), for its West Pharmaceutical Services facility located at 101 Gordon Drive in Lionville, Pennsylvania (the Facility). Issuance of the amendment would authorize release of the Facility for unrestricted use and termination of the NRC license. The Licensee requested this action in a letter dated February 17, 2006. The NRC has prepared an Environmental Assessment (EA) in support of this proposed action in accordance with the requirements of Title 10, Code of Federal Regulations (CFR), Part 51 (10 CFR Part 51). Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate with respect to the proposed action. The amendment will be issued to the Licensee following the publication of this FONSI and EA in the **Federal Register**.

II. Environmental Assessment

Identification of Proposed Action

The proposed action would approve the Licensee's February 17, 2006, license amendment request, resulting in release of the Facility for unrestricted use and the termination of its NRC materials license. License No. 37-30229-01 was issued on July 26, 1995, pursuant to 10 CFR Part 30, and has been amended periodically since that time. This license authorized the Licensee to use unsealed byproduct material for purposes of conducting research and development activities on laboratory bench tops and in hoods.

The Facility is a 260,000 square foot building consisting of office space and laboratories. The Facility is located in a mixed residential, light industrial, retail, and commercial area. Within the Facility, use of licensed materials was confined to the 528 square foot Radioisotope and Tissue Culture Laboratory.

On February 14, 2005, the Licensee ceased licensed activities and initiated a survey and decontamination of the Facility. Based on the Licensee's historical knowledge of the site and the conditions of the Facility, the Licensee determined that only routine decontamination activities, in accordance with their NRC-approved, operating radiation safety procedures, were required. The Licensee was not required to submit a decommissioning plan to the NRC because worker cleanup activities and procedures are consistent with those approved for routine operations. The Licensee conducted surveys of the Facility and provided information to the NRC to demonstrate that it meets the criteria in Subpart E of 10 CFR Part 20 for unrestricted release and for license termination.

Need for the Proposed Action

The Licensee has ceased conducting licensed activities at the Facility, and seeks the unrestricted use of its Facility and the termination of its NRC materials license. Termination of its license would end the Licensee's obligation to pay annual license fees to the NRC.

Environmental Impacts of the Proposed Action

The historical review of licensed activities conducted at the Facility shows that such activities involved use of the following radionuclides with half-lives greater than 120 days: Hydrogen-3 and carbon-14. Prior to performing the final status survey, the Licensee conducted decontamination activities, as necessary, in the areas of the Facility affected by these radionuclides.

The Licensee conducted a final status survey on February 14, 2005, and September 6, 2006. The final status survey report was submitted with the Licensee's amendment request dated February 17, 2006, and letter dated October 17, 2006. The Licensee elected to demonstrate compliance with the radiological criteria for unrestricted release as specified in 10 CFR 20.1402 by using the screening approach described in NUREG-1757, "Consolidated NMSS Decommissioning Guidance," Volume 2. The Licensee used the radionuclide-specific derived concentration guideline levels (DCGLs), developed there by the NRC, which comply with the dose criterion in 10 CFR 20.1402. These DCGLs define the maximum amount of residual radioactivity on building surfaces, equipment, and materials, and in soils, that will satisfy the NRC requirements in Subpart E of 10 CFR Part 20 for unrestricted release. The Licensee's final status survey results were below these DCGLs and are in compliance with the As Low As Reasonably Achievable (ALARA) requirement of 10 CFR 20.1402. The NRC thus finds that the Licensee's final status survey results are acceptable.

Based on its review, the staff has determined that the affected environment and any environmental impacts associated with the proposed action are bounded by the impacts evaluated by the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities" (NUREG-1496) Volumes 1-3 (ML042310492, ML042320379, and ML042330385). The staff finds there were no significant environmental impacts from the use of radioactive material at the Facility. The NRC staff reviewed the docket file records and the final status survey report to identify any non-radiological hazards that may have impacted the environment surrounding the Facility. No such hazards or impacts to the environment were identified. The NRC has identified no other radiological or non-radiological activities in the area that could result in cumulative environmental impacts.

The NRC staff finds that the proposed release of the Facility for unrestricted use and the termination of the NRC materials license is in compliance with 10 CFR 20.1402. Based on its review, the staff considered the impact of the residual radioactivity at the Facility and concluded that the proposed action will not have a significant effect on the quality of the human environment.
